

INDEX

Volume 25 1974

AUTHORS — ORIGINAL PAPERS

A

Alley, C. J. 48, 50, 168
Amerine, M. A. 1, 44, 222
Aney, Warren W. 212
Atallah, M. 92

B

Ballinger, W. E. 30
Beelman, R. E. 219
Berg, H. W. 208
Brander, C. Frederic 13

C

Carroll, D. E., Jr. 30
Carter, G. H. 92
Christensen, E. N. 202
Christensen, L. P. 48, 50, 168
Clore, W. J. 24, 92
Cook, James A. 111

D

Dailey, R. T. 73, 108

E

Early, R. 92
Eriksson, Kalervo 179
Eschenbruch, R. 157
Evans, J. C. 62

F

Fantozzi, P. 151
Fay, R. D. 24
Folwell, R. J. 73 108
Fong, Douglas C. 1, 44, 222

H

Hodges, D. K. 108

J

Johnson, T. 92

K

Kasimatis, A. N. 17
Kissler, J. J. 17
Kliewer, W. Mark 111
Kuensch, U. 191
Kunkee, R. E. 188

L

Lee, P. S. T. 73
Liaw, Margaret Wei-Yi 79
Little, Angela C. 79
Loreti, Filberto 21

Mc

McArdle, F. J. 219
McCloskey, Leo P. 194, 198
McWilliam, D. J. 67

M

Manahan, David 42
Maness, E. P. 30
Mayer, K. 191
Montedoro, G. 151
Montgomery, Ralph 39

N

Nagel, C. W. 92
Natali, Sesto 21
Nelson, J. 92
Nesbitt, W. B. 30
Nykanen, Lalli 179

O

Ortega, J. H. 33
Ough, C. S. 7, 67, 188, 208, 222

P

Pilone, D. Annette 99
Pilone, Gordon J. 99
Pratt, Charlotte 131
Purcell, A. H. 162

R

Rankine, Bryce C. 99
Replogle, Lanny L. 194

S

Schutz, H. G. 33
Singleton, V. L. 119
Smart, R. E. 62, 84
Stackler, B. 202
Stashak, R. M. 7
Suomalainen, Heikki 179

T

Temperli, A. 191
Turkington, C. R. 62

W

Wallace, M. A. 24
Weaver, Robert J. 39
Wildenradt, H. L. 119

AUTHORS — ABSTRACTS

A

Alexander, D. M. 57
Alley, C. J. 232
Anderson, J. L. 228
Andreasen, A. A. 55
Antcliff, A. J. 60, 128

B

Babakhanov, B. A. 175
Bancher, E. 58

Barrs, H. D. 175

SUBJECT INDEX

A

- abscisic acid
 effects on buds (abstr) 229
 effects on seed germination (abstr) 230
 in stomatal response to carbon dioxide
 (abstr) 56
- acid reduction, carbonic maceration influence on 219
- addiction to alcohol 179
- aging of wine 119
- Alar (see N-dimethylaminosuccinamic acid)
- alcohols, sugar, in several foods (abstr) 58
- aldehydes from oxidation of polyphenolics 119
- American wines, treasury of (review) 226
- amines in Italian wines (abstr) 56
- amino acids, determination of 151
- ammonia, measurement in musts and wines 67
- anaerobic fermentation 1
- anatomy of grapes 131
- ancient texts on wine and winemaking 42
- anthocyanins
 biological effects of (abstr) 177
 color expression (abstr) 227
 color of solutions of (abstr) 174
 in a grape hybrid (abstr) 177
 in Barbera grapes (abstr) 227
 in Beauty Seedless (abstr) 227
 oxidation products of (abstr) 127
 recovery from grape wastes (abstr) 227
 relation to wine color 30
 structure and properties (abstr) 127
- apple juice, nitrogen effects on stability of (abstr)
 58
- arginine
 as indicator of nitrogen status 111
 conversion to ornithine during malo-lactic fer-
 mentation 191

B

- Barbera grapes, anthocyanins in (abstr) 227
- Beauty Seedless, anthocyanins in (abstr) 227
- bentonite effects on enzymatic activity of wine 128
- benzothiazole-2-oxyacetic acid
 effects on buds (abstr) 229
 effects on seed germination (abstr) 230
- benzyl-adenine, effects on buds (abstr) 229

- berry development in Thompson Seedless (abstr) 58
- bible for wine bibbers (review) 130
- Black Spanish as a rootstock (abstr) 57
- blending wines to color 79
- Botryodiplodia theobromae*, dieback from (abstr) 56
- Brix changes during berry development (abstr) 58
- buds
 growth regulator effects on (abstr) 229
 survival at subzero 24

C

- California fine wines (review) 60
- carbon bisulfide vs *Xiphinema index* (abstr) 59
- carbon dioxide
 grape fermentation under 1
 stomatal response to (abstr) 56
- carbonic maceration, influence on acid reduction 219
- catechol oxidase
 phenylhydrazine effects on activity of (abstr)
 177
- CCC (see (2-chloroethyl) trimethylammonium
 chloride)
- Champagne (review) 61
- cherry juice, nitrogen effects on stability of
 (abstr) 58
- Chlormequat, CCC (see 2-chloroethyl) thrimethyl-
 ammonium chloride)
- (2-chloroethyl) trimethylammonium chloride
 effects on grapes (abstr) 175
 effects on growth and fruiting 21
 effects on seed germination (abstr) 230
- chromatography
 in determining ethanol in wine 202
- citric acid in California wines 222
- cold-stress, viability following (abstr) 176
- color
 anthocyanins relation to, in wine 30
 blending wines to 79
 effect of ethephon on 39
 expression of (abstr) 174
 interpretation of in red wines (abstr) 61
 of dried Sultanas (abstr) 175
- composition of ripening grapes (abstr) 57
- consumer attitudes toward wine 33
- consumption of alcoholic beverages 179

cooking with wine (review) 225
 copper from fungicides in grape juice (abstr) 230
 cracking of berries, anatomy of (abstr) 229
 cultural practices in New York (review) 60
 currant juice, nitrogen effects on stability of
 (abstr) 58
 cuttings
 rooting of 48, 50, 168
 use of nitrogen and potassium reserves
 (abstr) 57
 cyanide detection in wines and spirits (abstr) 174

D

date of harvest, prediction of (abstr) 176
 1,3-dichloropropene vs rootknot nematodes
 (abstr) 59
 dieback from *Botryodiplodia theobromae* (abstr) 56
 dietetic foods, sorbitol in (abstr) 56
 diethylpyrocarbonate as a sterilant (abstr) 174
 N-dimethyl-aminosuccinamic acid, effects on grapes
 (abstr) 176
 Dog Ridge as a rootstock (abstr) 57
 dormant buds, destruction technique for (abstr) 176

E

enzymes in estimating ethanol in wines 194
 ethanol
 determination in extracts (abstr) 174
 determination in wine 194, 202
 ethephon effects
 on buds (abstr) 229
 on color and maturation 39
 ethyl alcohol effects on seed germination
 (abstr) 230

F

fanleaf, location in *Xiphinema index* (abstr) 59
 fermentation under carbon dioxide 1
 fine wines of California (review) 60
 flowering, physiology of (abstr) 56
 foods of France and Italy (review) 130
 forced cuttings, fruitfulness of (abstr) 128, 129
 frost injury
 bud survival 24
 shoot break-out vs 17

fruit set, physiology of (abstr) 56
 fruit-berry wines, nitrogen effects on stability of
 (abstr) 58
 fruitfulness
 in forced cuttings (abstr) 128, 129
 fumaric acid, effects on malo-lactic fermentation
 99, 188
 fumigation vs nematodes (abstr) 59
 fungicides influence on copper in grape juice
 (abstr) 230
 furrow irrigation vs trickle 62

G

germination
 improvement of (abstr) 230
 of seeds, as influenced by growth regulators
 (abstr) 230
 gibberellin effects
 on buds (abstr) 229
 on "hen and chicken" disorder (abstr) 176
 on seed germination (abstr) 230
 gluconic acid in California wines 198
 grape juice, copper content (abstr) 230
 grape juice, white 55
 growth regulators
 effects on buds (abstr) 229
 effects on seed germination (abstr) 230

H

harvest date, prediction (abstr) 176
 health and wine (review) 60
Hemicriconemoides chitwoodi in grapevines
 (abstr) 59
 "hen and chicken" disorder, gibberellin effects on
 (abstr) 176
 histamine in wines (abstr) 127
 home-made wines (review) 130, 130, 130
 hydroxybenzoic acid, analysis of (abstr) 128
 hydroxycinnamic acid, analysis of (abstr) 128

I

irrigation
 effects on fruitfulness (abstr) 230
 effects on leaf water potential (abstr) 175
 furrow vs trickle 62
 Italian wines, amines in (abstr) 56

- J**
- jellies, subjective and objective measurements of (abstr) 228
- journal of *Wine and Food*, selections from (review) 130
- judging
biases in (abstr) 227
subjective and objective correlations (abstr) 228
- juice, treatment preceding fermentation (abstr) 55
- L**
- Lake Emerald as a rootstock (abstr) 57
- leaf
correlation of area with length (abstr) 129
rapid estimation of water content (abstr) 129
water potential (abstr) 175
- M**
- malate changes during berry development (abstr) 58
- malo-lactic fermentation
conversion of arginine to ornithine 191
fumaric acid effects on 188
inhibition of 99
- market projections for wine 73
- maturation, effect of ethephon on 39
- metabolism, inhibition of during ripening (abstr) 128
- methyl bromide vs rootknot nematodes (abstr) 59
- 3-(methylthio)-1-propanol, volatile in wine (abstr) 174
- minerals, concentrations in Muscadine (abstr) 57
- morphactin effects
on buds (abstr) 229
on seed germination (abstr) 230
- mouse, effects on wine intake on (abstr) 228
- Muscadine, mineral concentrations in (abstr) 57
- N**
- nematodes
effects on rootstocks (abstr) 59
fumigation vs (abstr) 59
Hemicriconemoides chitwoodi in grapevines (abstr) 59
- nitrogen
effects on stability of fruit-berry wines (abstr) 58
reserves used during growth (abstr) 57
status as indicated by arginine 111
- O**
- oak root fungus, fumigation vs (abstr) 59
- Oregon potential for vinifera production 212
- ornithine derived from arginine during malo-lactic fermentation 191
- 2-oxoglutarate-amino-transferase in wine yeasts (abstr) 228
- oxygen utilization by yeast in fermentation (abstr) 229
- P**
- pectic enzymes, effects on musts and wines 208
- petiole nutrient correlation with yield and quality (abstr) 230
- pH
changes during berry development (abstr) 58
effects on activity of *Schizosaccharomyces pombe* (abstr) 58
effects on anthocyanin color (abstr) 227
- phenethyl alcohol, determination in distillates (abstr) 174
- phenolcarboxylic acids, analysis of (abstr) 128
- phenylhydrazine, effects of catechol oxidase activity (abstr) 177
- Pierce's disease patterns in vineyards 162
- polyphenolic oxidation, producing aldehydes 119
- polyphenoloxidase, oxygen affinity for (abstr) 175
- population effects on wine (abstr) 59
- port, white, biochemistry of (abstr) 175
- potassium reserves used during growth (abstr) 57
- potassium gibberellate
effects on buds (abstr) 229
effects on seed germination (abstr) 230
- projections of wine sales 73
- proline in grapes and wines 7
- pruning
effects on vines (abstr) 128
of Zante currant (abstr) 56, 230
- purchasing wine, relations in 108

R

- rain damage to vines (abstr) 129
 raisins, sorbitol in (abstr) 56
 region IV, wine from 44
 ripening grapes, composition of (abstr) 57
 rooting of grape cuttings 48, 50, 168
 rootknot nematodes, fumigation vs (abstr) 59
 rootstocks
 Dog Ridge, Black Spanish, Lake Emerald, W380,
 and W1251 compared (abstr) 57
 effects on vines (abstr) 128
 in nematode-infested soil (abstr) 59

S

- Saccharomyces cerevisiae* var. *ellipsoideus*, sulfur
 dioxide transport in (abstr) 226
 safety handbook for wineries (review) 225
 sales projected for wine 73
Schizosaccharomyces pombe activity as affected by
 pH (abstr) 58
 seed germination
 effect of growth regulators on (abstr) 230
 improvement of (abstr) 230
 sherry (review) 225
 shoot break-out vs frost injury 17
 sorbic acid, determination of (abstr) 226
 sorbitol in raisins and dietetic foods (abstr) 56
 spacing of vines, effects (abstr) 58
 starch synthetases in grape berries (abstr) 177
 steroids in aged whiskey (abstr) 55
 stomatal response to CO₂, abscisic acid in (abstr) 56
 succinic acid-2,2-dimethylhydrazide
 effects on buds (abstr) 229
 effects on seed germination (abstr) 230
 sugar alcohols in several foods (abstr) 58
 sulfite formation and consumption by yeasts
 (abstr) 55
 sulfur dioxide transport and toxicity in *Saccharo-*
myces (abstr) 226
 sulfuric acid effects on seed germination (abstr)
 230
 sulfurs formed in winemaking 157
 sun-leaf angles, field estimation of (abstr) 56
 supermarket handbook (review) 178
 symposium on yeasts (review) 58

T

- tartaric acid
 analysis method (abstr) 127
 biogenesis in grapevine (abstr) 229
 tartrate changes during berry development (abstr)
 58
 technology effects in winemaking (review) 175
 Thompson Seedless changes during berry develop-
 ment (abstr) 58
 titratable acidity changes during berry develop-
 ment (abstr) 58
 trellis effects on vines (abstr) 128
 trickle irrigation vs furrow 62
 L-tyrosine in wine yeasts (abstr) 228

V

- vanadate procedure for tartaric acid measurement
 (abstr) 127
 varietal comparisons of wine grapes (abstr) 60
 varietal tests for wine in Washington 92
 viability tests for cold-stressed plants (abstr) 176
 vine spacing effects (abstr) 58, 232
 vine water relations 84
 vinifera potential in Oregon 212
 volatiles
 of alcoholic beverages 179
 3-(methylthio)-l-propanol (abstr) 174
 in Zinfandel wine 13

W

- W380 as a rootstock (abstr) 57
 W1521 as a rootstock (abstr) 57
 wastes, grape, anthocyanin recovery from (abstr)
 227
 Washington varieties suitable for wine 92
 water content, rapid estimation (abstr) 129
 water potential, environmental effects on (abstr)
 175
 water relations of the grapevine 84
 whisky, Scotch, analytical profile of (abstr) 55

white port, biochemistry of (abstr) 175
Wine and Food journal, selections from (review)
 130
 wine-industry reminiscences (review) 226
 winemaking
 at home (review) 130, 130, 130, 228
 technical advances in (review) 175
 winery safety handbook (review) 225
 wine tasting (review) 225, 225
 wines and spirits (review) 178
 wines and wineries in Australia and New Zealand
 (review) 177

X

Xiphinema index, fanleaf and yellow mosaic in
 (abstr) 59

Y

yeasts
 cellular processes (review) 58
 effects on wine composition (abstr) 228
 sulfite formation and consumption by (abstr)
 55
 symposium on (review) 58
 L-tyrosine in (abstr) 228
 utilization of oxygen in fermentation (abstr)
 229
 yellow mosaic, location in *Xiphinema index* (abstr)
 59

Z

Zante currant
 fruitfulness and cane pruning of (abstr) 56
 pruning of (abstr) 230
 Zinfandel, volatiles in 13
