INDEX FOR VOLUME 16

AUTHOR INDEX

A

Amerine, M. A., E. B. Roessler, and **C. S. Ough.** *Acids and the Acid Taste. I. The Effect of pH and Titratable Acidity.* **16:**29-37.

————, see G. A. Baker. **16:**21-28

————, see C. S. Ough. **16:**185-193.

B

Baker, G. A., M. A. Amerine, and **E. B. Roessler.** *Characteristics of Sequential Measurements on Grape Juice and Musts.* **16:**21-28.

Berg, H. W., see R. J. Coffelt. **16:**14-20. **16:**177-128.

————, see W. L. Fuller. **16:**212-218.

————, see B. F. Pilone. **16:**195-211.

————, see R. H. Moretti. **16:**69-78.

Bowen, J. F., D. V. Fisher, and **D. R. MacGregor.** *Grape and Wine Production in British Columbia.* **16:**241-244.

C

Caputi, A., Jr., and **R. G. Peterson.** *The Browning Problem of Wines.* **16:**9-13.

Coffelt, R. J., H. W. Berg, P. Frei, and **E. A. Rossi, Jr.** *Sugar Extraction from Grape Pomace with a 3-Stage Countercurrent System.* **16:**14-20.

———— and **H. W. Berg.** *Color Extraction by Heating Whole Grapes.* **16:**117-128.

Combs, R. E., see R. E. Kunkee. **16:**219-223.

Crowell, E. A., see J. F. Guymon. **16:**85-91.

F

Ferrari, N. L., see L. A. Lider. **16:**42-48.

Fisher, D. V., see J. F. Bowen. **16:**241-244.

Frei, P., see R. J. Coffelt. **16:**14-20.

Fuller, W. L., and **H. W. Berg.** *Treatment of White Wine with Nylon 66.* **16:** 212-218.

G

Galetto, W., see A. D. Webb. **16:**79-84.

Guymon, J. F., and **E. A. Crowell.** *The Formation of Acetoin and Diacetyl during Fermentation and the Levels Found in Wines.* **16:**85-91.

K

Kissler, J. J., see L. A. Lider. **16:**42-48.

Kliewer, M. W. *Changes in Concentration of Glucose, Fructose, and Total Soluble Solids in the Flower and Berries of Vitis vinifera.* **16:**101-110.

Changes in the Concentration of Malates, Tartrates, and Total Free Acids in Flowers and Berries of Vitis vinifera. **16:**92-100.

The Sugars of Grapevines II. Identification and Seasonal Changes in the Concentration of Several Trace Sugars in Vitis vinifera. **16:**168-178.

Kunkee, R. E., G. L. Pilone, and **R. E. Combs.** *The Occurence of Malolactic Fermentation in Southern California Wines.* **16:**219-223.

————, see G. J. Pilone. **16:**224-230.

L

Lider, J. V. *Some Responses of Grapevines to Treatment for Frost in Napa Valley.* **16:**231-236.

Lider, L. A., N. L. Ferrari, and **J. J. Kissler.** *Effects of Several Nematode-Resistant Rootstocks on Vine Vigor, Crop Level, and Nutrition with the Grape Variety, Grenache.* **16:**42-48.

Lynn, C. D. *Two-Wire Horizontal Trellis for Thompson Seedless Raisin Production.* **16:**237-240.

M

MacGregor, D. R., see J. F. Bowen. **16:**241-244.

Marsh, G. L., see L. Matalas. **16:**129 135. **16:**136-143.

Matalas, L., G. L. **Marsh,** and **C. S. Ough.** *The Use of Reconstituted Grape Concentrate for Dry Table Wine Production.* **16**:136-143.
The Effect of Concentration Conditions and Storage Temperatures on Grape Juice Concentrate. **16**:129-135.
Moretti, R. H., and **H. W. Berg.** *Variability Among Wines to Protein Clouding.* **16**:69-78.

O

Ough, C. S., and **M. A. Amerine.** *Studies with Controlled Fermentation IX. Bentonite Treatment of Grape Juice Prior to Wine Fermentation.* **16**:185-194.
————, see M. A. Amerine. **16**:29-37.
————, see L. Matalas. **16**:136-143. **16**: 129-135.

P

Peterson, R. G. see A. Caputi, Jr. **16**:9-13.
Pilone, B. F., and **H. W. Berg.** *Some Factors Affecting Tartrate Stability in Wine.* **16**:195-211.
Pilone, G. J., and **R. E. Kunkee.** *Sensory Characterization of Wines Fermented with Several Malo-Lactic Strains of Bacteria.* **16**:224-230.
————, see R. E. Kunkee. **16**:219-223.
Powers, J. J., see D. Somaatmadja. **16**: 54-61.

R

Radler, F. *The Effect of Temperature on the Ripening of Sultana Grapes.* **16**:38-41.
The Main Constituents of the Surface Waxes of Several Varieties and Species of the Genus Vitis. **16**:159-167.
Rice A. C. *The Malo-Lactic Fermentation in New York State Wines.* **16**:62-68.
Roessler, E. B., see M. A. Amerine. **16**:29-37.
————, see G. A. Baker. **16**:21-28.
Rossi, E. A., Jr., see R. J. Coffelt. **16**:14-20.
Rossi, J. A., Jr., see V. L. Singleton. **16**:144-158.

S

Somaatmadja, D., J. J. Powers, and **Rebecca Wheeler.** *Action of Leucoanthocyanins of Cabernet Sauvignon Grapes on Reproduction and Respiration of Certain Bacteria.* **16**:54-61.
Singleton, V. L., and **J. A. Rossi, Jr.** *Colorimetry of Total Phenolics with Phosphomolybdicphosphotungstic Acid Reagents.* **16**:144-158.

T

Thoukis, G., M. Ueda, and **D. Wright.** *The Formation of Succinic Acid during Alcoholic Fermentation.* **16**:1-8.

U

Ueda, M., see G. Thoukis. **16**:1-8.

W

Webb, A. D., and **W. Galetto.** *Analyses of Some California Wine Vinegars: Volatile Acidities, Tartrates, and Absorbances at 280 Millimicrons.* **16**:79-84.
Wheeler, R., see D. Somaatmadja. **16**:54-61.
Wright, D., see G. Thoukis. **16**:1-8.

SUBJECT INDEX

A

Absorbance, in red wine vinegar. **16**:79-83.

Acetoin, formation during fermentation. **16**:85-89.
level in wine. **16**:87-90.
in Southern California wines. **16**:220-222.

Acetylmethylcarbinol. (see **Acetoin**).

Acid, amino. free in sparing wines. *review.* **16**:246.
lactic. formation during fermentation. **16**:7.
organisms in malo-lactic fermentation. **16**:65-67. **16**:224-226.
malic. determination of with tartaric and lactic in must and wine. *review.* **16**:50.
seasonal concentration changes in *Vitis vinifera.* **16**:92-99.
oleanolic. in surface wax of Vitis. **16**:160-166.
p-Coumarylquinic. detection of. *review.* **16**:248.
succinic. formation during fermentation. **16**:1-7.
identification of. **16**:4-6.
isolation of. **16**:5.
influence of yeast strain on. **16**:4-7.
sulfurous. effect with yeasts in fermentation. *review.* **16**:51.
-sugar ratio in Thompson seedless grapes in Australia. **16**:41.
tartaric. seasonal concentration changes in *Vitis vinifera.* **16**:92-99.
taste. (see **Taste testing**). effect of pH and titratable acidity on. **16**:29-36.
titratable total. seasonal changes in *Vitis vinifera.*. **16**:92-99.
volatile, in red wine vinegar. **16**:79-83.

Aging. heat treated grapes. **16**:121-128.

Alcohol, beverages. use of in France. *review.* **16**:245.
and sugar, in France. *abstract.* **16**:245.
in rural areas of France. *abstract.* **16**:245..

Alcoholism. from vermouth. *abstract.* **16**:245.

Antitranspirants. trial in Australia. *review.* **16**:179.

B

Bacteria. effect of leucoanthocyanins on. **16**:55-60.
in malo-lactic fermentation. varieties. **16**:224-226.
taste tests. **16**:227-229.

Bentonite. and protein clouding. **16**:77.
treatment, pre-. in controlled fermentation. **16**:185-194.

British Columbia. grapes and wine of. **16**:241-244.

Browning, in wines. (see **Protein,** clouding).
on French colombards. **16**:10-13.
on Palominos. **16**:10-13.
powered Nylon as fining agent. **16**:10-13.
PVP as fining agent. **16**:10-13.
treatment with Nylon 66. **16**:212-218.

C

Cabernet sauvignon. and leucoanthocyanins. **16**:54-59.
and frost damage treatment. **16**:234.

Carbon. compared with Nylon 66 in browning treatment. **16**:214-215.

Casine. compared with Nylon 66 in browning treatment. **16**:214-215.

Chromotograph, gas-liquid. in studies of surface wax of Vitis. **16**:159-166.
paper, and malo-lactic fermentation on *Vitis labrusca.* **16**:63-65.
in succinic acid determination. **16**:4-7.
in trace sugar concentration studies. **16**:169-177.
radio. in succinic acid determinations. **16**:5-7.
thin-layer. in studies of surface wax of Vitis. **16**:159-160.

CO_2. assimilation rates and light. *abstract.* **16**:49.

Color, wine. changes and heated grapes. **16**:123.

density and heated grapes. **16**:118-122.
extracting by heating grapes. **16**:117-128.
juice. change in concentrate. **16**:129-135.
Concentrate, grape juice. (see **Grape** juice).
Corks. polyethylene stoppers. *review.* **16**:52.
Countercurrent, 3 stage system in sugar extraction. **16**:11-20.
efficiency of. **16**:18-20.
compared with mixing method. **16**:17.
Crop level. nematode resistant rootstock effect. **16**:42-46.

D

Dão. wine region. *review.* **16**:247.
DEPC. (see **Diethylpyrocarbonate**).
Diacetyl. formation during fermentation. **16**:85-89.
level in wines. **16**:87-90.
in Southern California wines. **16**:220-222.
Diethylpyrocarbonate. problems in use of. *abstract.* **16**:114.

E

Europe, wines of. *review.* **16**:245.

F

Fermentation, controlled, pretreatment with bentonite. **16**:185-194.
malo-lactic induced. **16**:224-229.
natural. in Southern California. **16**:219-223.
in *Vitis labrusca.* **16**:62-67.
Fining agents. powdered Nylon. **16**:10-13.
PVP. **16**:10-13.
Folin - Denis procedure. improvement. **16**:144-157.
Folin - Ciocalteu reagent. use. **16**:147-157.
Folle blanche. frost damage treatment. **16**:233-234.
French colombard, grapes. browning. **16**:10-13.
Frost, damage. vine and fruit response to treatment. **16**:231-235.
vine protection. France. *review.* **16**:183.
Fructose. (see **Sugar,** fructose).
Fusel oil. analyses. *abstract.* **16**:112.

G

Grape, berry. splitting, histological study. *review.* **16**:247.
weight relations study. *review.* **16**:181.
juice, concentrate. chemical composition of. **16**:131.
color change in. **16**:129-135.
effect of concentrationg conditions on. **16**:129-135.
effect of storage temperatures on. **16**:129-135.
reconstituted concentrate, and dry table wine. **16**:136-143.
chemical composition of. **16**:138.
protein stability. **16**:139.
taste tests. **16**:139-143.
maturity. field testing methods. **16**:21-28.
measurements. characteristics of. **16**:21-28.
quality factors, general. *review.* **16**:179.
table. culture in Greece. *review.* **16**:180.
quality factors, Israel. *review.* **16**:180.
Rumania. *review.* **16**:181.
temperature effect on Thompson seedless in Australia. **16**:39.
vine, and frost damage treatment. **16**:231-235.
nutrition and yield. rootstock effect. **16**:42-46.
Grapes. suitable for British Columbia. **16**:242.
and wine. history in France since 1800. **16**:115.
Grenache. and nematode resistant rootstocks compared. **16**:42-46.
Glucose. (see **Sugar,** glucose).

H

Heat treatment. and aging. **16**:121-128.
for color extraction. **16**:117-128.

and grape concentrate. **16**:130-135.
and taste testing. **16**:124.

I

Ion exchange. in tartrate stability. **16**:196-210.

J

Juice, grape. (see **Grape,** juice). measurement characteristics by various determination methods. **16**:21-28.

L

Lactic acid. (see **Acid,** lactic).
Laws, food. in France. *abstract.* **16**:184.
Leucoanthocyanins. action on bacteria. **16**:55-59.
in cabernet grapes. **16**:54-59.
effect on pH and oxygen uptake. **16**:58-60.
isolation of. **16**:54-55.

M

Malates. (see **Acid,** malic).
Maleic hydrazide. rootstock studies, Grenache. **16**:46.
Malo-lactic fermentation. and cellar practice. **16**:65.
induced. bacteria used. **16**:224-226.
taste tests. **16**:224-229.
wines used. **16**:224.
natural. in Southern California wines. **16**:219-223.
pH and total acidity. **16**:66.
in *Vitis labrusca.* **16**:62-67.
Must. measurement characteristic by various determination methods. **16**:21-28.

N

Nematode, resistant rootstock. effect on Grenache vigor and yield. **16**:42-46.
New Mexico. grapes for. *review.* **16**:111.
New York state. wines and malo-lactic fermentation. **16**:62-67.
Nitrogen need for grapevines. technique for study. *review.* **16**:183.
Non-volatile acid. (see **Acid,** succinic).
Nylon, powered as fining agent. **16**:10-13. **16**:77.
to extract protein. **16**:70.
66. use in tartrate studies. **16**:197.
use in treatment for white wine browning. **16**:212-218.

O

Okanagan valley. description of for wine. **16**:241.
Oxidation-reduction, and aging. German study. **16**:51.

P

Palomino grapes and browning. **16**:10-13.
pH. effect of leucoanthocyanins. **16**:58-60.
effect of acid and on acid taste. **16**:29-36.
in must and grape determinations. **16**:23-26.
and protein clouding. **16**:72-77.
seasonal changes in relation to sugars. **16**:107-109. **16**:175-176.
and tartrate stability. **16**:205-207.
Phenols, in grapes and wines. determination method. **16**:144-157.
Pigment. acacia wood in wine. *review.* **16**:248.
diglucoside determination. *abstract.* **16**:112.
malvidin diglucoside inheritance. *review.* **16**:111.
Pinot blanc, clones. studies. *review.* **16**:111.
Pomace. sugar extraction method. **16**:11-20.
Potassium bitartrate. (see **Tartrate**).
Precipitation, calcium. in wines. *review.* **16**:51.
Prohibition. review of. *review.* **16**:113.
Protein, clouding. analysis by heat-cold test and by heat test. **16**:70-71.
and pH. **16**:72-77.
variability of wines to. **16**:69-78.

R

Radiography. in tract sugar concentration studies. **16**:169-177.
Raffinose. (see **Sugar,** trace).
Raisin, Thompson seedless. on 2 wire trellis. **16**:237-240.
Reconstituted grape concentrate. (see **Grape,** juice).

Refractometer. in must and grape determination. **16**:23-26.
Rootstocks, nematode resistant. effect on Grenache vigor and yield. **16**:42-46.
virus infected. *review.* **16**:115.
Rum, and prohibition. *review.* **16**:112.

S

Saccharomyces cerevisiae. acetoin-diacetyl formation. **16**:87-88.
Sensory analyses. (see **Taste Testing**).
Sherry. acetoin level. **16**:88-90.
diacetyl level. **16**:88-90.
color removal tests. **16**:214.
Southern California wines with natural malo-lactic fermentation. **16**:219-223.
Spectroscopy, infra-red. in succinic acid determination. **16**:6-7.
Stability. (see **Protein,** clouding).
Storage, juice. concentrate and color change. **16**:133.
wine. from reconstituted concentrate. **16**:136-143.
Succinic acid. (see **Acid,** succinic).
Sucrose. (see **Sugar,** trace).
Sugar. content determination in pomace. **16**:15.
extraction from grape pomace. **16**:11-20.
fructose. seasonal concentration changes in *Vitis vinifera.* **16**:101-110.
glucose. seasonal concentration changes in *Vitis vinifera.* **16**:101-110.
reducing, total. seasonal concentration changes in *Vitis vinifera.* **16**:101-110.
trace. seasonal concentration change in *Vitis vinifera.* **16**:168-178.
Sugar-acid ratio. (see **Acid,** sugar).
Sultana. (see **Thompson** seedless).

T

Tannin. (see **Phenols**).
Tartrates. (see **Acid,** tartaric). factors effecting stability. **16**:195-211.
in red wine vinegar. **16**:79-83.
Taste tests. acid taste effected by pH and titratable acidity. **16**:29-36.
bentonite treatment in controlled fermentation. **16**:193.
heat treated grapes. **16**:121-124.
in induced malo-lactic fermentation. **16**:226-229.
of nylon treated wines. **16**:213.
wine from reconstituted concentrate. **16**:139-143.
Temperature. effect on ripening of Thompson seedless in Australia. **16**:38-41.
Thompson seedless. ripening as effected by temperature in Australia. **16**:38-41.
raisins on 2 wire trellis. **16**:237-240.
weather and yield. Australia. *abstract.* **16**:114.
Titratable acidity. effect of acid and on acid taste. **16**:29-36.
in must and grape determinations. **16**:23-36.
Trace sugar. (see **Sugar,** trace).
Trellis. 2 wire and raisin production. **16**:237-240.

V

Vine, grape. and frost damage treatment. **16**:231-235.
Vinegar, wine. California. analysis of. **16**:79-83.
Orleans process. analysis. **16**:80.
submerged culture. finished. **16**:81.
unfinished. **16**:82.
Vineyards. non-cultivation of in France. **16**:246.
Viticulture. in Russia. 1964 review. *review.* **16**:182.
Vitis labrusca. and malo-lactic fermentation. **16**:62-67.
Vitis, species differences in surface waxes. **16**:159-166.
Vitis vinifera. glucose, fructose, solids changes during maturation. **16**:101-110.
malate, tartrate acid changes during maturation. **16**:92-99.
trace sugar chauges. **16**:168-178.

W

Waxes, surface. differences in different Vitis species. **16**:159-166.
Wine. amino acid and vitamin content.

French. *review.* **16**:182.
analysis. legal aspect. *review.* **16**:113.
in British Columbia. composition of. **16**:243.
density extract methods. *abstract.* **16**:246.
dry. in controlled fermentation bentonite pretreatment. **16**:186-192.
effect on rats. *review.* **16**:52.
encylopedia. *review.* **16**:49.
and good life. *review.* **16**:116.
malo-lactic fermentation in *Vitis labrusca.* **16**:62-67.
modern review. *review.* **16**:49.
port. color, aging and heat treated grapes. **16**:117-128.
protein clouding studies. **16**:69-78.
Southern California with malo-lactic fermentation. **16**:219-223.
sparkling. summary. *review.* **16**:50.
technology. *review.* **16**:113.
yeast fat production. *review.* **16**:247.
species and animal health. *review.* **16**:52.
sweet. density of. *abstract.* **16**:246.
natural in controlled fermentation pretreatment. **16**:188-191.
table. color, aging and heat treated grapes. **16**:117-128.
from reconstituted grape concentrate. **16**:136-143.
protein stability. **16**:139.
taste tests. **16**:139-143.
tartrate stability. **16**:196-210.
used in malo-lactic fermentation tests. **16**:224.
vine study at University of Bordeaux, summary. *review.* **16**:182.
Wine vinegar. (see **Vinegar**).
White riesling and frost damage treatment. **16**:233.

Y

Yeast. bakers. aeration effect. *abstract.* **16**:247.
in controlled fermentation bentonite pretreatment. **16**:185.
strain influence on non-volatile acidity. **16**:4-7.
