 Zuluaga, P. A. 182

SUBJECT INDEX

A

- ACETOIN production in fermentation (abstr) 177
 2-ACETOLACTATE production in fermentation (abstr) 177

ACID

- perception in wine, effect of sugar on 139
 total, methods of sample preparation for determining 10

- ACIDITY OF JUICE, effect of potassium fertilization on 26

- AGROBACTERIUM TUMEFACIENS, transmission (abstr) 99

- ALANINE SALTS for improved smoothness and flavor (abstr) 178

- ALCOHOL, determination in beers and wines (abstr) 43

- ALCOHOLIC DRINKS, bartender recipes (review) 181

ALCOHOLS, higher

- formation by yeasts (abstr) 43
 variations in brandies (abstr) 135

- AMINO ACIDS in anthracnose of grapevine (abstr) 136

- ANTHRACNOSE, see *Gleosporium ampelophagum*

- ARGYROTAENIA CITRANA on grapes in Salinas Valley (abstr) 45

ARID CLIMATE

- preferred rootstocks for (abstr) 99
 rootstock performances in (abstr) 182

- AROMA COMPONENTS of alcoholic beverages (abstr) 134, (abstr) 178

- ARSENIC uptake by grapes (abstr) 99

AUSTRALIA

- experiments recommended for wine industry (abstr) 137
 guide to wines of (review) 132

B

BACTERIAL SPOILAGE

- of fortified wines (review) 132
 relation to malo-lactic fermentation (abstr) 137

BERRY

- drying, browning in (abstr) 135
 respiration, effects of metabolic inhibitors on (abstr) 48
 size effects on wine quality 106

- BIOLOGICAL CONTROL, predatory mite vs spider mites 46

- BIRD DAMAGE in vineyards 50

- BITTER TASTE, interactions with ethyl alcohol (abstr) 135

- BLACK CORINTH RAISINS, mechanical harvest of (abstr) 45

- BLENDING WINE, refermenting of into material for brandy 124

- BLOSSOM-END ROT, first report (abstr) 184

- BORDEAUX MIXTURE vs downy mildew (abstr) 101

- BOTRYTIS CINEREA, effects on wines 159

- BOURBON effects in dogs (abstr) 181

BRANDIES

- components as affected by oak type 114
 methanol determination in (abstr) 135
 refermenting blending wine into material for 124
 variations of higher alcohols in (abstr) 135

- BREEDING, Ontario program summarized (abstr) 102

- BRITISH COLUMBIA, varieties in (abstr) 183

BROWNING

- of berries in drying (abstr) 135
 of galacturonic acid (abstr) 43

- BUDBREAK, chilling effects on 31

- BULLETIN, quarterly, by Chilean Division of Alcohols and Vineyards (review) 133

- BUNCH COUNT for analyzing vine performance (abstr) 133

C

- 'CABERNET SAUVIGNON' grown in Washington suitability for wine 14
 yields and quality 18

CALIFORNIA

- economics of wine-grape expansion in (abstr) 96
 wine country (review) 132

- CALORIES in alcoholic beverages (review) 180

CARBOHYDRATES

- influence on flavor formation (abstr) 178
 light and temperature effects on, in "Thompson Seedless" (abstr) 96

- CARBON DIOXIDE added to alcohol, determination of (abstr) 97

- CARCINOGENS possible in spirits (abstr) 181

- CARIGNANE var. budbreak, chilling effects on 31

- CARPOPHILUS HEMIPTERUS, pyrethrins vs (abstr) 136

- CATECHINS in wines, determination of (abstr) 49

- CCC, see (2-chloroethyl)-trimethylammonium chloride
- 'CHARDONNAY' var. grown in Washington
suitability for wine 14
yields and quality 18
- 'CHENIN BLANC' var. grown in Washington
suitability for wine 14
yields and quality 18
- CHICK RESPONSE to grape juice 54
- CHILE
Division of Alcohols and Vineyards, new quarterly bulletin (review) 133
showroom for wines and distilled products in Santiago (abstr) 133
- CHILLING effects on budbreak 31
- CHLORIDE effects on vine growth (abstr) 98
- 2-(CHLOROETHYL)-TRIMETHYL ammonium chloride effects
on cluster development (abstr) 182
on root growth and cytokinin (abstr) 44
on Zante currant (abstr) 47, (abstr) 48, (abstr) 182
- p*-CHLOROPHENOXYACETIC ACID effects on Zante currant yields (abstr) 48
- CITRAMALIC ACID, determination in alcoholic beverages (abstr) 177
- CLARIFICATION by pectin trans-eliminase (abstr) 179
- CLIMATE influences on grape and wine composition (abstr) 44
- CLOUDINESS in fortified wine (abstr) 137
- CLUSTER development, effects of gibberellic acid and 2-(chloroethyl)-trimethyl ammonium chloride on (abstr) 182
- COLOR OF BERRIES, temperature effects on 71
- COMPOSITION OF GRAPES and wines, influences on (abstr) 44
- COMPOSITION OF WINES (abstr) 138
- CONCENTRATING wine (abstr) 44
- 'CONCORD' var. juice, acidity as affected by potassium fertilization 26
- CONTAINERS, pack depth effects on grape quality 39
- COPPER oxychloride vs downy mildew (abstr) 101
- COPPER SANDOZ vs downy mildew (abstr) 101
- CROWN GALL, see *Agrobacterium tumefaciens*
- CRYOLITE vs omnivorous leaf roller (abstr) 45
- CUISINE, grand, spirit of (review) 180
- CULTURAL practices, handbook (review) 43
- CULTURE effects on Zante currant yields (abstr) 47
- CUTTINGS, rooting of, effects of storage and planting time (abstr) 45
- CYTOKININ
levels in sap, effects of 2-(chloroethyl)-trimethyl ammonium chloride on (abstr) 44
in sex conversion of male *Vitis* (abstr) 47
- CZECHOSLOVAKIA, ecology of yeasts of (abstr) 133
- D**
- DAGGER NEMATODE, control by fumigation (abstr) 45
- DDT residues in grapes, foilage, and soil (abstr) 101
- DE-ALCOHOLIZATION of wine (abstr) 44
- DIACETYL production in fermentation (abstr) 177
- DIAZINON, disappearance in wine making (abstr) 136
- DIPLOID CROSSES with tetraploids, seed fertility of (abstr) 47
- DITHANE Z78 vs downy mildew (abstr) 101
- DOGS, ethanol and bourbon effects in (abstr) 181
- DOWNY MILDEW, fungicides vs (abstr) 101
- DRIED-FRUIT BEETLE, see *Carpophilus hemipterus*
- DROSOPHILA MELANOGASTER*, pyrethrins vs (abstr) 136
- DRYING, browning of berries in (abstr) 135
- DUSTING SULFUR vs powdery mildew (abstr) 101
- E**
- ECONOMICS of wine-grape expansion in California (abstr) 96
- ENOLOGIST, summary of his responsibilities (abstr) 138
- ENOLOGY, recent advances (review) 132
- EOTETRANYCHUS WILLAMETTEI*, biological control (abstr) 46
- ETHANOL
effects in dogs (abstr) 181
effects of injections of rats 121
- 5-ETHOXYDIHYDRO-2(3H)-FURANONE injections, effects on rates 121
- ETHYL ACETATE variations in brandies (abstr) 135
- ETHYL ALCOHOL, taste interactions with sweet, salty, sour, and bitter (abstr) 135
- EUROPEAN WINES (review) 179
- EXPERIMENTS recommended for Australian wine industry (abstr) 137

- F**
- FANLEAF VIRUS
control by fumigation (abstr) 45
thermotherapy vs (abstr) 183
- FERMENTATION
accelerated (abstr) 136
malo-lactic
effects on wine composition 152
relation to bacterial spoilage (abstr) 137
stimulation of (abstr) 45
- FERTILIZATION
long-term soil responses (abstr) 184
potassium effects on juice acid content 26
responses of unirrigated vines (abstr) 184
- FILTRATION, sheet, theory and practice (abstr) 132
- FINNISH ALCOHOL research (review) 98
- FLAVOR
factors affecting responses to 86
improved by glycine and alanine salts (abstr) 178
- FLOR SHERRY, production methods 128
- 'FOCH' var. grown in Washington
suitability for wine 14
yields and quality 18
- FORTIFIED WINE, cloudiness in (abstr) 137
- FUMIGATION for control of fan-leaf virus-dagger nematode complex (abstr) 45
- FUNGICIDES, influence on formation of hydrogen sulfide in fermentation (abstr) 100
- G**
- GALACTURONIC ACID, browning of (abstr) 43
- 'GAMAY BEAUJOLAIS' var. grown in Washington
suitability for wine 14
yields and quality 18
- GAS CHROMATOGRAPHY for analysis of head-space volatiles (abstr) 96
- GIBBERELIC ACID effects
on cluster development (abstr) 182
on Zante currant (abstr) 47, (abstr) 48, (abstr) 182
- GIRDLING effects on Zante currant yields (abstr) 48, (abstr) 47
- GLEOSPORIUM AMPELOPHAGUM, resistance to (abstr) 136
- GLUCOSIDE from *Vitis quadrangularis*, effects on myocardial tissue (abstr) 182
- GLYCEROL, determining in wine 1
- GLYCINE for improved smoothness and flavor (abstr) 178
- GOUT, two epidemics of (abstr) 98
- GRAPES
coloration, temperature effects on 71
influences on composition of (abstr) 44
diet of, as panacea (review) 102
in Ohio, history (abstr) 133
production (review) 183
varieties grown in Washington 14, 18
varieties in Spain (review) 100
- GROWTH REGULATORS, effects on yields of Zante currant (abstr) 47
- H**
- HARVEST, mechanical, of Black Corinth raisins (abstr) 45
- HEART, effects of glucoside from *Vitis quadrangularis* on (abstr) 182
- HERBICIDES
advantages of granular form in vineyards (abstr) 99
arsenic uptake by grapes (abstr) 99
- HIGHER ALCOHOLS, variations in brandies (abstr) 135
- HOME BEER- and winemaking (review) 102
- HOME WINEMAKING (review) 103, (review) 180
- HORMONE effects on sugar release from canes (abstr) 101
- HYDROGEN SULFIDE FORMATION
factors affecting 6
in fermentation (abstr) 100
role of nutrients in (abstr) 101
wort effects on (abstr) 100
- 4-HYDROXY-3-METHYLOCTANOIC ACID
GAMMA-LACTONE 5-BUTYL-4-METHYLDIHYDRO-2-(3H)-FURANONE identified in oak-wood-aged wine 103
- I**
- α -ISOPROPYLMALIC ACID, determination in alcoholic beverages 177
- J**
- JUICE
acid content as affected by potassium fertilization 26
physicochemistry of proteins in (abstr) 96
toxic effects on chicks 54

K

KARATHANE vs powdery mildew (abstr) 101

L

LEAD ARSENATE, standard, vs omnivorous leaf roller (abstr) 45

LEAF ANALYSIS, correlation with deficiencies (abstr) 49

LEAF PIGMENTS (abstr) 97

LEAF ROLLER, omnivorous, see *Platynota sultana*

LEUCONOSTOC CITROVORUM ML 34, see *Leuconostoc oenos*

LEUCONOSTOC OENOS ML 34, characterization 61

LIGHT effects on growth and carbohydrates of 'Thompson Seedless' (abstr) 96

LIQUORS and preserves, manufacture (review) 179

LOBBYING for wine industry (review) 134

M

MADERISATION, effects of pressing on (abstr) 135

MAGNESIUM, Stover var. response to (abstr) 98

MALATE in musts and wines of Washington 144

MALNUTRITION, foliar symptoms (abstr) 184

MALO-LACTIC FERMENTATION

effects on wine composition 152

relation to bacterial spoilage (abstr) 137

stimulation of (abstr) 45

MARKETING WINE, handbook for industry (review) 134

MATURITY, effects on flavor responses 86

MECHANICAL HARVEST of Black Corinth raisins (abstr) 45

MELLOWNESS improved by glycine and alanine salts (abstr) 178

METABOLIC INHIBITORS, effects on berry respiration (abstr) 48

METASEIULUS OCCIDENTALIS vs spider mites in biological control (abstr) 46

METHANOL

determination in wines, brandies, and spirits (abstr) 135

variations in brandies (abstr) 135

'MEUNIER' var. grown in Washington

suitability for wine 14

yields and quality 18

MICROFLORA contaminating bottled wines (abstr) 177

MICRONIZED SULFUR vs powdery mildew (abstr) 101

MILDEW, see powdery or downy

MITES

Pacific, see *Tetranychus pacificus*

predatory, see *Metaseiulus occidentalis*

tetranychid

biology and control (abstr) 46

effects of environment and culture on abundance (abstr) 46

Willamette, see *Eotetranychus willamettei*

MYCORRHIZA infection promoting vine nutrition (abstr) 48

N

NEMATODE, dagger, fumigation vs (abstr) 45

NITROGENOUS NUTRIENTS, importance to formation of higher alcohols by yeasts (abstr) 43

NUCLEIC ACID in buds and petioles (abstr) 99

NUTRIENT deficiencies, leaf analysis coordinated with (abstr) 49

NUTRIENTS in alcoholic beverages (review) 180

O

OAK-DERIVED volatile in wine 103

OAK-TYPE effects on brandy components 114

ODORS of small molecules (abstr) 178

OHIO, history of grapes in (abstr) 133

OLEANOLIC ACID, growth promoter of wine yeast in anaerobiosis (abstr) 100

OLFACTORY theories (abstr) 178

OMNIVOROUS LEAF ROLLER, cryolite and standard lead arsenate vs (abstr) 45

ONTARIO breeding program summarized (abstr) 183

ORANGE TORTRIX, see *Argyrotaenia citrana*

P

PACK DEPTH in containers, effect on grape quality 39

PACKAGING, sulfur-dioxide in, effects on grape quality 78

PARTHENOCARPY in grape, regulation of (abstr) 182

PEAK ERRORS from Poropak-Q traps (abstr) 178

PECTIN trans-eliminase in clarification (abstr) 179

- PENNSYLVANIA, potential for wine grapes in (abstr) 49
- PESTS, integrated control (abstr) 45
- pH, methods of sample preparation for determining 10
- p*-PHENOXYACETIC ACID effects on yields of Zante currant (abstr) 47
- PHOSALONE, residue analysis (abstr) 46
- PHOSPHORUS movement in grape vines (abstr) 49
- PHOTOSYNTHATE movement in shoots (abstr) 102
- PHYSIOLOGICAL SINK in grapes, characterization (abstr) 183
- PIGMENTS in grape leaves (abstr) 97
- PINCHING effects on Zante currant yields (abstr) 47
- 'PINOT NOIR' grown in Washington
suitability for wine 14
yields and quality 18
- PLASMOPARA VITICOLA*, see downy mildew
- PLATYNOTA SULTANA*
cryolite and standard lead arsenate vs (abstr) 45
survey for control (abstr) 96
- POMONA VALLEY, vines and vintners in (review) 134
- POROPAK-Q TRAPS causing erroneous peaks (abstr) 178
