

# INDEX FOR VOLUME 19

## AUTHOR INDEX

### A

- Akiyoshi, M., see H. W. Berg. 19:208-212.  
Amerine, M. A., and C. S. Ough. *Fermentation of Grapes Held Under Anaerobic conditions. I. Red Grapes.* 19:139-146.

### B

- Balakian, S., and H. W. Berg. *The Role of Polyphenols in the Behavior of Potassium Bitartrate in Red Wines.* 19:91-100.  
Baranek, P. P., see J. A. Cook. 19:17-26.  
Belscher, R. S., see A. C. Rice. 19:1-5.  
Berg, H. W., R. J. Coffelt and G. M. Cooke. *Countercurrent Sugar Extraction from Grape Pomace on a Commercial Scale.* 19:108-115.  
Berg, H. W., R. T. De Soto, and M. Akiyoshi. *The Effect of Refrigeration, Bentonite Clarification and Ion Exchange on Potassium Behavior in Wines.* 19:208-212.  
———, see S. Balakian. 19:91-100.  
Bertino, J. J., see J. P. Van Buren. 19:147-154.  
Boyle, F. P., see D. W. De Jong. 19:228-237.  
Brown, T., see A. Caputi, Jr. 19:160-165.

### C

- Cabezudo, M. D., C. Llanguno, and J. M. Garrido. *Accelerated Aging of Fino Wines by Submerged Culture Using Film-Forming Yeasts.* 19:63-69.  
Caputi, A. Jr., M. Ueda, and T. Brown. *Spectrophotometric Determination of Ethanol in Wine.* 19:160-165.  
———, see E. N. Christensen. 19:155-159. 19:238-245.  
Chaudhary, S. S., A. D. Webb, and R. E. Kepner. *GLC Investigation of the Volatile Compounds in Extracts from Sauvignon Blanc Wines from Normal and Botrytised Grapes.* 19: 6-12.

- Christensen, E. N., and A. Caputi, Jr. *Determination of Fusel Oils in Neutral Grape Spirits by Temperature Programmed Gas Chromatography.* 19:155-159.  
———, and A. Caputi, Jr. *The Quantitative Analysis of Flavanoids and Related Compounds in Wine by Gas Liquid Chromatography.* 19:238-245.  
Christensen, L. P., see J. A. Cook. 19:17-26.  
Coffelt, R. J., see H. W. Berg. 19:108-115.  
Cook, J. A., P. P. Baranek, L. P. Christensen, and H. J. Malstrom. *Vineyard Response to Phosphate-Zinc Foliar Sprays.* 19:17-26.  
———, see C. S. Ough. 19:213-227. 19:254-265.  
Cooke, G. M., see H. W. Berg. 19:108-115.  
Costa, E. N. *A Simple Analog Computer for Blending Calculations.* 19:84-90.

### D

- Dass, H. C., and G. S. Randhawa. *Effect of Gibberellin on 'Golden Queen' Grapes, a Vinifera-Labrusca Hybrid.* 19:52-55.  
———, ———. *Response of Certain Seeded Vitis Vinifera Varieties to Gibberellin Application at Postbloom Stage.* 19:56-62.

- De Soto, R. T., and R. Huber. *The Effect of Tannic Acid on the Secondary Fermentation of Champagne.* 19:246-253.  
———, see H. W. Berg. 10:208-212.  
Dono, J. M., see J. L. Owades. 19:47-51.

### F

- Ferguson, J. W., see A. C. Rice. 19:1-5.

### G

- Garrido, J. M., see M. D. Cabezudo. 19:63-69.

- Gentry, J. P., and K. E. Nelson.** *Further Studies on Control of Decay of Table Grapes by Two-Stage Generation of Sulfur Dioxide within Unvented Containers.* 19:70-81.
- Grncarevic, M., F. Radler, and J. V. Possingham.** *The Dipping Effect Causing Increased Drying of Grapes Demonstrated with an Artificial Cuticle.* 19:27-29.
- H**
- Huber, R.,** see R. T. De Soto. 19:246-253.
- K**
- Kasimatis, A. N., R. J. Weaver, and R. M. Pool.** *Effects of 2,4-D and 2,4-DB on the Vegetative Development of 'Tokay' Grapevines.* 19:194-204.
- Kepner, R. E., A. D. Webb, and L. Maggiora.** *Sherry Aroma. VII. Some Volatile Components of Flor Sherry of Spanish Origin. Acidic Compounds:* 19:116-120.
- , see S. S. Chaudhary. 19:6-12.
- King, A. D. Jr.,** see D. W. De Jong. 19:228-237.
- Kliwer, W. M.** *Changes in the Concentrations of Free Amino Acids in Grape Berries during Maturation.* 19:166-174.
- , and L. A. Lider. *Influence of Cluster Exposure to the Sun on the Composition of Thompson Seedless Fruit.* 19:175-184.
- Kunde, R. M., L. A. Lider, and R. V. Schmitt.** *A Test of Vitis Resistance to Xiphinema Index.* 19:30-36.
- L**
- Lider, L. A.,** see W. M. Kliwer. 19:175-184.
- , see R. M. Kunde. 19:30-36.
- , see C. S. Ough. 19:213-227. 19:254-265.
- Llanguno, C.,** see M. D. Cabezudo. 19:63-69.
- M**
- Maggiora, L.,** see R. E. Kepner. 19:116-120.
- Malstrom, H. L.,** see J. A. Cook. 19:17-26.
- Mosesian, R. M. and K. E. Nelson.** *Effect on 'Thompson Seedless' Fruit of Gibberellic Acid Bloom Sprays and Double Girdling.* 19:37-45.
- Moyer, J. C.** *Washing Grapes before Mechanical Harvesting.* 19:266-272.
- N**
- Nelson, K. E.,** see J. P. Gentry. 19:70-81
- , see R. M. Mosesian. 19:37-45.
- O**
- Ofria, H. V.,** see P. F. Rosell. 19:13-16.
- Ough, C. S., and V. L. Singleton.** *Wine Quality Prediction from Brix/Acid Ratio and Associated Compositional Changes for 'White Riesling' and 'Cabernet-Sauvignon'.* 19:129-138.....
- , L. A. Lider, and J. A. Cook. *Rootstock-scion Interactions Concerning Wine Making. I. Juice Composition Changes and Effects on Fermentation Rate with St. George and 99-R Rootstocks at two Nitrogen Fertilizer Levels.* 19:213-227.
- , J. A. Cook, and L. A. Lider. *Rootstock-scion Interactions Concerning Wine Making. II. Wine composition and Sensory Changes Attributed to Rootstock and Fertilizer Level Differences.* 19:254-265.
- , see M. A. Amerine. 19:139-146.
- Owades, J. L., and J. M. Dono.** *Determination of Volatile Acids in Wine by Microdiffusion.* 19:47-51.
- P**
- Palleroni, N. J.,** see P. F. Rosell. 19:13-16.
- Possingham, J. V.,** see M. Grncarevic. 19:27-29.
- Pool, R. M.,** see A. N. Kasimatis. 19:194-204.
- , see R. J. Weaver. 19:121-124. 19:185-193.
- R**
- Radler, F.,** see M. Grncarevic. 19:27-29.

**Randhawa, G. S.**, see H. C. Dass. 19:52-55. 19:56-62.

**Rice, A. C.** *Effects of Certain p-Hydroxybenzoic Acid Esters in Two American Wines.* 19:101-107.

———, **J. W. Ferguson**, and **R. S. Belscher.** *Residual Sugars in New York State Wines.* 19:1-5.

**Robinson, W. B.**, see J. P. Van Buren. 19:147-154.

**Rosell, P. F.**, **H. V. Ofria**, and **N. J. Palleroni.** *Production of Acetic Acid from Ethanol by Wine Yeasts.* 19:13-16.

## S

**Singleton, V. L.**, see C. S. Ough. 19:129-138.

**Schmitt, R. V.**, see R. M. Kunde. 19:30-36.

## U

**Ueda, M.**, see A. Caputi, Jr. 19:160-165.

## V

**Van Buren, J. P.**, **J. J. Bertino**, and **W. B. Robinson.** *The Stability of Wine Anthocyanins on Exposure to Heat and Light.* 19:147-154.

## W

**Weaver, R. J.**, and **R. M. Pool.** *Effect of Various Levels of Cropping on Vitis Vinifera Grapevines.* 19:185-193.

———, and ———. *Induction of Berry Abscission in Vitis Vinifera by Morphactins.* 19:121-124.

———, see A. N. Kasimatis. 19:194-204.

**Webb, A. D.**, see S. S. Chaudhary. 19:6-12.

———, see R. E. Kepner. 19:116-120.

**Wick, E.** *Penetration of Yeast by Sugar During Grape Juice Fermentation.* 19:273-281.

## SUBJECT INDEX

## A

- Acid**, acetic, accumulated in wine, yeast strain. **19**:13-16. metabolized by flor yeast. **19**:63-69.  
 amino, free, in grape berries, changes with maturity. **19**:166-174.  
 brix/acid ratio of must, wine quality prediction. **19**:129-138.  
 2,4-D and 2,4-DB spray effect on vines. **19**:194-204.  
 2,3-dihydroxyisovaleric in wine. *abstract*. **19**:284.  
 free, normal and botrytised grapes, in wine from. **19**:6-12.  
 gibberellic, as a post bloom spray. **19**:56-61.  
   bloom spray and girdling. **19**:37-46.  
   effect on 'Golden Queen' grape. **19**:52-55.  
 p-hydroxybenzoic in American wines. **19**:101-107.  
 methyl esters of in Spanish flor sherry. **19**:116-120.  
 morphactins and berry abscission induction. **19**:121-124.  
 phenolic, see **Phenolics**.  
 tartaric, stability in red wines. **19**:91-100.  
   tartrate/malate ratio in sun fruit vs. shade fruit. **19**:177-181.  
 total, and rootstock-scion interactions. **19**:213-226. **19**:254-264.  
   in sun fruit vs. shade fruit. **19**:176.  
 volatile, determination by microdiffusion. **19**:47-51.  
   in botrytised wine. *abstract*. **19**:125.
- Aeration**, musts, method. *review*. **19**:83.
- Aging**, biological, with flor yeast. **19**:63-69.
- Alcohol**, concentration and acetic acid accumulation in yeast. **19**:13-16.  
 determination, rapid. *review*. **19**:205.  
 differentiation of by <sup>14</sup>C content. *review*. **19**:286.  
 higher, formation by yeast. *review*. **19**:127.
- Ampelography**, of Roumania. *review*. **19**:282.  
 table grapes of world. *review*. **19**:125.

- Anthocyanin**, and heat/light stability. **19**:147-154.  
 and tartrate stability in red wines. **19**:91-100.  
 in grapes of Anjou. *review*. **19**:125.

## B

- Balling**, degree, and gibberellic acid bloom spray and girdling. **19**:37-46.
- Berry**, abscission, induced by morphactins. **19**:121-124.  
 amino acid concentration change with maturity. **19**:166-174.
- Blending**, use of computer in. **19**:84-90.
- Botrytis cinerea**, enzymes added to white table wine. **19**:228-236.  
 on 'Sauvignan blanc' grapes, wine and volatile compounds. **19**:6-12.
- Brandy**, chemistry of production of, Russian. *review*. **19**:285.

## C

- Champagne**, biochemical study of, Russian. *review*. **19**:285.  
 tannin level and secondary fermentation. **19**:246-252.  
 wine, land, people. *review*. **19**:82.
- Chromatography**, gas, determination of fusel oils in neutral spirits. **19**:155-158.  
 methyl esters of acids in Spanish flor sherry. **19**:116-120.  
 quantitative determination of flavanoids. **19**:238-244.  
 volatile compounds in 'Sauvignan blanc' wines. **19**:6-12.  
 paper, residual sugars in New York State wines. **19**:1-4.
- Color**, anthocyanin pigments and heat/light stability. **19**:147-154.  
 effect of grape maturity on wine. **19**:129-138.  
 effect of p-hydroxybenzoic acid on. **19**:101-107.
- Computer**, analog, use in blending **19**:84-90.
- Cropping**, level, effects of. **19**:185-193.
- Cuticle**, grape, and dipping effect. **19**:27-29.

## D

- Decay**, in table grapes, control by SO<sub>2</sub>. 19:70-81.
- 2,4-Dichlorophenoxyacetic acid**, effect on 'Tokay' vines. 19:194-204.
- 2,4-Dichlorophenoxybutyric acid**, effect on 'Tokay' vines. 19:194-204.
- Dipping** effect, demonstrated artificially. 19:27-29.

## E

- Enology**, recent advances, Italian. *review*. 19:126.
- Esters**, in Spanish flor sherry. 19:116-120.  
methyl, normal and botrytised grapes, in wine from. 19:6-12.  
of p-hydroxybenzoic acid in two American wines. 19:101-107.
- Ethanol**, in wine determined spectrophotometrically. 19:160-165.

## F

- Fermentation**, malo-lactic detailed *review*. 19:205.  
rate and rootstock-scion interaction. 19:213-226.  
red grapes held under anaerobic conditions. 19:139-145.  
secondary, champagne, tannin level. 19:246-252.
- Fertilizer**, nitrogen level and rootstock-scion interaction. 19:213-226. 19:254-264.
- Fining**, bentonite and potassium bitartrate behavior. 19:208-212.
- Flavanoids**, see also **Phenolics**.  
quantitative determination of by gas chromatography. 19:238-244.
- Fusel oil**, in neutral spirits determined by gas chromatography. 19:155-158.

## G

- Grapes**, see also **Vitis**  
changes in amino acid concentrations with maturity. 19:166-174.  
climate effect on growth and quality, Russian. *review*. 19:282.  
cropping level, effects of. 19:185-193.  
cuticle and dipping effect. 19:27-29.

- fermentation of and sugar consumption by yeast. 19:273-281.  
goals of industry in Russia. *review*. 19:283.  
'Golden Queen' and gibberellic acid effect. 19:52-55.  
juice composition and rootstock-scion interaction. 19:213-226.  
maturity and wine quality prediction from brix/acid ratio. 19:129-138.  
pomace, see **Pomace**.  
red, held under anaerobic conditions. 19:139-145.  
riboflavin in. *review*. 19:205.  
rootstock-scion interactions effect. 19:213-226. 19:254-264.  
sampling stabilization for analysis. *review*. 19:283.  
'Sauvignon blanc' normal and botrytised, wine from, compounds in. 19:6-12.  
set of fruit, conditions influencing. *review*. 19:206.  
table, decay control by SO<sub>2</sub>. 19:70-81.  
'Thompson seedless', berry composition of sun fruit vs. shade fruit. 19:175-184.  
bloom spray and girdling. 19:37-46.  
foliar sprays. 19:17-25.  
washing of before mechanical harvesting. 19:266-271.

## H

- Harvesting**, mechanical, washing grapes before. 19:266-271.

## I

- Infrared** radiation and wine stabilization. *review*. 19:287.
- Ion exchange** and effect on potassium bitartrate behavior. 19:208-212.

## M

- Microdiffusion**, method in volatile acid determination. 19:47-51.
- Must**, brix/acid ratio and wine quality prediction. 19:129-132.

## N

- Nematode**, resistance to *Xiphinema index* in *Vitis*. 19:30-35.  
**New York State** wine, acid esters in. 19:101-107.  
 residual sugars in. 19:1-4.

## P

- pH** and rootstock-scion interaction. 19:213-226.  
 differences in sun fruit vs. shade fruit. 19:176-180.  
**Phenolic** compounds in plants. *review*. 19:205.  
**Phenolics**, determination by gas-liquid chromatography. 19:238-244.  
**Phosphorus**, vine tip content and foliar sprays. 19:17-25.  
**p-Hydroxybenzoic** acid, see **Acid**.  
**Phylloxera**, in France. *review*. 19:206.  
**Polyphenols** and potassium bitartrate in red wines. 19:91-100.  
**Pomace**, grape, countercurrent sugar extraction. 19:108-115.  
**Potassium bitartrate** and polyphenols in red wines. 19:91-100.  
 content decrease on refrigeration. 19:208-212.

## R

- Refrigeration**, effect on potassium bitartrate behavior. 19:208-212.  
**Rootstock**, resistance to *Xiphinema index*. 19:30-35.  
**Rootstock-scion**, interactions with nitrogen fertilizer level, effect on juice composition and fermentation rate. 19:213-226.  
 on wine composition and quality. 19:254-264.

## S

- Saccharomyces**, *cerevisiae*, var. *ellipsoideus*, see **Yeast**.  
**Sherry** aroma, acidic compounds in Spanish flor. 19:116-120.  
**Spectrophotometry**, determination of ethanol in wine. 19:160-165.  
 infrared, methyl esters of acids in Spanish flor sherry. 19:116-120.

- Spirits**, neutral, grape, fusel oil determination. 19:155-158.  
**Sprays**, bloom and double girdling. 19:37-46.  
 2,4-D and 2,4-DB, effects of. 19:194-204.  
 effect of on canned grapes. *abstract*. 19:283.  
 foliar and raisin vineyards. 19:17-25.  
 post bloom with gibberellic acid. 19:56-61.  
**Sugar**, extraction from grape pomace, method. 19:108-115.  
 glucose and fructose differences in sun vs. shade fruit. 19:176-179.  
 residual, New York State wines. 19:1-4.  
 use by yeast during fermentation. 19:273-281.  
**Sulfur dioxide**, decay control in table grapes. 19:70-81.

## T

- Tannin**, level in Champagne and secondary fermentation. 19:246-252.  
**Tartrate**, precipitation retardation. *abstract*. 19:126.  
 stability and polyphenols in red wine. 19:91-100.  
**Taste testing**, brix/acid ratios of must and wine quality prediction. 19:130-137.  
 fino wines with accelerated aging. 19:69.  
 red grapes held under anaerobic conditions, wine from. 19:139-145.  
 rootstock-scion interaction effect. 19:263-264.  
**Thinning**, prebloom and gibberellic acid spray. 19:37-46.  
**Tritium**, and Steinberger wines. *review*. 19:127.

## V

- Vineyards**, raisin and foliar sprays. 19:17-25.  
 vine shoot number to yield ratio in Rieslings of Germany. *abstract*. 19:125.  
 vine tip, zinc content and foliar sprays. 19:17-25.  
**Viticulture**, in India. *review*. 19:282.

**Vitis**, see also **Grapes**.

- berry abscission induction by morphactins. **19**:121-124.
- cropping level, effects of. **19**:185-193.
- 2,4-D and 2,4-DB, effects of. **19**:194-204.
- gibberellic acid and girdling. **19**:37-46.
- and 'Golden Queen'. **19**:52-55.
- and post bloom spraying. **19**:56-61.
- range of sugar, acid, etc. in 39 clones. *abstract*. **19**:83.
- resistance to *Xiphinema index*. **19**:30-35.

**W****Wine**, all about. *review*. **19**:284.

- American, effect of p-hydroxybenzoic acid in. **19**:101-107.
- anthocyanins and heat/light stability. **19**:147-154.
- composition and quality, rootstock-interaction. **19**:254-264.
- ethanol determination spectrophotometrically. **19**:160-165.
- fino and submerged culture flor yeasts. Spanish. **19**:63-69.
- New York State, residual sugars in. **19**:1-4.
- of Australia. *review*. **19**:82.
- of Chianti region. *review*. **19**:207.
- of Corsica. *review*. **19**:206.
- of Loire Valley. *review*. **19**:83.

of World. *review*. **19**:82.

- red, polyphenols and potassium bitartrate in. **19**:91-100.
- tannin level and Champagne secondary fermentation. **19**:246-252.
- refrigeration and potassium bitartrate behavior. **19**:208-212.
- 'Sauvignon blanc', volatile compounds in. **19**:6-12.
- science and technique text. *review*. **19**:126.
- white table, added *Botrytis cinerea* enzymes effect. **19**:228-236.

**X**

**Xiphinema index**, resistance to in *Vitis*. **19**:30-35.

**Y**

- Yeast**, flor, Spanish, acclimatization rate in fino wines. **19**:63-69.
- flor, types at various fermentation stages, Spanish. *review*. **19**:286.
- penetration of by sugar. **19**:273-281.
- Saccharomyces cerevisiae* var. *ellipsoideus*, acetic acid in **19**:13-16.
- sugar consumption rate during fermentation. **19**:273-281.

**Z**

**Zinc**, vine tip content and foliar sprays. **19**:17-25.
