

INDEX

Volume 26 1975

AUTHORS — ORIGINAL PAPERS

A

Abbas, S. 168
Acree, T. E. 184
Akiyoshi, M. A. 134
Aljibury, F. K. 214
Alley, C. J. 105, 109

B

Balasubrahmanyam, V. R. 168
Baranek, Paul P. 37
Beelman, Robert B. 18
Berg, H. W. 134
Brewer, Robert 214
Brown, Milford S. 103
Burroughs, L. F. 25

C

Caputi, A., Jr. 148
Carter, G. H. 12
Chan, Lloyd 201
Christensen, E. N. 148
Christensen, Peter 179, 188, 214
Cottrell, Thomas 154
Crowell, E. A. 97

D

de Wet, P. 62

F

Ferrari, N. L. 144

G

Goheen, A. C. 144
Guadagni, D. 208
Guymon, J. F. 97

H

Hoekman, Mark 70
Hsia, Chao L. 57

J

Jensen, Fred L. 79, 90
Johnson, John 164
Johnson, Tamis L. 12

K

Kasimatis, A. N. 37, 125, 158,
175, 214
Kepner, R. E. 70
Khanduja, S. D. 168
Kissler, James J. 79
Kliewer, W. M. 75, 82, 125, 175
Kluba, Richard M. 18

L

Lakso, A. N. 75
Lavee, Shimon 164
Leavitt, George M. 79, 90
Lee, C. Y. 184
Lider, Lloyd A. 125, 144, 175

M

Muller, Carlos J. 70

N

Nagel, C. W. 12, 57
Noble, A. C. 158, 195

O

Ough, C. S. 5, 30, 92, 130, 158,
195, 201

P

Peacock, William L. 79, 90
Peterson, Jeffrey R. 119
Planck, Ralph W. 57
Pool, Robert M. 43

R

Robinson, W. B. 184

S

Sakato, Kent H. 70
Scutt, K. 148
Sieberhagen, H. A. 62
Singleton, V. L. 5, 62
Slinkard, K. 148
Smart, Richard E. 119
Stackler, B. 148
Stern, D. J. 208
Stevens, K. L. 208
Stoewsand, G. S. 184
Swanson, Frederick H. 37, 90

T

Temple, D. 92, 195

V

Van Buren, J. P. 184
van Wyk, C. J. 62
Vilas, Edward P., Jr. 37

W

Weaver, Randy 201
Weaver, Robert J. 47, 164
Webb, A. D. 70
Wildenradt, H. L. 148
Winton, Walter 5

Y

Yang, H. Y. 1

Z

Zepponi, Gino 154

AUTHORS — ABSTRACTS

- A**
- Abdella, N. 52
 Acree, T. E. 222
 Adams, Leon D. 218

SUBJECT INDEX

- A**
- abscisic acid
 biosynthesis under osmotic stress (abstr) 218
 effects on ripening (abstr) 117
 role in water stress (abstr) 224
- acidity
 adjustment in wines 12
 amelioration effects on 18
 in developing berries (abstr) 50
- aflatoxins, determination in wines (abstr) 115
- amelioration effects on acidity, malate, tartrate, potassium, and pH 18
- amino acids
 effects of Protavamorin G 10x, 78-2 on (abstr) 219
 origins in berries (abstr) 218
- anthocyanins
 equilibria, correlation with wine quality (abstr) 171
 from grape, stability in carbonated beverage (abstr) 221
 in grape varieties (abstr) 219
- aromatics in wines 70
- auxins in regulating berry set and size (abstr) 112
- B**
- benchgrafting in Germany and France (abstr) 51
- benzaldehyde determination (abstr) 171
- 1,2-benzopyrone determination (abstr) 171, (abstr) 223
- berries
 ethephon effects on 79
 growth regulator effects on (abstr) 224
 phosphoenolpyruvate carboxylase and malic enzyme in 75
 response to sprinkler cooling 214
- berry
 cane width and girdling effects 90
 regulation of set and development (abstr) 112
 ripening processes (abstr) 218
 variability 37
- bird damage to grapes (abstr) 225
- black deadarm disease caused by *Botryosphaeria stevensii* (abstr) 172
- Bordeaux region, yeasts in (abstr) 115
- boron in vineyards (abstr) 50
- Botryosphaeria stevensii* in black deadarm disease (abstr) 172
- brandy composition (abstr) 113
- O-4-bromo-2,5-dichlorophenyl-O-methyl phenylphosphonothioate persistence (abstr) 54
- browning
 control in juices and wines (abstr) 174
 prevention 30
- bud drop, growth regulator effects on (abstr) 118
- budbreak, root temperature effects on 82
- buds, thiourea effects on 168
- C**
- calcium in leaves, leafroll effects on (abstr) 117
- calcium ions, turbidity in wines containing (abstr) 221
- canes, width effects on berries 90
- carbon dioxide determination (abstr) 171, (abstr) 222
- catalase in oxygen scavenging 30
- catalase inhibition 92
- catechol oxidase, isoelectric point changes (abstr) 51
- CCC (see (2-chloroethyl) trimethylammonium chloride)
- chemistry of winemaking (abstr) 174
- chlormequat, effects on fruitfulness and cluster development 47
- (2-chloroethyl) trimethylammonium chloride, effects on yields (abstr) 224
- cluster development, growth-retardant effects on 47
- color, reactions responsible for in wine 134
- color density, correlation with wine quality (abstr) 171
- coloring matter detection (abstr) 50
- Concord grape juice quality and stability (abstr) 115
- cooling with sprinklers, berry response 214
- copper, must processing effects on 57
- coumarin determination (abstr) 171, (abstr) 223
- cover-crop influence on yield (abstr) 116

- cuttings, rooting and end of rest 164
- cycocel (see 2-chloroethyl) trimethylammonium chloride
- cytokinins, effects on
 berry set and size (abstr) 112
 flower development 43
 shoot development (abstr) 118
- D**
- Desmia funeralis*, bionomics of (abstr) 172
- dibromochloropropane vs. nematodes (abstr) 52
- dimethyldicarbonate as a wine sterilant 130
- o-diphenoloxidase in leaves, roots, and stems (abstr) 52
- dry extract of wines, determination (abstr) 173
- dying arm disease now in California (abstr) 118
- E**
- enation, leaf, new symptoms in France (abstr) 53
- thephon, effects on berries 79
- 2-ethoxyhexa-3,5-diene, geranium-like off-odor from 97
- ethylene in regulating berry set and size (abstr) 112
- F**
- fatty acid esters
 analysis in raisins (abstr) 56
 taste thresholds in raisins (abstr) 220
- fermentors, performance characteristics (abstr) 174
- flavors, computer-derived maps of (abstr) 220
- flor sherry, surface culture of (abstr) 56
- Florida grapes, wines from (abstr) 54
- flower development, cytokinin effects on 43
- foliage, removal effects on yields 119
- frozen grapes, wines from 103
- B-fructofuranosidase, extraction effects on activity (abstr) 218
- fruit character, growth regulator effects on (abstr) 118
- fruit set, root temperature effects on 82
- fruitfulness
 growth-retardant effects on 47
 water-stress effects (abstr) 50
- fungicides vs lactic acid bacteria (abstr) 221

- G**
- geranium-like off-odor from 2-ethoxyhexa-3,5-diene 97
- gibberellins
 effects on floral bud drop and fruit character (abstr) 118
 effects on yields (abstr) 224
 in regulating berry set and size (abstr) 112
- girdling effects on berries 90
- B-1,3-glucan hydrolase, increased activity from viruses (abstr) 117
- glucose oxidase in oxygen scavenging 30
- grafting
 side whip type 109
 wedge type 105
- grape leaf folder (see *Desmia funeralis*)
- grapeseed oil rich in linoleic acid (abstr) 50
- grapevine decline new in Sicily (abstr) 53
- grapevine vein mosaic, graft-transmissible virus (abstr) 53
- growth regulators
 effects on berry yields (abstr) 224
 effects on floral bud drop and fruit character (abstr) 118
- growth retardants
 effects on fruitfulness and cluster development 47
 effects on pollen production and fruit set (abstr) 224
- H**
- harvest, predicting date of (abstr) 115
- p-hydroxybenzoate esters, microbial inhibition from 201
- I**
- inflorescence, developmental stages (abstr) 224
- inhibitors in regulating berry set and size (abstr) 112
- iron, must processing effects on 57
- irrigation
 frequency influence on yield (abstr) 116
 response to cut-off timing 188
- isoamyl acetate determination (abstr) 171
- Italian wines (abstr) 172
- J**
- juice clarification
 separation system 154
 stability (abstr) 115
 treatment for (abstr) 54

L

- lactic acid bacteria, fungicides vs (abstr) 221
- leafroll
 effects on leaf minerals (abstr) 117
 effects on yields 144
- leafroller, omnivorous (see *Platyntota stultana*)
- leaves
 content of, effects on wine 158
 volatiles in 148
- leucine-2C¹⁴ decomposition during wine
 aging (abstr) 219
- leucoanthocyanins of grapes and wines (abstr) 219
- linoleic acid in grapeseed oil (abstr) 50

M

- magnesium in leaves, leafroll
 effects on (abstr) 117
- malate, amelioration effects on 18
- malate dehydrogenase in four
 grape varieties (abstr) 223
- male sterility induced by plant
 regulators (abstr) 112
- maleic hydrazide in inducing male
 sterility (abstr) 112
- malic enzyme, physical properties in berries 75
- marketing
 U. S. Wine industry (abstr) 114
 world trade in wines (abstr) 114
- mechanical harvest
 economic factors (abstr) 51
 effects on wine 158
 for drying (abstr) 51
- Metaseiulus occidentalis*
 toxicity of chemicals (abstr) 172
 diapause induction and duration
 in (abstr) 225
- methanol in wines related to processing
 and variety 184
- methyl alcohol determination in wine (abstr) 222
- methyl bromide vs nematodes (abstr) 52
- microbial inhibition from p-
 hydroxybenzoate esters 201
- minerals in leaves (abstr) 117
- must processing effects on iron and copper 57
- mycoplasma-like diseases
 in grapes (abstr) 52
 prevention and control (abstr) 171

N

- nematodes
 dibromochloropropane vs 52
 distribution in vineyards (abstr) 173
 methyl bromide vs (abstr) 52
 resistant rootstocks (abstr) 52
- nitrogen
 determination in wine (abstr) 219
 in developing berries (abstr) 50
 leafroll effects on, in leaves (abstr) 117

O

- Oregon, wine grape harvest data (abstr) 112
- organic acids, origins in berries (abstr) 218
- oxygen scavenging with glucose oxidase-
 catalase enzyme system 30

P

- Pacific spider mite (see *Tetranychus pacificus*)
- pectic enzyme effects on wine color 195
- pests, management in central California (abstr) 172
- pH, amelioration effects on 18
- pheromone trapping of *Platyntota*
stultana (abstr) 225
- phosphoenolpyruvate carboxylase, physical
 properties in berries 75
- phosphorus
 leafroll effects in, in leaves (abstr) 117
 metabolism during floral initiation (abstr) 117
- photosynthesis by grapevine canopies (abstr) 116
- phylloxera, nature of root damage from (abstr) 224
- Pierce's disease
 bacterial etiology (abstr) 54
 rickettsialike bacterium associated with
 (abstr) 53, (abstr) 116
 tolerance to (abstr) 116
 verification of (abstr) 115
- Platyntota stultana*, pheromone trapping
 of (abstr) 225
- potassium
 amelioration effects on 18
 leafroll effects on, in leaves (abstr) 117
 long-term responses to 179
- powdery mildew, resistance to (abstr) 173
- propagation
 side whip graft 109
 wedge graft 105
- 2-propanol, determination in fruits (abstr) 223
- Protavamorin G 10x, 78-2, effects on
 amino acids (abstr) 219

proteins in four grape varieties (abstr) 223

pruning

effects on growth and yields 175
 trials (abstr) 51

R

rachis cracking (abstr) 224

raisins, dehydration compared with
 field drying (abstr) 220

red wines compared with white (abstr) 220

research in Michigan (abstr) 51

rickettsialike bacterium

associated with Pierce's disease
 (abstr) 53, (abstr) 116
 in grapes (abstr) 52

ripening, abscisic acid effects on (abstr) 117

root-temperature effects on budbreak, shoot
 growth, and fruit set 82

rooting, factors affecting 164

rootstocks

breeding resistant (abstr) 112
 yields of Sultanas on (abstr) 52

S

Saccharomyces cerevisiae, sulfur dioxide vs 1

SADH (see succinic acid-2,2-dimethylhydrazide)

salinity in vineyards (abstr) 50

Schizosaccharomyces, use in
 winemaking (abstr) 222

Schizosaccharomyces pombe, sulfur dioxide vs 1

separation of juice 154

shoot growth

cytokinins effects on (abstr) 118
 root temperature effects on 82

slashing effects on yields 119

sodium in leaves, leafroll effects on (abstr) 117

solids content, effects on wine quality 62

sorbic acid

determination (abstracts) 54, 171, 222, 222
 effects on wine constituents 97

starch metabolism in berries (abstr) 116

stem pitting, new vine disease (abstr) 171

sterilant, dimethyldicarbonate in wine 130

sterility, male, induced by plant
 regulators (abstr) 112

stomata, physiology and photosynthesis (abstr) 117

succinic acid-2,2-dimethylhydrazide
 effects on fruitfulness and cluster
 development 47
 effects on yields (abstr) 224

sugar

in developing berries (abstr) 50
 metabolism in berries (abstr) 116

sugars

enzymes of accumulation cycle (abstr) 218

sulfites as food additives (abstr) 220

sulfur dioxide

determination in wine 25, (abstr) 219
 vs *Saccharomyces cerevisiae* 1
 vs *Schizosaccharomyces pombe* 1

T

tartaric acid

determination (abstr) 115
 recovery from still effluents (abstr) 223

tartrate, amelioration effects on 18

temperature effects on berry ontogeny (abstr) 56

Tetranychus pacificus, chemicals

toxic to (abstr) 172

thermotherapy, variations resulting (abstr) 53

thiourea effects on buds 168

tomato ringspot, virus resembling (abstr) 53

trace elements in musts and wines (abstr) 114

trellising

effects on yields 125
 type influence on yields
 (abstr) 51, (abstr) 116, (abstr) 224

2,3,5-triiodobenzoic acid in inducing
 male sterility (abstr) 112

tropical fruits for wine and vinegar
 production (abstr) 220

turbidity in wines containing calcium
 ions (abstr) 221

U

urethane detection in wine (abstr) 55

V

variability of berries 37

variegata, radiation-induced Pusa
 Seedless (abstr) 50

varietal wines, distinctiveness 5

Velsicol VCS-506 (see O-4-bromo-
 2,5-dichlorophenyl-O-methyl
 phenylphosphonothioate)

vine spacing, economic aspects (abstr) 51
vinegar, history and development (abstr) 50
virus disease
 prevention and control (abstr) 171
 resembling tomato ringspot (abstr) 53
viruses
 in grapes (abstr) 52
 heat inactivation (abstr) 53
 increasing activity of B-1,3-glucan
 hydrolase from (abstr) 117
viruslike diseases, prevention and
 control (abstr) 171
viticulture in summer-rainfall regions (abstr) 55
volatiles
 changes during wine aging 208
 in alcoholic beverages (abstr) 56
 in home-brewed beers and wines (abstr) 219
 in leaves 148

W

wastes, treatment of (abstr) 55
water stress, fruitfulness effects (abstr) 50
white wines compared with reds (abstr) 220
Willamette Valley, wine grapes in (abstr) 112
wine, popular books on (reviews) 55, 55, 55, 55,
 56, 113, 113, 114, 114, 172, 172, 218
wine quality, correlation with color density
 and anthocyanin equilibria (abstr) 171

Y

yeasts
 in Bordeaux region (abstr) 115
 nonfoaming strains for winemaking
 (abstr) 221
