

INDEX FOR VOLUME 13

AUTHOR INDEX

- A**
- Akiyoshi, M.**, see H. W. Berg. 13:126-132.
Amerine, M. A., see C. S. Ough. 13:181-188.
- B**
- Berg, H. W. and M. Akiyoshi** *Color Behavior During Fermentation and Aging of Wines.* 13:126-132.
———, see C. S. Ough. 13:32-39.
Boehm, E. W., see B. C. Rankine. 13:58-72.
Bouthilet, R. S., see G. Thoukis. 13:105-113.
- C**
- Caputi, A. Jr.**, see G. Thoukis. 13:105-113.
Cellier, K. M., see B. C. Rankine. 13:58-72.
Chiarappa, L., J. W. Eckert and M. J. Kolbezen. *Effect of Dibromotetrachloroethane and Other Chemicals on Botrytis Decay of Emperor Grapes in Storage.* 13:83-90.
Chichester, C. O., see C. S. Ough. 13:32-39.
- D**
- Draper, D. E.**, see V. L. Singleton. 13:114-125.
- E**
- Eckert, J. W.**, see L. Chiarappa. 13:83-90.
- G**
- Gini, B. and R. H. Vaughn.** *Characteristics of Some Bacteria Associated with Spoilage of California Dessert Wines.* 13:20-31.
Goheen, A. C. and W. B. Hewitt. *Vein Banding, a New Virus Disease of Grapevines.* 13:73-77.
Gooding, G. V. Jr., and W. B. Hewitt. *Grape Yellow Vein: Symptomatology, Identification, and the Association of a Mechanically Transmitted Virus with the Disease.* 13:196-203.
- Guymon, J. F. and C. S. Ough.** *A Uniform Method for Total Acid Determination in Wine.* 13:40-45.
- H**
- Hewitt, W. B.**, see A. C. Goheen. 13:73-77.
———, see G. V. Gooding. 13:196-203.
- I**
- Iwano, Sadao and Haruo Sawanobori.** *Titration of Calcium and Magnesium in Wine with Ethylenediamine Tetraacetate.* 13:54-57.
- K**
- Kasimatis, A. N.**, see R. J. Weaver. 13:78-82.
Kepner, R. E., see A. D. Webb. 13:1-14.
Kolar, G. F. *Manometric Determination of 1 (—) Malic Acid in Grape Musts and Wines.* 13:99-104.
Kolbezen, M. S., see L. Chiarappa. 13:83-90.
- M**
- McCune, S. B.**, see R. J. Weaver. 13:15-19. 13:78-82.
Morrison, R. L. *The Determination of Acetaldehyde in High-Proof Fortifying Spirits, Beverage Brandy and Wine.*
- O**
- Orser, R. E.**, see H. Y. Yang. 13:152-158.
Ough, C. S. and M. A. Amerine. *Studies with Controlled Fermentation. VII. Effect of Ante-Fermentation Blending of Red Must and White Juice on Color, Tannins, and Quality of Cabernet Sauvignon Wines.* 13:181-188.
———, **H. W. Berg and C. O. Chichester.** *Approximation of Per Cent Brightness and Dominant Wave Length and Some Blending Applications with Red Wines.* 13:32-39.

- , see J. F. Guymon. 13:40-45.
 —————, see A. D. Webb. 13:51-53.

R

- Rankine, B. C., K. M. Cellier, and E. W. Boehm. *Studies on Grape Variability and Field Sampling*. 13:58-72.

S

- Sawanobori, Haruo, see Sadao Iwano. 13:54-57.
 Singleton, V. L. and D. E. Draper. *Adsorbents and Wines. I. Selection of Activated Charcoal for Treatment of Wine*. 13:114-125.
 Stern, L. A. see G. Thoukis. 13:133-140.

T

- Thoukis, G., R. S. Bouthilet, M. Ueda and A. Caputi, Jr. *Fate of Diethyl Pyrocarbonate in Wine*. 13:105-113.
 —————, and L. A. Stern. *A Review and Some Studies of the Effect of Sulphur on the Formation of Off-Odors in Wine*. 13:133-140.

U

- Ueda, M., see G. Thoukis. 13:105-113.

V

- Vaughn, R. H., see B. Gini. 13:20-31.

W

- Weaver, R. J. *The Effect of Benzothiazole-2-Oxyacetic Acid on Maturation of Seeded Varieties of Grapes*. 13:141-149.
 —————, A. N. Kasimatis and S. B. McCune. *Studies with Gibberellin on Wine Grapes to Decrease Bunch Rot*. 13:78-82.
 —————, and S. B. McCune. *Studies on Prebloom Sprays of Gibberellin to Elongate and Loosen Clusters of Thompson Seedless Grapes*. 13:15-19.
 Webb, A. D., and R. E. Kepner. *The Aroma of Flor Sherry*. 13:1-14.
 ————— and C. S. Ough. *Comparison of Wines from Aroma-Stripped Musts with Wines to Which Aroma was Re-Added*. 13:51-53.
 Webb, R. B. *Laboratory Studies of the Malo-Lactic Fermentation*. 13:189-195.
 Williams, G. C. *Vapor-Liquid Equilibria of Organic Homologues in Ethanol-Water Solutions*. 13:169-180.

Y

- Yang, H. Y., and R. E. Orser. *Preservative Effect of Vitamin K₅ and Sulfur Dioxide on Sweet Table Wine*. 13:152-158.

SUBJECT INDEX

- A
Acetaldehyde.
 determination of. 13:159-168.
 equilibrium with acetal. 13:160-163.
Adsorbents. activated charcoal and wine. 13:114-123.
Acid. α -methylmalic. *review*. 13:205.
 pyrocarbonic. *abstract*. 13:205.
 saccharic, in clouding. 13:46.
 sorbic. *review*. 13:205.
 total. determination of. 13:40-45.
 uniform method of total acid determination. 13:40-45.
 variability in grapes. 13:58-71.
Acids, organic.
 vapor-liquid equilibria in ethanol-water mix. 13:169-180.
Aging. and color behavior. 13:126-132.
Alcohol. content and color. 13:127-128.
Aldehydes. vapor-liquid equilibria in ethanol-water solution. 13:169-180.
Aluminum. haze. *abstract*. 13:205.
Amino acids. and DEPC. 13:109-112.
Analysis. variance component for estimation of sugar-acid variability in grapes. 13:58-71.
Anthocyan. (see, also, *Pigments*.)

- and aged wine. **13**:126-132.
removal by activated carbon. **13**:114-123.
- Aroma.** (see, also, *Taste tests*).
comparative studies in wine of stripped and of re-added musts. **13**:51-53.
extraction of flor aroma. **13**:1.
of flor sherry. **13**:1-14.
recovery of in plants. *abstract*. **13**:93.
wine of aroma-stripped and of aroma-re-added musts. **13**:51-53.
- Aroma-stripped musts.** (see *Musts*).
- Ascorbic acid** oxidation by activated carbon. **13**:119-120.
- Australian** flor sherry. aroma of. **13**:1-14.
- B**
- Bacillus** sps. in dessert wine spoilage. **13**:25-30.
characteristics of. **13**:22-23.
- Bacterial** spoilage. in dessert wines. **13**:20-30.
- Beer.** market for. *abstract*. **13**:93.
- Benzothiazole -2- oxyacetic acid.** maturation of seeded grapes. **13**:141-149.
- Blending.** in controlled fermentation. **13**:181-188.
to a color standard. **13**:32-39.
- BOA.** (see *Benzthiazole -2- oxyacetic acid*).
- Botrytis.** decay on stored Emperor grapes. fumigation. **13**:83-89.
- Brandy.** acetaldehyde determination. **13**:156-168.
with "mustard" odor. French study. *abstract*. **13**:204.
- Browning.** removal of color by activated carbon. **13**:114-123.
- Bud burst.** (see *Dormancy*).
- Buds.** premature burst. Australian study. *review*. **13**:207.
- Bunch rot.** reduced by use of gibberellin. **13**:78-82.
- C**
- Cabernet** sauvignon. in controlled fermentation color studies. **13**:181-188.
- Calcium.** concentrations in various wines. **13**:54-56.
titration with ethylenediamine tetraacetate. **13**:54-56.
- Carbon.** activated. choice of for treatment of wines. **13**:114-123.
oxidation of ascorbic acid. **13**:119-120.
removal of anthocyanins. **13**:120.
removal of brown colors. **13**:121.
use in quick aging. **13**:114-123.
- Carignane.** bunch rot. **13**:78-82.
- Charcoal.** activated. (see *Carbon*).
- Chemistry** in wine making. Russian study. *review*. **13**:48.
- Chromatography.** gas.
acetaldehyde determination. **13**:159-168.
and flor sherry fractions. **13**:2-3.
- Chromatography.** paper.
coloring matter. *abstract*. **13**:96. *abstract*. **13**:98.
in malo-lactic fermentations. **13**:189-195.
and regulations. *abstract*. **13**:97.
sugar content tests. **13**:151.
- Clouding.** saccharic acid. *abstract*. **13**:46.
- Clusters.** weight and composition variation. **13**:59.
- Color.** blending to a standard. **13**:32-39.
in controlled fermentation. **13**:181-188.
during fermentation and aging. **13**:126-132.
in red wine, measurements of. **13**:32-39.
- Controlled fermentation.** ante-fermentation blending study. **13**:181-188.
color, tannin, quality experiments. **13**:181-188.
- Cottony mold.** (see *Bacterial spoilage*).
- Crop size.** effect on grape composition. **13**:62-65.
- Crystalline** clouding. **13**:46.
- D**
- DEGS.** column. (see, also, *Chromatography, gas*).
in acetaldehyde determination. **13**:166-177.
in flor sherry aroma. **13**:2-3.
- DEPC.** (see *Diethyl pyrocarbonate*).
- Dessert.** wine. bacterial spoilage. **13**:20-30.
- Dibromotetrachloroethane.** use for *Botrytis* decay. **13**:83-89.
- Diethyl pyrocarbonate.** and amino acids in wine. **13**:109-112.
effect of pH on rate of. **13**:108.
fate of in wine. **13**:105-113.

- rate of hydrolysis. **13:107.**
 similarity to ethyl chloroformate. **13:109.**
 and tannic acid. **13:111-112.**
Dormancy and bud burst. *abstract.* **13:97.**

E

- Elemental sulfur.** (*see Sulfur*).
Emperor grapes. treatment for storage. **13:83-89.**
Equilibria. (*see Vapor-liquid*).
Esters. vapor-liquid equilibria in ethanol-water solution. **13:169-180.**
Ethanol. equilibrium vaporizing data. **13:171-176.**
 volatilities to in ethanol-water solution. **13:177-180.**
 inhibition of malic decarboxylase. **13:102.**
Ethylenediamine tetraacetate. for titrating calcium and magnesium in wine. **13:54-56.**

F

- Fermentation.** color behavior during. **13:126-132.**
Field sampling. (*see Sampling*).
Filtration. filter pads. *German.* *abstract.* **13:204.**
Flor sherry. (*see, also Sherry*).
 aroma of. **13:1-14.**
Food, drug and cosmetic act. bunch rot reductions. **13:82.**
French colombard. studies of wine from aroma-stripped musts. **13:51-53.**
Fresno mold. (*see Bacterial spoilage*).
Frontal analysis technique. in selection of activated carbon for wine treatment. **13:116-123.**
Fruit. estimating potential. *abstract.* **13:95.**
Fumigants. for Botrytis decay. **13:83-89.**
Fungicides. in Botrytis decay. **13:83-89.**
 and off-odors. **13:133-139.**
Fusil oil. formation of by wine yeasts. *abstract.* **13:151.**

G

- Gibberellin.** delay of bud break. *abstract.* **13:91.**
 to decrease bunch rot. studies. **13:78-82.**

- prebloom sprays. **13:15-19.**
 reactions of grapes. *abstract.* **13:151.**
 wettable powder studies. **13:15-19.**

- Glycerine** in wine. *abstract.* **13:97.**
Grape. new virus diseases. **13:73-76.**
 variability of composition between vines and in vines. **13:58-71.**
 varieties introduced in New York state. *abstract.* **13:150.**
Grapes, breeding. photoperiodocyc. *abstract.* **13:94.**
Growth regulators. *review.* **13:207.**

H

- Herbicides.** chemical. *German* study. *abstract.* **13:206.**
Higher alcohols. vapor-liquid equilibria in ethanol-water solution. **13:169-180.**
Holy land. history of wine. *abstract.* **13:150.**
Hydrogen sulfide. and presence of elemental sulfur. **13:133-139.**
Hydroxymethylfurfural. occurrence. *review.* **13:47.**

L

- Lactobacillus arabinosus.** use in l (—) malic determination. **13:99-103.**
Leaf traces. anatomic-histologic studies. *abstract.* **13:95.**

M

- Magnesium.** concentration in various wines. **13:54-56.**
 titration with ethylenediamine tetraacetate. **13:54-56.**
Malic acid. inhibition of by % of ethanol in solution. **13:102.**
 l (—) malic in musts and wines. Manometric determination. **13:99-103.**
Malo-lactic fermentation. laboratory studies of. **13:189-195.**
Manometric method in malic acid determinations in musts and wines. **13:99-103.**
Maturation. delay of harvest. BOA use. **13:141-149.**
 seeded varieties. **13:141-149.**
Mildew. as reviewed in early California press. **13:48.**

- Muscat canelli.** studies of wine from aroma-stripped musts. **13:51-53.**
- Musts.** determination of l (—) malic acid. **13:99-103.**
desulfuring. *abstract.* **13:98.**
wines from aroma-stripped and from aroma re-added. **13:51-53.**
- N**
- Nitrogen** compounds in wine. French study. *review.* **13:50.**
- O**
- Off-odors** in wine. sulfur effect on. **13:133-139.**
- P**
- Paeonidin.** 3,5-diglucoside in *Vitis*. *abstract.* **13:96.**
- Pasteur Jubilee.** **13:47.**
- Pediococcus** sps. characteristics of. **13:28.**
in dessert wine spoilage. **13:25-30.**
- pH.** and DEPC. **13:108.**
- Pigments.** anthocyan, study of. **13:96.**
in controlled fermentation. **13:181-188.**
- Prebloom** sprays. gibberellin on Thompson seedless. **13:15-19.**
- Preservatives.** sweet table wine. vitamin K₅ and sulfur dioxide. **13:152-158.**
- Pruning.** sultanas in Australia. *abstract.* **13:206.**
- Q**
- Quality control.** fundamentals of. *abstract.* **13:150.**
- R**
- Radioactive carbon.** use in studies of DEPC fate. **13:105-113.**
- Red wine.** color measurement studies. **13:32-39.**
- Residues.** and DEPC. **13:105-113.**
- Ribier.** BOA use. **13:141-149.**
- S**
- Saccharic acid.** in clouding. *abstract.* **13:46.**
- Sampling.** studies of grape variability by field sampling. **13:58-71.**
- Seeded** varieties. BOA use. **13:141-149.**
- Seedless grapes.** new. Italian. *review.* **13:47.**
- Secondary fermentation.** inhibitory effect of vitamin K₅ and sulfur dioxide. **13:152-158.**
- Semillon.** studies of wines from aroma-stripped musts. **13:51-53.**
- Sherry.** acetaldehyde determination. **13:159-168.**
analyses of fraction. **13:3-8.**
flor, aroma of. **13:1-14.**
sources of aroma. **13:9-10.**
- Sorbic acid.** identification of in wines. *abstract.* **13:150.**
- Spectrophotometer.** in red wine studies. **13:32-39.**
- Spirits.** fortifying. acetaldehyde determination. **13:159-168.**
- Starlings.** in German Vineyards. *review.* **13:50.**
- Storage.** of Emperor grapes. fumigants. **13:83-89.**
- Sugar.** variability of in grapes. **13:58-71.**
- Sulfur.** off-odors in wine. *review* and studies of effect. **13:133-139.**
- Sulfur dioxide.** determination. German study. *review.* **13:205.**
and color. **13:127.**
off-odors. **13:133-139.**
and sweet table wines. **13:152-158.**
- T**
- Table wine,** sweet. vitamin K₅ and sulfur dioxide effect on. **13:152-158.**
table tests. **13:156.**
- Tannic acid.** and DEPC. **13:111-112.**
- Taste tests,** malo-lactic fermentation laboratory studies. **13:189-195.**
sweet table wine preservatives, vitamin K₅ and sulfur dioxide. **13:156.**
of wines from aroma-stripped and re-added musts. **13:51-53.**
- Thompson seedless** grapes. gibberellin as a prebloom spray. **13:15-19.**
- Tinta Madeira.** bunch rot. **13:78-82.**
- Titration.** of calcium and magnesium in wine with ethylenediamine tetraacetate. **13:54-56.**
- Tokay.** BOA use. **13:141-149.**
- Total acid.** (*see Acid*).

Tristimulus measurements. red wine color. 13:32-39.

V

Vapor-liquid equilibria. organic homologues. 13:169-180.

Variability. of grape composition between vines and in vines. 13:58-71.

Vein banding. (see *Virus diseases*).

Vineyards. density of planting. *abstract*. 13:91.

Virus diseases. German study. *review*. 13:49.

mechanical transmission. *abstract*. 13:207.

transmission of fanleaf. *abstract*. 13:93. *abstract*. 13:94.

vein banding. 13:73-76.

yellow vein. symptoms, identification, etc. 13:196-203.

Vitamin K₅. and sweet table wine. 13:152-158.

Viticulture. German treatise. *abstract*. 13:91.

list of research stations. *abstract*. 13:92.

Vitis vinifera, vein banding, a virus disease. 13:73-76.

W

Wines. determination of l (—) malic acid. 13:99-103.

history of. *abstract*. 13:92.

of Italy. *abstract*. 13:92.

Wine handbooks. *review*. 13:48-49. *review*.

Wines and spirits. buying guide. *abstract*. 13:91.

Y

Yeast. in malo-lactic fermentation laboratory studies. 13:189-195.

Yellow vein. distribution. 13:201.

on herbaceous plants. 13:198-200.

identification. 13:201-202.

mechanical transmission. 13:198-202.

symptomatology. 13:196-202.

Z

Zinfandel. bunch rot. 13:78-82.
BOA use. 13:141-149.
