Yang, H. Y., see R. E. Orser. 17: 106-111.
SUBJECT INDEX

A

Acetoin and diacetyl in Australian wines. abstract. 17:228.
Acid. amino, identity and concentration in Thompson leaves. 17:48-56.
identity and concentration changes in various Vitis leaves. 17:112-116.
in botryized wine. 17:198-199.
L-malic decomposition by lactic acid bacteria. abstracts. 17:161.
microbiological reduction of in wine. abstracts. 17:310.
organic, concentration changes in Thompson leaves. 17:48-56.
enzymatic analysis methods. 17:218-224.
2-ketoglutaric, in wines. 17:222-224.
malic, in wine 17:222.
pyruvic, in wine. 17:221.
tartaric, decomposition in wine. 17:185-190.
total, a new indicator. 17:174-177.
Alcohol. effect on man. review. 17:162.
ethyl. effect on fermentation rate. 17:74-81.
final % relative to fermentation temperature, pH and °Brix. 17:22.
17:75.
rate in passion fruit and mango wines. 17:29.
Amino acids. (see Acid).
Ammonia. effect on fermentation rate. 17:163-172.
Russia. review. 17:227.
Analysis data, wine and taste test correlations. 17:255-264.
determination of in wine. methods. abstract. 17:308.
Argentina. wine industry of. technical journal. review. 17:63.
linalool in muscat. 17:249-253.
B

Bacteria. lactic acid, tartaric acid decomposing. 17:185-190.
(see Microorganisms).
Berry, grape. detachment force and weight. abstract. 17:227.
set, and size as effected by leaf number and other factors. Australia. abstract. 17:65.
wine grape and density separations. 17:95-104.
and total phenolic content. 17:126-133.
and seed phenolic content. 17:206-216.
Blackberry wine. (see Wine, blackberry).
Bleaching control. (see (Dibromotetrachloroethene, and Sulfur dioxide).
Botrytis cinerea Pers. in Napa valley. 17:89-94.
in stored and export grapes. 17:135-147.
Brix. initial, effect on fermentation rate. 17:20-25. 17:165-172.
of juice and of sucrose solution in density-separated grapes. 17:96-104.
relation to non-sugar solids. 17:32-36.
enzymatic and non-enzymatic. 17:235-239.
and phenols. 17:231-239.
C

Calcium. determination in wine. 17:203-205.
Catechin fractions and browning. 17:234-239. 
and taste. 17:243-246.

Chromatography. gas. blackberry wine volatile products analysis. 17:106-111. 
muscat aroma. 17:247-254. 
paper. anthocyanin/color reaction. 17:179. 
and phenolic compounds of grapes. 17:206-216. 
residual sugar estimation. 17:265-266.

Color. objective measurement and specification in red wine. 17:118-125. 

Corks. relative effect on wine of plastic and cork stoppers. abstract. 17:162.

D

DBTCE. (see Dibromotetrachloroethane).
Decay control. (see Dibromotetrachloroethane, and Sulfur dioxide). 
Density separation of grape berries. 17:95-104. 
Diacetyl and acetoin in Australian wine. abstract. 17:228.
Dibromotetrachloroethane. decay and bleaching control in export wines. 17:148-160. 
release rate factors. 17:135-147.
D(-) lactic acid. (see Acid).

E

Emperor grapes and DBTCE. 17:135-147. 
17:148-160.
Enology. toward training standardization in Europe. abstract. 17:162.
and non-enzymatic browning. 17:235-239. 
organic acids in wine. 17:218-224. 

F

Fermentation rate. composition changes and prediction. 17:163-172. 
studies of in grape juice. effect of initial °Brix, pH and temperature. 17:20-25. 
effect of ethyl alcohol, pH and temperature. 17:74-81. 

Filtration. of wines. practical. 17:277-282.
Fining. and phenol fractions. 17:243-246.

Flame photometric procedure. calcium determination. 17:203-205.

Fructose. (see Sugar).

G

spray and thinning. 17:283-289.
Glucose. (see Sugar).
Grapes. quality improvement. Russia. abstract. 17:228. 
stored. DBTCE release rate factors. 17:135-147. 
sulfur dioxide 2-stage generation. 17:290-301.

Growth. rate of fruit, and water in plant. Australia. abstract. 17:64.

I

Ion exchange resins. (see Resins).
Infrared spectrophotometer. muscat aroma. 17:247-254. 
in sherry acetol study. 17:11-17.

L

L(+)- lactic acids. (see Acid).
Lactobacilli. in tartaric acid decomposition. 17:185-190.
Leaves. grape. surface assimilation and training. abstracts. 17:229.
Leucoanthocyanin fraction and browning. 17:236-239. 
and fining. 17:245-246. 
an dtaste. 17:243-246.

Linalool. in muscat varieties. 17:249-253.
INDEX FOR VOLUME 17—316

M
Malate. (see Acid, organic).
wine taste tests. 17:28.
Maturation and phenolic content. 17:126-133, 17:206-216.
Microorganisms. chemical effect on must and wine. 17:41-46.
effect on must and wine. 17:38-47.
taste tests of effect on wine. 17:42-43.
and Thompson seedless must and wine. 17:39-47.
Mildew. in Napa valley grapes. 17:89-94.
Mold. and harvest time. 17:88.
and Napa valley grapes. 17:87-94.
(see Microorganisms).
Muscat. various varieties, volatile aromas. 17:247-254.

N
Napa valley grape-mold complex. 17:87-94.
infrared spectrum of. 17:7-8.
synthesis of. 17:3.
Nitrogen. compounds in wine. abstract. 17:227.
total. effect on fermentation rate. 17:163-172.
Non-sugar solids. (see Solids).
infrared spectrum of. 17:5-6.
synthesis of. 17:3.

O
Organic acid. (see Acid, organic).
Oxygen absorption and phenols. 17:231-239.

P
wine taste tests. 17:28.

of grape berry juice of density separated grapes. 17:101.
Phenols. aged distilled liquors. abstract. 17:228.
in grape seeds. 17:210-214.
and browning. 17:231-239.
and fining. 17:243-246.
and oxygen absorption. 17:231-239.
and taste tests. 17:240-246.
in tissues of grapes. 17:206-216.
total content in grape berry. 17:126-133.
various grape varieties. 17:208-216.
Pichia membranefaciens. (see Yeast).

R
Reducing sugars. (see Sugars).
Resin. synthetic ion-exchange. bibliography of literature. 17:274-276.
chemical properties. 17:269-272.
physical properties. 17:268-269.
in wine research. 17:268-276.
Rota. in winemaking. (see Microorganisms).

S
Saccharomyces species. in lactic acid studies. 17:303.
(see also, Yeast).
Seeds, grape. germination of. abstract. 17:227.
phenolic compounds in. 17:210-214.
and browning. 17:231-239.
and fining. 17:243-246.
and taste. 17:240-246.
Sensory analyses. (see Taste testing).
Sherry wine, submerged culture. acetals in extract of. 17:11-18.
gas chromatography use in studies of. 17:2-14.
infrared spectrophotometer use in studies of. 17:2-17.
N-(2-phenethyl) acetamide and N-iso-
Solids, non-sugar, in calculating net reducing sugar. 17:35-36.
in various grape varieties. 17:31-37.
Sucrose. (see Sugar).
Sugar. fructose, seasonal concentration change in Thompson leaves. 17:48-56.
glucose, seasonal concentration change in Thompson leaves. 17:48-56.
reducing, seasonal concentration change in Thompson leaves. 17:48-50.
sucrose, seasonal concentration change in Thompson leaves. 17:48-56.
solutions and grape berry density separation. 17:96-104.
Sulfur dioxide. decay control. 2 stage generation. 17:290-301.
iodometric determination. abstract. 17:230.
tolerance of yeast to in dry semillon wine. 17:83.
Sultana. (see Thompson seedless).
Synthetic ion-exchange resins. (see Resins).

T
Tannin fractions and browning. 17:236-237.
and fining. 17:245-246.
and taste. 17:243-246.
Tartrate. (see Acid, organic).
Taste testing, and analytical data correlations. 17:255-264.
botrytized wines. 17:201.
effect of microorganisms on wine. 17:42-43.
mango wine. 17:28.
passion fruit wine. 17:28.
phenol fractions. 17:240-246.
Temperature. effect on winemaking, review. 17:309.
and DBTCE. 17:135-147.
cropping levels. Australia. abstract. 17:64.
gibberellin and thinning. 17:383-389.
leaves, concentration changes of organic and amino acids. 17:48-56.
must and wine, microorganisms effect on. 17:39-47.
water stress and fruitfulness. Australia. abstract. 17:64.

V
Vineyard, of Roussillon, review. 17:226.
Vitis, amino acids, identity and concentration changes in leaves of several species. 17:112-116.
vinifera, in decay control studies. 17:290-299.
muscat aroma studies. 17:247-254.
per cent planted in France, abstract. 17:65.
social history, review. 17:63.
Volatile aroma. (see Aroma).

W
Wine. blackberry, volatile products analysis. 17:106-111.
dictionary of. review. 17:162.
drinking an opinion, review. 17:308.
dry red, taste and analytical data correlations. 17:255-264.
dry white, taste and analytical data correlations. 17:255-264.
filtration, practical. 17:277-282.
German, general information. review. 17:63.
grape berries and density separations. 17:95-104.
history of. France. review. 17:225.
of commerce. France. review. 17:225.

phenols and browning. 17:231-239.
red, objective color measurement and specification. 17:138-125.
sweet, a production technique. abstract. 17:66.
synthetic resins. 17:266-276.
yeast and off-flavor in dry white. 17:82-85.

Winemaking. home. practical guides. review. 17:308.
in France. practical. review. 17:309.

Y

effect of pH on. 17:24. 17:79.
Pichia membranaefaciens. and off-flavor in table wine. 17:82-85.
Saccharomyces species in blackberry wine fermentation. 17:106-111.
sulfur dioxide tolerance in dry semillon wine. 17:83.
sulfur metabolism. abstract. 17:66.
