INDEX FOR VOLUME 14
AUTHOR INDEX

A
Amerine, M. A., see E. B. Roessler. 14:144-147.
———, see C. S. Ough. 14:194-204.

B
———, see K. E. Nelson. 14:105-113.
Bouthilet, R. J., see G. Thoukis. 14:148-154.

C
Chiarappa, L., see K. E. Nelson. 14:105-113.
Curley, R., see K. E. Nelson. 14:94-104.

D

E

G
Goheen, A. C., see C. J. Alley. 14:164-170.
Goldman, M. Factors Influencing the Rate of Carbon Dioxide Formation in Fermented-in-the-Bottle Champagne. 14:36-42.
——— Rate of Carbon Dioxide Formation at Low Temperatures in Bottle-Fermented Champagne. 14:155-160.

J
Jensen, F., see K. E. Nelson. 14:94-104.

K
Kosuge, T., see K. E. Nelson. 14:118-128.

L
La Rosa, W. V. Enological Problems of Large-Scale Wine Production in the San Joaquin Valley. 14:75-79.

M
Malstrom, H. L., see J. A. Cook. 14:223-229.

Weaver, R. J. Effect of Leaf to Fruit Ratio on Fruit Quality and Shoot Development in 'Carignane' and 'Zinfandel' Wine Grapes. 14:1-12.

SUBJECT INDEX

A

Acetoin. aeration in fermentation. 14:214-221.
suspended material influence. 14:216.
Aeration. in fermentation. 14:214-221.
Aerobic conditions. Tusel oil production. 14:218.
taste testing. 14:24-28.
Aldehydes. in port in multiple fortification tests. 14:134.
Amino acids. in maturation. review. 14:53.
Anaerobic conditions. fusel oil production. 14:218.
Ascorbic acid. in enology. 14:140.

B

Baked sherry. (see Sherry)
Beer. pasteurizing by ionizing radiation. review. 14:54.
large-scale production of spores. 14:118-127.
Botrytised grapes. large-scale spore production. 14:118-127.
Brandy. in multiple fortification tests. 14:129-136.
By-products. recovery of. review. 14:239.

C

Cabernet, Ruby. virus infection effect. 14:164-169.
Calcium tartrate. safe concentration. 14:50.
Carbohydrates. and grape vines. review. 14:175.
Carbon dioxide. formation rate in bottle-fermented champagne. 14:36-42.
sawdust handling. 14:96-99.
Carignane. leaf to fruit ratio. 14:1-11.
Casein. in clarification. 14:137.
Champagne. bottle fermented. CO₂ formation rate. 14:36-42.
popular study. review. 14:114.
paper. in vinegar mash. review. 14:116.
Cimarron. new grape variety. review. 14:175.
CO₂. (see Carbon dioxide).
Cold gassing. in SO₂ fumigation. 14:86-93.
Color of fruit. leaf to fruit ratio studies. 14:9-11.
determination. review. 14:236.
Concentrate. natural sweet. 14:194-203.
(see Grape Juice).
Czechoslovakia. gibberellic acid on grapes. 14:161-163.

D

DBTCE. (see Dibromotetrachloroethane)
Decay control. (see Fumigation)
Defranceschi. continuous fermenter. review. 14:54.
DEPC. (see diethylpyrocarbonate)
Diacetyl. aeration influence. in fermentation. 14:214-221.
Dionysus. review. 14:53.
Disodium zinc ethylenediamine tetraacetate dihydrate. in deficiency study. 14:223-229.
Drinking. normal and pathological. review. 14:52.
   review. 14:235.

Emperor grapes. DBTCE and NaHSO₃ fumigation. 14:105-113.
   sawdust handling. 14:96-99.

Evaporation. multiple-effect grape concentrate. 14:80-85.

   and fusel oil production. 14:214-221.
   continuous. review. 14:172.
   control. in Central valley. 14:76.
   red wine study. review. 14:240.
   suspended material influence. 14:216.
   temperature controls. review. 14:173.

Fermentation control. natural sweet table. 14:195.

Field sampling. (see Sampling)

Fining. gelatin and bentonite effect. review. 14:175.

Flor sherry. (see Sherry)

   taste tests. 14:134-135.

France. vineyards and wines. review. 14:114.

Fumigation. DBTCE and NaHSO₃ in table grapes. 14:105-113.
   in railroad cars. 14:86-93.

Fungicides. (see Fumigation)

Fusel Oil. aeration influence in fermentation. 14:214-221.
   in Emperor grape must. 14:216.
   suspended material influence in fermentation. 14:217.

Germany. wines and vineyards. review. 14:115.

Gibberellic acid. in grapes in Czechoslovakia. 14:161-163.
   study. review. 14:117.

Girdling. leaf to fruit ratio studies. 14:1-11.

Heads. (see Aldehydes)

Higher alcohols. (see Fusel Oil)

Hydrometer. in alcohol determination. 14:207.

INAO. report. review. 14:171.

Inflorescences. number. review. 14:171.

Italy. wines of. review. 14:152.

Leaf. to fruit ratio studies. 14:1-11.

Leaf traces. wine grapes. review. 14:171.

Little-leaf. in zinc deficiency. 14:223.

Malo-lactic fermentation. acetoin and diacetyl. review. 14:115.

Maturity. of grapes. field sampling. 14:144-147.

   in micro-dichromate ethanol determination. 14:187.

Musts. in Rhine-Pfalz vineyards. review. 14:238.
N
NaHSO₃. (see Sodium bisulfite)

O
Oxidation. and reduction in wine. 14:139-142.
determined electrochemically. review. 14:176.
in champagne. review. 14:117.

P
Pigments. anthocyanin identification. review. 14:176.

Potassium acid tartrate. safe concentration. 14:49.

Pressing. juice variations. review. 14:236.
Pycnometer. in alcohol determination. 14:207.
review. 14:239.

R
Railroad car. SO₂ fumigation. 14:86-93.

Raisins. dipping treatments. 14:230-234.

Red-leaf. in Ruby Cabernet. 14:164-169.

Redox control. 14:141.
phenomena. abstract. 14:52.
Reducing agents. of wine. 14:139.
Reduction. (see Oxidation)

Ruby Cabernet. (see Cabernet)

S
Saccharomyces bicus. (see Yeast)
in winery fermentations. 14:148-150.
(see Yeast)
Sampling. field. of grapes. 14:144-147.
San Joaquin valley. wine production problems. 14:75-79.
Sawdust handling. table grapes. 14:94-104.
Sensory analysis. (see Taste Testing)

Sensory Testing. (see Taste Testing)
Sherry. acetoin in. 14:220.
diacetyl in. 14:220.

Shoot development. in leaf to fruit ratio. 14:1-11.

SO₂. (see Sulfur dioxide)

Sorbin acid. in enology. review. 14:174.

Spain. grape and wine industry. 14:172.

Sparkling wines. wild-foaming. review. 14:173.

Stability. index. nomogram. review. 14:177.
sorbic acid use. 14:54.

Stabilization. natural sweet. 14:194-204.

Sweet wine. natural. Botrytis spor production.
14:118-127.
taste tests. 14:203.
technique using concentrate. 14:194-203.

Sugars. total reducing. natural sweet table. 14:199.

iodometric determination. review. 14:115.

Sultanas. raisin dipping treatments. 14:230-234.

T
Table grapes. DBTNCE and NaHSO₃. 14:105-113.
sawdust handling. 14:94-104.

Table wines. natural sweet. 14:194-203.
white. review. 14:235.

Tannin. in clarification. 14:137.

natural sweet table. 14:200.
ultraviolet light use. 14:181.
virus infection in Ruby Cabernet. 14:168.
correction tables. review. 14:238.

U
Ultrasonic treatment. quick aging. 14:23-34.
wine analysis. 14:30-33.

V
Vein banding. in Ruby Cabernet. 14:164-169.
Virus infection. in Ruby Cabernet. 14:164-169.
Viticulture. general authoritative text. review. 14:52.
Vitis vinifera. temperature change influence. review. 14:237.

W
Waste disposal. in Central valley. 14:78.
Wine. authenticity establishment. review. 14:176.

Y
flor and sherry. review. 14:114.
in bottle-fermented champagne. 14:37-42.
influence on physiology of. review. 14:237.
nitrogen nutrition. review. 14:53.
sedimentation studies. review. 14:54.

Z
Zinc. deficiency correction. 14:223-229.
Zinfandel. leaf to fruit ratio. 14:1-11.
Zn-EDTA. (see disodium zinc ethylenediamine tetraacetate dihydrate)
