

INDEX

Volume 24, 1973

AUTHORS — ORIGINAL PAPERS

A

Ahmedullah, M. 31, 75
Alexander, D. McE. 65
Amerine, M. A. 176

B

Berg, H. W. 153
Beuchat, L. R. 110
Buttrose, M. S. 14

C

Caputi, Arthur, Jr. 116
Cargill, B. F. 10
Chhem, C. 120
Cooke, G. M. 153
Crowell, E. A. 159

D

Daudt, C. E. 125, 130

F

Fuller, R. D. 59

G

Gosselin, C. 120
Guelfat-Reich, Sylvia 91
Guymon, J. F. 159, 166

H

Hale, C. R. 14
Hewitt, Wm. B. 27

K

Kepner, Richard E. 5
Kissler, J. 27
Kliwer, W. Mark 17, 59
Kunkee, R. E. 72

L

La Vine, P. 27
Levin, J. H. 10

M

Marshall, D. E. 10
Martin, G. B. 120
Muller, Carlos J. 5
McClellan, W. D. 27
McPherson, J. 31

N

Nelson, K. E. 31, 72, 75

O

Obbink, J. Groot 65
Ough, C. S. 125, 130, 148

P

Pilone, D. Annette 55, 97
Pilone, Gordon J. 97

Q

Quady, Andrew K. 166

R

Rankine, Bryce C. 55, 97
Roessler, E. B. 176

S

Safran, B. 91
Schultz, H. B. 17
Schutz, H. G. 31
Simard, R. E. 86, 120
Singleton, V. L. 103
Smart, Richard E. 141
Snobar, B. A. 10
Somers, T. C. 47, 51

T

Traverso-Rueda, S. 72, 103

U

Udea, Masao 116

W

Weaver, Robert J. 69
Webb, A. Dinsmoor 5

Y

Yang, H. Y. 1

Z

Zee, J. A. 86, 120
Ziemelis, G. 47, 51

AUTHORS — ABSTRACTS

A

Abdel-Gawad, H. A. 181
 Adams, Leon D. 136
 Aljibury, F. 85
 Alleweldt, G. 138, 138
 Antcliff, A. J. 82, 82, 186
 Arumugam, R. 182

B

Yadav, I. S. 44, 179

SUBJECT INDEX

A

- abscisic acid, annual cycle in vegetative organs (abstr) 138
 annual cycle in vegetative organs (abstr) 138
 influence in photoperiodism on (abstr) 138
- abscisic acid-like inhibitors, changes with leaf water potential (abstr) 138
- acidity relations to wine and brandy 166
- acids, identification of (abstr) 140
- air-pollution injury, benamoyl vs. (abstr) 184
- alfalfa dwarf, rickettsialike organism associated with (abstr) 84
- alfalfa mosaic virus, identification of (abstr) 139
- American wines, history of (review) 136
- anthocyanins in *Vitis rotundifolia* (abstr) 185
- anthracnose incidence as related to leaf osmotic pressure (abstr) 138
- arthropods, survey in California (abstr) 84
- L-ascorbic acid determination (abstr) 140

B

- beer flavor compounds determined (abstr) 81
- benomyl
 in inhibition of *Saccharomyces cerevisiae* 110
 vs. air-pollution injury (abstr) 184
- bentonite fining, evaluation of 51
- benzyladenine, effects on photosynthate movement (abstr) 82
- berries
 callus and cell culture from (abstr) 183
 composition as affected by maturation temperatures (abstr) 83
 effects of chlormequat on 69
 hormone contents (abstr) 83
 mold-count method on 72
- bible for wine bibbers (review) 136
- bindweed control (abstr) 178
- bluffing, to pose as a connoisseur (review) 184
- Bordeaux, varieties in that region (abstr) 85
- botrytis rot control 27
- brandy
 aging of, as affected by temperature (abstr) 45
 higher alcohols in (abstr) 45
 plum, aroma constituents of 159
- breeding, history, objectives, etc. (abstr) 85
- buds, fruitfulness of (abstr) 182

C

- 'Cabernet Sauvignon'
 in California (abstr) 179
 in Japan (abstr) 41
- callus and cell culture from berries (abstr) 183
- canes
 cytokinins in (abstr) 82
 severance effects on quality (abstr) 185
 severance in mechanical harvest (abstr) 179
- carbohydrate levels in vines (abstr) 82
- carbon dioxide determination in wine 116
- catechol oxidase
 conformation changes in (abstr) 83
 multiple forms of (abstr) 180
- catecholase activity, implications in winemaking 103
- 'Chardonnay', rootstock and pruning effects on (abstr) 44
- chloride effects on vine growth 65
- chlormequat effects on berries 69
- 1,2-¹⁴C-(2-chloroethyl)-phosphonic acid translocation in grapes (abstr) 181
- (2-chloroethyl)-trimethylammonium chloride
 effects on berries 69
 effects on petiole nutrient status (abstr) 182
- ciders
 making, and research on (abstr) 81
 organochlorinated pesticides 120
 sulfite binding in (abstr) 81
- color
 extraction from red grapes for winemaking (abstr) 41
 nature of in red wines (abstr) 83
- 'Concord'
 chemical changes during ripening (abstr) 178
 reproductive system of (abstr) 182
- congeners, effects on alcoholic beverages (abstr) 81
- corks, sterility check procedure (abstr) 46
- 4-CPA effects on fruits in cold storage (abstr) 182
- cytokinins (*see also* benzyladenine)
 activity in response to shoot ringing (abstr) 45
 in canes (abstr) 82
 levels in rootstocks (abstr) 82
 molar absorbance of (abstr) 181

D

- deacidification of musts with *Schizosaccharomyces pombe* 1
- decay control in transport 91
- decline of grapevine, *Pythium* in (abstr) 43
- L-dehydroascorbic acid, determination of (abstr) 140
- demand anticipation, plantings required to meet (abstr) 42
- desulfiting in wine distillates (abstr) 137
- 2,4-dichlorobenzyl tributyl phosphonium chloride effects on petiole nutrient status (abstr) 182
- dichlozoline residue determination (abstr) 137
- 3,5-diglucosides, molar absorbance of (abstr) 181
- N-dimethyl amino succinamic acid effects on petiole nutrient status (abstr) 182
- dimethylpolysiloxane determination for beer and yeast (abstr) 140
- distilleries in Scotland (abstr) 180
- drip irrigation techniques (abstr) 85

E

- economics
 of grape production allocation (review) 42
 projecting effects of new plantings (abstr) 179
- enzymes
 polymorphism in leaves (abstr) 183
 of starch metabolism in leaves and berries (abstr) 137
- ethephon translocation and persistence (abstr) 181
- ethyl caprylate, flavor threshold values of (abstr) 140
- evaporation cooling of vineyards (abstr) 178

F

- fermentation
 fumaric acid degradation in 97
 organic acid evolution during 86
 temperature control in (abstr) 180
- flavor preferences in 'Thompson Seedless' 31
- flower initiation (abstr) 182
- 'French Colombard', wine and brandy relations to maturity, acidity, and region 166
- fumaric acid degradation in fermentation 97

G

- 'Gamay Beaujolais', rootstock and pruning effects on (abstr) 44
- gibberellic acid effects on maturity (abstr) 185
- gibberellin effects on fruits in cold storage (abstr) 182
- grape leaf folder, insecticides vs. (abstr) 178
- grapevine decline, *Pythium* in (abstr) 43
- growth retardants, effects on petiole nutrient status (abstr) 182

H

- harvest, automatic, use worldwide (review) 42
- hormones in ripening berries (abstr) 83

I

- insecticides vs. grape leaf folder (abstr) 178
- inflorescence development as affected by temperature 14
- interveinal chlorosis, predicting (abstr) 43

K

- 'Koshu' in Japan (review) 41

L

- lactones, a review of, in wines 5
- law, new, affecting German wines (review) 181
- leaf photosynthesis, responses (abstr) 44
- leaf folder disease, insecticides vs. (abstr) 178
- leaves, enzyme polymorphism in (abstr) 183
- light interception by vineyards 141
- lipids, accumulation in chloroplasts (abstr) 182

M

- madeira, actual age of 176
- malic acid, estimation in grape juice (abstr) 137
- malvidin, molar absorbance of (abstr) 181

- malvidin-3-glucoside, molar absorbance of (abstr) 181
- maturity, relations to wine and brandy 166
- mechanical harvest
cane severance in (abstr) 179, 185
recovery and losses 10
- 'Merlot' in Japan (review) 41
- methyl 1-butyl-carbamoyl-2-benzimidazole carbamate vs. air-pollution injury (abstr) 184
- mold counts on berries 72
- 'Muscadine' cultivar trials (abstr) 183
- musts, deacidification with *Schizosaccharomyces pombe* 1
- mutants induced (abstr) 44
- mycorrhiza, vesicular-arbuscular, effects of re-planting (abstr) 186
- N**
- nematodes, control of (abstr) 43
- new disease, grapevine yellow speckel (abstr) 84
- new planting, projecting effects of (abstr) 179
- new yeast species, *Saccharomyces (Torulaspora) florenzani* (abstr) 42
- O**
- organic acids
analysis (abstr) 140
evolution during fermentation 86
- osmotic pressure in leaves related to anthracnose incidence (abstr) 138
- oxygen uptake studies on juice 148
- P**
- pesticides, organochlorinated, in ciders 120
- pests, management of (abstr) 43
- peonidin, molar absorbance of (abstr) 181
- petiole nutrient status as affected by growth retardants (abstr) 182
- petunidin, molar absorbance of (abstr) 181
- pH, effects on fumaric acid degradation 97
- phenyl ethyl alcohol, flavor threshold values of (abstr) 140
- phloem parenchyma cells, P-protein bodies in (abstr) 184
- photoperiodism, influence on growth and vine abscisic acid (abstr) 138
- photosynthate movement into roots (abstr) 82
- Phylloxera, European devastation by (review) 41
- Pierce's disease, rickettsialike organism association with (abstr) 84
- plantings
estimating requirements for future demands (abstr) 42
projecting effects of new (abstr) 179
- plot size and replication number effects on trial efficiency (abstr) 183
- polyphenols, location in grapes (abstr) 42
- P-protein bodies in phloem parenchyma cells (abstr) 184
- processing practices in San Joaquin Valley 153
- production of grapes, allocation of, on economic basis (review) 42
- proteins
direct determination in wine 47
instability in wine, detection (abstr) 139
separation, concentration, and analysis (abstr) 139
- pruning
effects on bud burst and fruitfulness (abstr) 183
severity effects on growth and yield (abstr) 44
- 'Pusa Seedless', effects of pruning on (abstr) 183
- Pythium* in grapevine decline (abstr) 43
- Q**
- quality as affected by vine spacing (abstr) 83
- R**
- replanting
biotic relations in (abstr) 186
relations to vesicular-arbuscular mycorrhiza (abstr) 186
- rickettsialike organism associated with Pierce's disease (abstr) 84
- riddling, method of (abstr) 83
- rootstocks
cytokinin levels in (abstr) 82
effects on growth and yield (abstr) 44
trials for 'Sultana' (abstr) 43

S

- Saccharomyces* as wild contaminants, detection (abstr) 178
- Saccharomyces bailii* as spoilage cause in bottled wine 55
- Saccharomyces cerevisiae*
inhibition of by benomyl 110
uptake of sulfate by (abstr) 42
- Saccharomyces (Torulaspora) florenzani*, name of new yeast species from grape (abstr) 42
- Schizosaccharomyces pombe* in decidification of musts 1
- Scotland, distilleries in (abstr) 180
- seeds, dormant in (abstr) 44, 179
- 'Semillon' in Japan (review) 41
- sherry, history of (review) 185
- shoots
improving yields of (abstr) 139
ringing effects on cytokinin activity of (abstr) 45
tip excision effects on leaf photosynthesis (abstr) 44
- spacing, effects on yields and quality 83
- spider mites
control (abstr) 84
effects of overhead sprinkling on (abstr) 84
populations in San Joaquin vineyards (abstr) 45
predators of (abstr) 84
- spirits of the world (review) 184
- spoilage
detecting yeasts of (abstr) 45
from *Saccharomyces bailii* 55
- sports of 'Concord', reproductive systems of (abstr) 182
- sprinkling
effects on spider mites (abstr) 84
cooling effects on fruit growth and composition 17
- starch
accumulation in chloroplasts (abstr) 182
in berries (abstr) 137
metabolism in leaves and berries (abstr) 137
- stems
44
cincturing effects on leaf photosynthesis (abstr) 44
desiccation control in 91
- stomata in berries (abstr) 137

- storage, temperature control in (abstr) 180
- sulfate uptake by *Saccharomyces cerevisiae* (abstr) 42
- sulfite binding in wines and ciders (abstr) 81
- sulfur dioxide
effects on volatile acetate esters 130
release rate, temperature effects on 75
- 'Sultana'
cytokinins in (abstr) 82
rootstock trials of (abstr) 43
strain yield differences (abstr) 186
- 'Sultanina', maturity responses of gibberellic acid (abstr) 185
- sunlight interception by vineyards 141

T

- tartaric acid, estimation in grape juice (abstr) 137
- temperature control during fermentation and storage (abstr) 180
- temperature effects on
accumulation of starch or lipids in chloroplasts (abstr) 182
fumaric acid degradation 97
inflorescence development 14
sulfur dioxide release rate 75
volatile acetate esters 130
- 'Thompson Seedless'
carbohydrate levels in vines (abstr) 82
defoliation effects on growth 59
flavor preferences for 31
growth regulator effects on (abstr) 182
scarring of (abstr) 45
translocation and persistence of ethephon in (abstr) 181
wine and brandy relations to maturity, acidity, and region 166

V

- varieties in Bordeaux region (abstr) 85
- vines
production in Italy (review) 41, 41
rapid multiplication of (abstr) 44
- vineyards
evaporation cooling of (abstr) 178
in Pompeii (review) 136
sunlight interception by 141
- Vitis rotundifolia*, anthocyanins in (abstr) 185

volatile acetate esters
 effects of temperature, SO₂, yeast strain, and
 grape variety on 130
 quantitative measurement of 125
 volatile acids, measuring of, in wine (abstr) 46

W

water consumption by grapevines (abstr) 44
 wines
 developing appreciation of (review) 184
 guide for the beginner (review) 181
 medieval trade in (review) 81
 production in Italy (review) 41, 41
 red, in South Africa (review) 184
 in Spain (abstr) 136

winemaking
 catecholase activity in 103
 made easy (review) 41
 small-scale methods (abstr) 180

Y

yeast strains
 effects on fumaric acid degradation by 97
 effects on volatile acetate esters of 130
 lethal to brewery yeasts (abstr) 178
 yeast technology (review) 185
 yellow speckle, newly recognized disease (abstr) 84
 yields as affected by spacing (abstr) 83
