

INDEX

Volume 28, 1977

AUTHORS

A

- Abawi, G. S. See J. K. Uyemoto. 28:131-6.
Aljibury, F. K. See W. L. Peacock. 28:193-5.
Alley, C. J., and J. E. Peterson. Grapevine propagation. IX. Effects of temperature, refrigeration and indole butyric acid on callusing, bud push and rooting of dormant cuttings. 28:1-7.
Amerine, M. A. See M. A. Edwards. 28:239-40.
Abstracts. 28:57,58,128,185,186,248.
Anelli, Gabriele. The proteins of musts. 28:200-3.
Ayers, R. S. See R. A. Neja. 28:16-26.

B

- Baranek, P. P. See A. N. Kasimatis. 28:8-15.
Baron, D. H. Abstract. 28:62.
Bauman, John A., James F. Gallander, and Andrew C. Peng. Research Note: Effect of maturation on the lipid content of Concord grapes. 28:241-4.
Becker, Helmut, and Michael H. Hiller. Hygiene in modern bench-grafting. 28:113-18.
Beelman, R. B., A. Gavin III, and R. M. Keen. A new strain of *Leuconostoc oenos* for induced malo-lactic fermentation in eastern grapes. 28:159-65.
See Carl W. Haeseler. 28:223-7.
Berg, H. W., and C. S. Ough. The relation of °balling to wine quality. 28:235-8.
Abstracts. 28:61,123,124.

Berlinger, M. J. See C. Loinger. 28:196-9.

Boulton, R. B. Abstracts. 28:61,123.

C

- Caputi, A. Jr. See H. L. Wildenratt. 28:145-8.
Cohen, S. See C. Loinger. 28:196-9.
Crowell, E. A. See J. F. Guymon. 28:74-8.
See Masami Onishi. 28:152-8.
Abstracts. 28:127,246.
Cummings, J. R. See J. K. Uyemoto. 28:131-6.

D

- Donnelly, D. M. Airborne microbial contamination in a winery bottling room. 28:176-81.
———. Elimination from table wines of yeast contamination by filling machine. 28:182-4.
Downton, W. J. S. Salinity effects on the ion composition of fruiting Cabernet Sauvignon vines. 28:210-14.
Dror, N. See C. Loinger. 28:196-9.

E

- Edwards, M. A., and M. A. Amerine. Research Note: Lead content of wines determined by atomic absorption spectrophotometry using flameless atomization. 28:239-40.
Else, JoAnne. See W. L. Peacock. 28:228-30.

Ewart, Andrew, and W. Mark Kliewer. Effects of controlled day and night temperatures on fruit-set, ovule fertility and fruit composition of several wine grape cultivars. 28:88-94.

F

- Flora, L. F. Storage stability of juices and jellies made from Muscadine grapes (*Vitis rotundifolia* Michx.). 28:171-5.
Freeman, Bruce M., Carlos J. Muller, R. E. Kepner, and A. Dinsmoor Webb. Some products of the metabolism of ethyl 4-oxobutanoate by *Saccharomyces fermentati* in the film form on the surface of simulated flor sherry. 28:119-22.

Fuleki, T. Abstracts. 28:248.

G

- Gallander, James F. Deacidification of eastern table wines with *Schizosaccharomyces pombe*. 28:65-8.
See J. A. Bauman. 28:241-4.
Gavin, A. III. See R. B. Beelman. 28:159-65.
Goheen, A. C. Abstracts. 28:192.
Guymon, J. F., and E. A. Crowell. The nature and cause of cap-liquid temperature differences during wine fermentation. 28:74-8.
See Masami Onishi. 28:152-8.
Abstracts. 28:187,188,189.

H

- Haeseler, Carl W., and Robert B. Beelman. Vine performance and wine quality for seventeen white wine grape cultivars grown in Erie County, Pennsylvania for three growing seasons. 28:223-7.
- Hahn, Gregory, and Phillipp Possmann. Colloidal silicon dioxide as a fining agent for wine. 28:108-12.
- Hiller, Michael H. See Helmut Becker. 28:113-18.
- Howell, Gordon S. See Basil S. Stergios. 28:34-42. 28:43-8.

I

- Iwasaki, Kazuo. See Robert J. Weaver. 28:149-51.

J

- Jensen, Fred. See W. L. Peacock. 8:228-30.
- Johnson, J. Abstract. 28:62.

K

- Kasimatis, A. N., Edward P. Vilas Jr., Frederick H. Swanson, and Paul P. Baranek. Relationship of soluble solids and berry weight to airstream grades of natural Thompson Seedless raisins. 28:8-15.
See R. A. Neja. 28:16-26.
Abstracts. 28:61,190,245.
- Keen, R. M. See R. B. Beelman. 28:159-65.
- Kepner, Richard E. See Bruce M. Freeman. 28:119-22.
Abstracts. 28:247,248.
- Kliwer, W. Mark. Effect of high temperature during the bloom-set period on fruit-set, ovule fertility and berry growth of several grape cultivars. 28:215-22.
- . Influence of temperature, solar radiation and nitrogen on coloration and composition of Emperor grapes. 28:96-103.
See Andrew Ewart. 28:88-95.
Abstracts. 28:56,57,63,128,191.
- Kunkee, Ralph E. See Michael Schütz. 28:237-44.
Abstracts. 28:60,187.

L

- Leavitt, George. See W. L. Peacock. 28:228-30.
- Little, Angela C. Pigment analysis in red and rosé grapes by tristimulus colorimetry. 28:166-70.
- Loinger, C., S. Cohen, N. Dror, and M. J. Berlinger. Effect of grape cluster rot on wine quality. 28:196-9.

M

- Mattick, L. R. See J. C. Moyer. 28:231-4.
- McDonald, J. T. Abstract. 28:248.
- McElvain, K. R. See C. W. Nagel. 28:69-73.
- Miller, R. C. See J. C. Moyer. 28:231-4.
- Morenzoni, R. A. Abstracts. 28:125.
- Moyer, J. C., R. C. Miller, and L. R. Mattick. The effects of steam stripping of grape juice prior to fermentation. 28:231-4.
- Muller, Carlos J. See Bruce M. Freeman. 28:119-22.
- Mullins, M. G. See A. Pirie. 28:204-9.
- Munyon, J. R., and C. W. Nagel. Comparison of methods of deacidification of musts and wines. 28:79-87.

N

- Nadel, B. L. Abstract. 28:129.
- Nagel, C. W., and K. R. McElvain. An analysis of the influence of pH and titratable acid in the scoring of wine. 28:69-73.
See J. R. Munyon. 28:78-87.
- Neja, R. A., W. E. Wildman, R. S. Ayers, and A. N. Kasimatis. Grapevine response to irrigation and trellis treatments in the Salinas Valley. 28:16-26.
- Noble, A. C. Abstracts. 28:59,64,127,189,190.

O

- Olmo, H. P. Abstract. 28:190.
- Onishi, Masami, J. F. Guymon, and E. A. Crowell. Changes in some volatile constituents of brandy during aging. 28:152-8.
- Ough, C. S. See H. W. Berg. 28:235-8.
Abstracts. 28:60,125,126,189,247,249.

P

- Peacock, William L., Fred Jensen, JoAnne Else, and George Leavitt. The effects of girdling and ethephon treatments on fruit characteristics of Red Malaga. 28:228-30.
- , D. E. Rolston, F. K. Aljibury, and R. S. Rauschkolb. Evaluating drip, flood, and sprinkler irrigation of wine grapes. 28:193-5.
- Peng, Andrew C. See J. A. Bauman. 28:241-4.
- Peterson, J. E. See C. J. Alley. 28:1-7.
- Pilone, Gordon J. Determination of tartaric acid in wine. 28:104-7.
- . Technical note: Continuous inline monitoring of wine for yeast and bacteria. 28:250-1.
Abstract. 28:60.
- Pirie, Andrew, and M. G. Mullins. Interrelationships

- of sugars, anthocyanins, total phenols and dry weight in the skin of grape berries during ripening. 28:204-9.

- Wolf, W. H. Abstract. 28:129.

SUBJECT INDEX

A

- Acclimation and deacclimation, of Concord grape vines. 28:34-48.
- Acid. amino, in grape msuts. 28:200-3.
(2-chloroethyl) phosphoric. See Ethephon.
deacidification methods compared. 28:79-87.
of wine by *Schizosaccharomyces pombe* yeast. 28:65-8.
fatty, in Concord grapes during maturation. 28:241-4.
fumaric, in Australian red table wine. 28:27-31.
gallic, in total phenol analysis study. 28:49-55.
indole butyric. 28:1-7.
malo-lactic, in Australian red table wine. 28:27-33.
non-volatile, changes during grape maturation. abst. 28:247.
organic, development during storage. abst. 28:57.
phenolcarboxylic, gas chromatographic analysis of. abst. 28:125.
succinic, determination of by enzymes. abst. 28:125.
tartaric. methods of determination of compared. 28:104-7.
titratable. analysis of its influence on scoring. 28:69-73.
total. effect of girdling and ethephon on Red Malaga fruit. 28:228-9.
irrigation effect. 28:21.
- Airstream grading. see Raisin.
- Air temperature. see Cold.
- Analysis. pigment, tristimulus colorimetry method. 28:166-70.
wine, various methods. 28:146.
- Anthocyanin. effect of temperature, nitrogen, solar radiation on Emperor grapes. 28:96-103.
in ripening grape skins. 28:204-9.
- Aroma, compounds. see, also, Volatiles.
apple wine, determination of. rev. 28:59.
differentiation, by gas chromatography. abst. 28:59.
using capillary glass columns. abst. 28:59.
role in bouquet formation. abst. 28:58.
some features of. rev. 28:58.
- Australian, red table wines. malo-lactic study. 28:27-33.

B

- Bacteria, detection of in bottling wine. 28:250-1.
in malo-lactic fermentation in Australia. 28:28-9.
in Pennsylvania wines. 28:159-65.
- °Balling. data use in relation to wine quality. 28:235-8.
- Bench-grafting. modern hygienic methods. 28:113-18.

- Botrytis cinerea* laccase. amino acid in and weight of. abst. 28:248.
- Bottling wine. airborne contamination. 28:176-81.
quality control in. 28:250-1.
yeast contamination. 28:182-4.
- Brandy. changes during aging, volatiles. 28:152-8.
- Bud. break, storage length and temperature effect on in cuttings. 28:149-51.
hardiness and cold. 28:34-48.
push, in grapevines. 28:1-7.
- Butanols. in distilled alcoholic beverages. abst. 28:188.

C

- Cabernet Sauvignon. irrigation effects on. 28:16-26.
trellis type effect on. 28:16-26.
salinity of water and soil effects study. 28:210-14.
- Callus formation. grapevines. 28:1-7.
in grafting. 28:113-18.
- Cap-liquid. temperature difference causes. 28:74-8.
- Carbonic maceration effects on Concord grapes. rev. 28:64.
- Chloride. level in water and soil effect on vine and fruit. 28:210-14.
- Chromatography. in lipid content studies. 28:242.
gas, use in higher alcohol study. abst. 28:246.
use in German wine analysis. abst. 28:247.
gas-liquid. in simulated flor sherry studies. 28:119-22.
- Cold, hardiness. site effect on. 28:43-8.
vine culture effect on. 28:34-42.
- Colloidal silicon dioxide as a fining agent. 28:108-12.
- Color. effect of temperature and nitrogen on Emperor grapes. 28:96-103.
girdling and ethephon effect on. 28:228-9.
- Concord grapes. see *Vitis labrusca*. see, also, Grapes.
- Corks. contamination effect on wine. abst. 28:25.
lead contamination of. 28:239-40.
- Cyanide residues. determination of by gas chromatography. abst. 28:188.

D

- Defoliation. cold hardiness effect. 28:34-42.

E

- Emperor grapes. see Grapes.
- Esters, various. in aged brandy. changes in. 28:152-8.
- Ethanol. congeners from in whiskey. abst. 28:187.
role in hydrogen sulfide formation in fermentation. 28:137-43.

- Ethephon. effect on Red Malaga fruit. 28:228-9.
Ethyl acetate, in extract of yeast. abst. 28:60.
4-oxobutanoate, metabolism of by film yeast,
sherry. 28:119-22.
- F**
- Fermentation. cap-liquid temperature differences.
28:74-8.
hydrogen sulfide formation. 28:137-44.
inhibition by DCNA. abst. 28:249.
malo-lactic. Australian red table wine. 28:27-33.
effect on growth of *Leuconostoc oenos*.
abst. 28:60.
in Pennsylvania red table wine with a new
L. oenos strain. 28:159-65.
using hydrolyzed whey. rev. 28:61.
Finishing. by colloidal silicon dioxide. 28:108-12.
Fruit-set. effect of controlled temperature and nitro-
gen. 28:88-95.
- G**
- Gas chromatography. use in brandy aging studies.
28:152-8.
Gibberellin. potassium, effect of application time.
abst. 28:56.
Girdling. effect on Red Malaga fruit. 28:228-9.
Grafting. see Bench-grafting.
Grape. acid activity in various juices. rev. 28:56.
aroma constituents of. abst. 28:189.
berry weight and raisin quality. 28:8-15.
calyptra, dry reductions. abst. 28:63.
color, composition of and temperature effect on
Emperors. 28:96-103.
Concord. carbonic maceration use effect on.
abst. 28:248.
controlled nitrogen effect on various features.
28:88-95.
controlled temperature effect on fruit-set. 28:
88-95.
copper and amino acid in catechol oxidase of.
abst. 28:248.
cropping level study. abst. 28:57.
cytokinins on. abst. 28:246.
daminozide effect on Concord. abst. 28:249.
Drepanothrips reuteri on Thompson seedless.
abs. 28:245.
enzymatic change. abst. 28:63.
Frankliniella occidentalis on. abst. 28:245.
harvest. pre- and post-treatments effects. abst.
28:246.
stage in south Africa. rev. 28:126.
hormonal effect studies. abst. 28:246.
hormone levels in dormant bud. Japan. abst.
28:128.
Idaho. economics of grape production in. abst.
28:128.
irrigation effect on. 28:16-26. 28:193-5.
juice. methyl anthranilate in. rev. 28:60.
leaf lipids. abst. 28:128.
lipid content maturation effect. 28:241-4.
Malaga, Red. girdling and ethephon effect on
fruit-set. 28:228-9.
malate metabolism in. abst. 28:191.
mechanical harvester. fruit loss economics.
abst. 28:190.
Muscadine. juice and jelly storage. 28:171-5.
petiole. relationship to yield. rev. 28:56.
polyphenoloxidase and color loss in Concords.
abst. 28:126.
quality due to irrigation type, compared. 28:
193-5.
skin ripening. various component interrelation-
ships. 28:204-9.
soluble solids and raisin quality. 28:8-15.
temperature effect on Muscadine juice quality.
abst. 28:126.
whey. clarification factors. abst. 28:123.
- Grapevine. acid in. indole butyric. 28:1-7.
anthocyanin and phenol changes with various
acids. abst. 28:62.
bench-grafting of. modern hygiene. 28:113-18.
bloom-set period. high temperature effect. 28:
215-22.
bud push. 28:1-7.
callus formation. 28:1-7.
cluster rot. effect on wine quality. 28:196-9.
Concord. cold hardiness, factors affecting. 28:
34-42. 28:43-8.
cropping and cold hardiness. effect on vine.
28:34-42.
cuttings. storage length-temperature effect.
28:149-51.
cytokinins. effect and changes on vine. abst.
28:246.
day length and temperature effect. abst. 28:56.
defoliation and cold hardiness. 28:34-42.
dying arm disorder in Australian grape vines.
abst. 28:245.
effect of CCC application. abst. 28:191.
fan leaf virus properties. abst. 28:191.
insects on. abst. 28:245.
irrigation response. 28:16-26. 28:193-5.
leaves. somatal movement in. abst. 28:63.
New York vineyards. virus diseases in. 28:
131-5.
oxidant injury. influenced by vine practices.
abst. 28:63.
patulin in moldy grapes. vine role. abst. 28:247.
Pennsylvania. quality white wine growing in.
28:223-7.
photosynthesis. productivity differences. abst.
28:62.
products in reproductive organs of grape. vine
role. abst. 28:62.
propagation of. 28:1-7.
Pratylenchus vulnus on. abst. 28:245.
Pseudomonas syringae isolated on. abst. 28:245.
quality white wine growing in Pennsylvania.
28:223-7.
refrigeration effect on. 28:1-7.

- rooting in. 28:1-7.
 rootstocks. various. 28:2-5.
 saline level. in irrigation water effect. 28:210-14.
 shoots from anther callus. Japan. abst. 28:128.
 site. effect on cold hardiness. 28:43-8.
 temperature effect on. 28:1-7.
 trellis type effect. 28:16-26. 28:39.
 type of irrigation. response compared. 28:193-5.
 U. K. different training systems of vine compared. abst. 28:63.
 ultraviolet radiation response. abst. 28:247.
 virus and virus-like diseases in New York. 28:131-5.
 in decline disease in Michigan. abst. 28:192
 wilting moisture determination. abst. 28:62.
- H**
 Hardiness. see Cold.
 High temperature effect during bloom-set period. 28:215-22.
 Hydrogen sulfide. formation from sulfur during fermentation. 28:137-44.
- I**
 Infrared spectrophotometry. in flor sherry studies. 28:119-22.
 Iron. in chronic alcoholics. abst. 28:58.
 Irrigation. drip, flood and sprinkler effects compared. 28:193-5.
 effect on vine growth and fruit yield. 28:16-26.
 overhead, effect on vine. abst. 28:245.
 Salinas Valley study. 28:16-26.
 saline level of water effect on vine. 28:210-14.
- J**
 Juice and jelly, Muscadine. storage stability of. 28:171-5.
- L**
 Lead. determination of content in wine. 28:239-40.
Leuconostoc oenos. see, also, Fermentation.
 acid reduction by. 28:79-87.
 effect of malo-lactic fermentation on. abst. 28:124.
 new strain in Pennsylvania. 28:159-65.
 Lipid. composition in Concord grapes during maturation. 28:241-4.
- M**
 Malaga, Red. see Grapes.
 Malo-lactic acid. see Acid. see Fermentation.
 Methyl anthranilate. determination of. abst. 28:187. abst. 28:247.
 Microbes. airborne in winery. 28:176-81. 28:182-4.
- Muscadine grapes. juice and jelly storage stability. 28:171-5.
 origin of. abst. 28:190.
 Musts. deacidification methods compared. 28:79-87.
 proteins of. 28:200-3.
- N**
 New York grapevines. viruses in. 28:131-5.
 Nitrogen. controlled, various effects of on grapes. 28:89-95.
 influence on the color and composition of Emperor grapes. 28:96-103.
- O**
 Oils, essential. in champagne grapes. abst. 28:59.
 Ovule fertility. controlled temperature-nitrogen effect on. 28:88-95.
 high temperature at bloom-set effect on. 28:215-22.
- P**
 Pennsylvania. growing quality white wine grapes in. 28:223-7.
 pH. analysis of its influence on wine scoring. 28:69-73.
 in grape musts. 28:202.
 in malo-lactic fermentation, Australian. 28:27-33.
 Phenols, total. automation vs. manual analysis of. 28:49-55.
 in ripening grape skin. 28:204-9.
 Phytotron, use in. color studies. 28:96-103.
 controlled temperature-nitrogen on grape studies. 28:89-95.
 high temperature at bloom-set studies. 28:215-22.
- Pierce's disease. host plant choice. abst. 28:61.
 Pigment analysis. red and rosé by tristimulus colorimetry. 28:166-70.
 Protein. of grape musts. 28:200-3.
 Pruning. effect on cold hardiness. 28:34-42.
- Q**
 Quality control. in bottling wines. 28:250-1.
- R**
 Raisin. quality grading from fresh fruit data: 28:8-15.
 production of in Australia. rev. 28:186.
 Riesling. Clare, identification of. abst. 28:186.
 response to trellis and pruning. abst. 28:191.
 Root stock. grafting hygiene. 28:113-18.
 propagation of various. 28:2-5.
 salinity of water and soil role. 28:210-14.
 Rooting, grapevines. cuttings after cold storage. 28:149-51.
 dormant. 28:1-7.
 Rot, cluster. effect on wine quality. 28:196-9.

S

- Saccharomyces fermentati*, film. in sherry study. 28:119-22.
- Salinity. effect on vine. 28:210-14.
- Schizosaccharomyces pombe*. effect on table wine. 28:65-8.
- Seed. dormancy and endogenous growth. abst. 28:56.
- Sensory analysis. °Balling effect. 28:235-8.
deacidification methods. 28:85.
cluster rot wine quality effect. 28:196-9.
malo-lactic fermented red wine in Pennsylvania. 28:159-65.
Pennsylvania grown white wine. 28:226-7.
pH and titratable acid influence. 28:69-73.
untrained tasters. rev. 28:249.
wines from steam stripped grape juice. 28:233-4.
- Sherry, flor, simulated. some film yeast metabolic products. 28:119-22.
- Site. effect on cold hardiness in vines. 28:43-8.
- Sodium. level in water and soil effect on vine and fruit. 28:210-14.
- Solar radiation. effect on color and other factors in Emperor grapes. 28:96-103.
- Soluble solids. raisin quality. 28:8-15.
ripening grapes. 28:204-9.
temperature - nitrogen control effect. 28:90. 28:96-105.
- Spectrophotometry, atomic absorption. use in lead determinaton in wine. 28:239-40.
- Steam stripping of juice. effect on wine quality. 28:231-4.
- Storage, stability. Muscadine juice and jelly. 28:171-5.
- Sugar. ripening grape skins. 28:204-9.
role in cap-liquid temperature differences in fermenting wine. 28:74-8.
- Sulfur dioxide. in malo-lactic fermentation. Australia. 28:30.
- Sulfur. elemental. and hydrogen sulfide formation from. 28:137-44.

T

- Taste testing. see Sensory analysis.
- Temperature control studies. effect of high temperature at bloom-set. 28:215-22.
influence on color and composition of Emperor grapes. 28:96-103.
various effects on grapes. 28:89-95.
- Thompson seedless. raisin. grading study. 28:8-15.
see, also, Grapes.
- Total phenol. see Phenol.
- Trellis. cold hardiness effect. 28:34-42.
type effect on grapevine. 28:16-26.
- Tristimulus colorimetry. in pigment analysis. 28:166-70.

V

- Virus. activation of. abst. 28:186.
disease in New York grapevines. 28:131-5.
grafting hygiene. 28:113-8.
- Vitis flexuosa*. anthocyanins in. abst. 28:249.
- Vitis labrusca*. cold hardiness studies. 28:34-42. 28:43-8.
lipid content maturation effect. 28:241-4.
in steam stripping of juice studies. 28:231-4.
- Vitis rotundifolia* Michx. see Muscadine grapes.
- Volatiles. components in brandies, changes by aging. 28:152-8.

W

- Water, use efficiency of irrigation type compared. 28:193-5.
- Wine. activity of C_x enzyme. abst. 28:61.
advice for salesmen. rev. 28:58.
amino acids and higher alcohols in. abst. 28:125.
analysis of. collaborative study. 28:145-8.
apple. haze and sediment in, clarified. abst. 28:124.
aroma, head space constituents. rev. 28:189.
Australian, red table. malo-lactic study. 28:27-33.
°Balling. relation to quality. 28:235-8.
behavior study on rats. abst. 28:187.
books on. American, introduction to. rev. 28:127.
building a winery. rev. 28:186.
of Burgundy. rev. 28:57.
of California, popular. rev. 28:185.
compact guide to. rev. 28:185.
do it yourself guide. rev. 28:186.
drinking of. rev. 28:185.
eating in the United States. popular. rev. 28:185.

French, introduction to. rev. 28:248.
general interest in. rev. 28:58.
history of early use of. rev. 28:186.
Italy, D. O. C. rev. 28:57.
inexpensive wines. rev. 28:128.
Jefferson's interest in. rev. 28:186.
McCabe's compendium. rev. 28:57.
medieval times. rev. 28:185.
New York. popular. rev. 28:185.
New Zealand. rev. 28:186.
science and technique of. French. technical. rev. 28:127.
South Africa. rev. 28:185.
Spain. rev. 28:57.
cluster rot. quality effect. 28:196-9.
consumption of and price of. abst. 28:190.
contamination of from lead capsule. 28:239-40.
coumarin. determination of in. abst. 28:127.

- deacidification methods, compared. 28:79-87.
 diethylcarbonate, determination of. abst. 28:188.
 dimethyl sulfide in, determination of. rev. 28:189.
 distillate head treatment. absts. 28:123,124.
 ethanol in human nutrition. abst. 28:248.
 fermentation, cap-liquid temperature differences. 28:74-8.
 fining, by colloidal silicon dioxide. 28:108-12.
 filterability method evaluation. abst. 28:125.
 flavored, gas chromatographic determination of diol and glycerol. abst. 28:126.
 higher alcohol, must amino acid relation. abst. 28:127.
 hydrogen sulfide, formation during fermentation. 28:137-44.
 industry in New York state. rev. 28:61.
 lead content, determination of. 28:239-40.
 making and brewing. rev. 28:60.
 mineral content of. abst. 28:247.
 New Zealand, dry white, chemical composition of. abst. 28:126.
 Pb and Cd, determination of in. abst. 28:127.
 Pennsylvania, quality white wine growing in. 28:223-7.
 red table and induced malo-lactic fermentation. 28:159-65.
 pH and titratable acid influence on wine scoring. 28:69-73.
 phenol, total, analysis of, automation vs. manual. 28:49-55.
 Philippine fruit, properties of. abst. 28:60.
 pigment analysis of in red and rosé. 28:166-70.
 protein, turbidity in. 28:200-3.
 quality control in bottling. 28:250-1.
 quality, cluster rot effect study. 28:196-9.
 salinity of water and soil effect on. 28:210-14.
Schizosaccharomyces pombe, effect on. 28:65-8.
 science and technique of, technical. rev. 28:127.
 sorbic acid, determination of by gas liquid chromatography. abst. 28:188.
 steam stripping of juice, effect on quality. 28:231-4.
 starch degradation products in apple wine. rev. 28:61.
 sweet, total phenol analysis procedures. 28:53-4.
 tartrates in. abst. 28:124.
 variety analysis by multiple discriminants. abst. 28:189.
 wastes, value as fuel. rev. 28:189.
 white, color measurement in. abst. 28:187.
 growing of in Pennsylvania. 28:223-7.
 yeast, bacteria detection in. 28:250-1.
 in forming hydrogen sulfide. 28:137-44.
 Winery, contamination in by airborne organisms. 28:176-81. 28:182-4.
 stillage treatment. rev. 28:123.
 waste water treatment. rev. 28:123.
