## INDEX FOR VOLUME 13

### AUTHOR INDEX

**A**

Amerine, M. A., see C. S. Ough. 13:181-188.

**B**

**C**

Caputi, A. Jr., see G. Thoukis. 13:105-113.  

**D**

**E**

**G**

**H**

Hewitt, W. B., see A. C. Goheen. 13:73-77.  
— — , see G. V. Gooding. 13:196-203.

**I**

**K**

Kasimatis, A. N., see R. J. Weaver. 13:78-82.  
Kolar, G. F. Manometric Determination of 1 (-) Malic Acid in Grape Musts and Wines. 13:99-104.  
Kolbezen, M. S., see L. Chiarappa. 13:83-90.

**M**

Morrison, R. L. The Determination of Acetaldehyde in High-Proof Fortifying Spirits, Beverage Brandy and Wine.

**O**

Orser, R. E., see H. Y. Yang. 13:152-158.  
Ough, C. S. and M. A. Amerine. Studies with Controlled Fermentation. VII. Effect of Ante-Fermentation Blending of Red Must and White Juice on Color, Tannins, and Quality of Cabernet Sauvignon Wines. 13:181-188.  
INDEX FOR VOLUME 13—56

V

W

Weaver, R. J. The Effect of Benzothiazole-2-Oxyacetic Acid on Maturation of Seeded Varieties of Grapes. 13:141-149.

Y

Yang, H. Y., and R. E. Orser. Preservative Effect of Vitamin K₅ and Sulfur Dioxide on Sweet Table Wine. 13:152-158.

SUBJECT INDEX

A

Alcohol. content and color. 13:127-128.

Anthocyan. (see, also, Pigments.)
and aged wine. 13:126-132.
removal by activated carbon. 13:114-123.

Aroma. (see, also, Taste tests).
comparative studies in wine of stripped and of re-added musts. 13:51-53.
extration of flor aroma. 13:1.
recovery of in plants. abstract. 13:93.
wine of aroma-stripped and of aroma-re-added musts. 13:51-53.

Aroma-stripped musts. (see Musts).
Ascorbic acid oxidation by activated carbon. 13:119-120.

B

Bacillus sps. in dessert wine spoilage. 13:25-30.
characteristics of. 13:22-23.
Benzothiazole-2-oxyacetic acid. matura-
tion of seeded grapes. 13:141-149.
Blending. in controlled fermentation. 13:
181-188.

BOA. (see Benzthiazole-2-oxyacetic acid).
Botrytis. decay on stored Emperor grapes. 
fumigation. 13:83-89.
Brandy. acetaldehyde determination. 13:
156-168.
with "mustard" odor. French study.
abstract. 13:204.
Browning. removal of color by activated 
carbon. 13:114-123.
Bud burst. (see Dormancy).
Buds. premature burst. Australian study.
review. 13:207.
Bunch rot. reduced by use of gibberellin. 
13:78-82.

C

Cabernet sauvignon. in controlled fer-
mentation color studies. 13:181-188.
Calcium. concentrations in various wines.
13:54-56.
titratioon with ethylenediamine tetra-
acetate. 13:54-56.

Carbon. activated. choice of for treatment 
of wines. 13:114-123.
oxidation of ascorbic acid. 13:119-120.
removal of anthocyanins. 13:120.
use in quick aging. 13:114-123.
Carignane. bunch rot. 13:78-82.
Charcoal. activated. (see Carbon).
Chemistry in wine making. Russian study.
Chromatography. gas.
acetaldehyde determination. 13:159-168.
and flor sherry fractions. 13:2-3.
Chromatography. paper.
coloring matter. abstract. 13:96. ab-
stract. 13:98.
in malo-lactic fermentations. 13:189-
195.
and regulations. abstract. 13:97.
sugar content tests. 13:151.
Clouding. saccharic acid. abstract. 13:46.
Clusters. weight and composition variation.
13:59.
in controlled fermentation. 13:181-188.
during fermentation and aging. 13:
126-132.
in red wine, measurements of. 13:32-
39.
Controlled fermentation. ante-fermentation 
blending study. 13:181-188.
color, tannin, quality experiments. 13:
181-188.
Cottony mold. (see Bacterial spoilage).
Crop size. effect on grape composition. 
Crystalline clouding. 13:46.

D

DEGS. column. (see, also, Chromatography,
gas).
in acetaldehyde determination. 13:
166-177.
in flor sherry aroma. 13:2-3.
DEPC. (see Diethyl pyrocarbonate).
Dibromotetrachloroethane. use for Botrytis 
decay. 13:83-89.
Diethyl pyrocarbonate, and amino acids in 
effect of ph on rate of. 13:108.
and tannic acid. 13:111-112.
Dormancy and bud burst. abstract. 13:97.

E
Elemental sulfur. (see Sulfur).
Emperor grapes. treatment for storage. 13:83-89.
Equilibria. (see Vapor-liquid).
Ethanol. equilibrium vaporizing data. 13:171-176.
volatilities to in ethanol-water solution. 13:177-180.
Ethylene diamine tetraacetate. for titrating calcium and magnesium in wine. 13:54-56.

F
Field sampling. (see Sampling).
Filtration. filter pads. German. abstract. 13:204.
Food, drug and cosmetic act. bunch rot reductions. 13:82.
Fresno mold. (see Bacterial spoilage).
Frontal analysis technique. in selection of activated carbon for wine treatment. 13:116-123.
Fruit. estimating potential. abstract. 13:95.
Fumigants. for Botrytis decay. 13:83-89.
Fungicides. in Botrytis decay. 13:83-89.
and off-odors. 13:133-139.
Fusil oil. formation of by wine yeasts. abstract. 13:151.

G
to decrease bunch rot. studies. 13:78-82.
preebloom sprays. 13:15-19.
reactions of grapes. abstract. 13:151.
Grape. new virus diseases. 13:73-76.
varieties introduced in New York state. abstract. 13:150.
Grapes, breeding. photoperiodocy. abstract. 13:94.
Growth regulators. review. 13:207.

H
Hydrogen sulfide. and presence of elemental sulfur. 13:133-139.
Hydroxymethylfurfural. occurrence. review. 13:47.

L
Lactobacillus arabinosus. use in (-) malic determination. 13:99-103.

M
Magnesium. concentration in various wines. 13:54-56.
titration with ethylene diamine tetraacetate. 13:54-56.
Malic acid. inhibition of by % of ethanol in solution. 13:102.
Manometric method in malic acid determinations in musts and wines. 13:99-103.
Maturation. delay of harvest. BOA use. 13:141-149.
seeded varieties. 13:141-149.
Muscat canelli, studies of wine from aroma-stripped musts. 13:51-53.
desulfuring, abstract. 13:98.
wines from aroma-stripped and from aroma re-added. 13:51-53.

N
Nitrogen compounds in wine. French study, review. 13:50.

O
Off-odors in wine. sulfur effect on. 13:133-139.

P
Pasteur Jubilee. 13:47.
Pigments, anthocyanin, study of. 13:96.
in controlled fermentation. 13:181-188.
Preservatives, sweet table wine. vitamin Ks and sulfur dioxide. 13:152-158.

Q
Quality control, fundamentals of. abstract. 13:150.

R
Residues, and DEPC. 13:105-113.
Ribier, BOA use. 13:141-149.

S
Saccharic acid, in clouding, abstract. 13:46.
Sampling, studies of grape variability by field sampling. 13:58-71.
Seeded varieties, BOA use. 13:141-149.
Seedless grapes, new, Italian, review. 13:47.
Secondary fermentation, inhibitory effect of vitamin Ks and sulfur dioxide. 13:152-158.
Semillon, studies of wines from aroma-stripped musts. 13:51-53.
Sherry, acetaldehyde determination. 13:159-168.
Sources of aroma. 13:9-10.
Spirits, fortifying, acetaldehyde determination. 13:159-168.
Starlings, in German Vineyards, review. 13:50.
Storage, of Emperor grapes, fumigants. 13:83-89.
Sulfur, off-odors in wine, review and studies of effect. 13:133-139.
Sulfur dioxide determination. German study, review. 13:205.
and color. 13:127.
off-odors. 13:133-139.
and sweet table wines. 13:152-158.

T
Table wine, sweet, vitamin Ks and sulfur dioxide effect on. 13:152-158.
table tests. 13:156.
Tannic acid, and DEPC. 13:111-112.
sweet table wine preservatives, vitamin Ks and sulfur dioxide. 13:156.
of wines from aroma-stripped and re-added musts. 13:51-53.
Thompson seedless grapes, gibberellin as a prebloom spray. 13:15-19.
Tinta Madeira, bunch rot. 13:78-82.
Titration, of calcium and magnesium in wine with ethylenediamine tetraacetate. 13:54-56.
Tokay, BOA use. 13:141-149.
Total acid, (see Acid).
Tristimulus measurements, red wine color.  

V
Variability, of grape composition between vines and in vines. 13:58-71.
Vein banding, (see Virus diseases).
Virus diseases, German study, review.  
13:49.
  mechanical transmission, abstract. 13:207.
  transmission of fanleaf, abstract. 13:93.
  abstract. 13:94.
  vein banding. 13:73-76.
  yellow vein, symptoms, identification, etc. 13:196-203.
Vitamin Ks, and sweet table wine. 13:152-158.
Viticulture, German treatise, abstract. 13:91.
  list of research stations, abstract. 13:92.

Wines, determination of 1 (—) malic acid.  
13:99-103.
history of, abstract. 13:92.
of Italy. abstract. 13:92.
Wine handbooks, review. 13:48-49. review.

Y
Yellow vein, distribution, 13:201.
on herbaceous plants, 13:198-200.

Z
Zinfandel, bunch rot, 13:78-82.
BOA use. 13:141-149.
