

INDEX

Volume 29, 1978

AUTHORS

A

- Acree, T. E. See R. R. Nelson. 29:83-6.
- Addeo, F., G. Nota, and L. Chianese. Gas chromatographic determination of cyanide in wines. 29:7-10.
- Amerine, M. A. See T. B. Selfridge. 29:1-6.
Abstracts. 29:139,140. Reviews. 29:69,224,296.
- Arnold, R. A., and A. C. Noble. Bitterness and astringency of grape seed phenolics in a model wine solution. 29:150-2.

B

- Ballinger, W. E. See D. E. Carroll. 29:169-71.
- Beelman, R. B. See C. W. Haeseler. 29:120-4.
- Berg, H. W. See J. T. Williams. 29:92-6.
Abstracts. 29:140, 141, 296.
- Bertrand, G. L., W. R. Carroll, and E. M. Foltyn. Tartrate stability of wines. I. Potassium complexes with pigments, sulfate, and tartrate ions. 29:25-9.
- Blennerhassett, R. M., and J. A. Considine. Propagation of *Vitis champini* Planchon cv Ramsey. Seasonal and temperature effects in comparison with *V. vinifera* L. cv Sultana. 29:199-206.
- Boulton, R. Research note: Preliminary studies with coated-wire electrodes for malate, lactate, and tartrate ions in model solutions. 29:289-91.
Abstracts. 29:64,69,224.
- Bowers, K. W. See L. A. Lider. 29:18-24.
- Buechsenstein, J. W., and C. S. Ough. SO₂ determination by aeration-oxidation: A comparison with Ripper. 29:161-4.
- Byrne, M. E., and G. S. Howell. Initial response of Baco noir grapevines to pruning severity, sucker removal, and weed control. 29:192-8.

C

- Carroll, D. E., W. E. Ballinger, W. F. McClure, and W. B. Nesbitt. Wine quality versus ripeness of light-sorted Carlos muscadine grapes. 29:169-71.
- Carroll, W. R. See G. L. Bertrand. 29:25-9.
- Chen, S. L. See G. Reed. 29:165-8.

- Chianese, L. See F. Addeo. 29:7-10.
- Christensen, P., and F. L. Jensen. Grapevine response to concentrate and to dilute application of two zinc compounds. 29:213-15.
- Considine, J. A. See R. M. Blennerhassett. 29:199-206.
- Cordner, C. W., and C. S. Ough. Prediction of panel preference for Zinfandel wine from analytical data: Using difference in crop level to affect must, wine and headspace composition. 29:254-7.
- , C. S. Ough, A. N. Kasimatis, and J. J. Kissler. Effects of crop level on chemical composition and headspace volatiles of Lodi Zinfandel grapes and wines. 29:247-53.
- Crowell, E. A. See M. Onishi. 29:54-9.
Abstract. 29:64.

D

- De Smedt, P. and P. A. P. Liddle. Research note: Identification of 1,1'-diethoxypropan-2-one in spirits aged in wood. 29:286-8.
- Dye, M. H. Abstract. 29:222.

F

- Ferrari, N. L. See L. A. Lider. 29:18-24.
- Foltyn, E. M. See G. L. Bertrand. 29:25-9.

G

- Gray, R. S. See J. D. Malan. 29:125-8, 129-34, 135-6.
- Griffin, T. G. See D. B. Moore. 29:50-3.
- Groat, M., and C. S. Ough. Effects of insoluble solids added to clarified musts on fermentation rate, wine composition, and wine quality. 29:112-19.
- Guymon, J. F. See M. Onishi. 29:54-9.

H

- Hackler, L. R. See R. M. Kluba. 29:102-11, 181-6.

Ziemelis, G., and T. C. Somers. Research note: Rapid determination of sorbic acid in wine. 29:217-19.

SUBJECT INDEX

A

- Acetal, isomeric cyclic, of glycerol and acetaldehyde, identification in Spanish sherry. 29:207-12.
- Acid, abscisic, effect of drought and irrigation on. 29:239-46.
 amino. see Amino.
 gibberellic. see Gibberellin.
 hydroxycinnamic and tartaric ester, in mature White Riesling. 29:277-81.
 malic. temperature effect on metabolism. 29:145-9.
 sorbic. colorimetric method ruggedness. abst. 29:223.
 rapid determination of in wine. 29:217-18.
 rapid determination, presence of benzoic acid. rev. 29:225.
 yeast strain tolerance. 29:272-6.
- Aeration-oxidation in SO₂ determination in wine. 29:161-4.
- Alcohol, leaf, in macerated must, cause and fate of. 29:11-19.
- Aldehyde, leaf, in macerated grape must, cause and fate of. 29:11-19.
- Amino, acid. changes of free and total in maturation. 29:102-11.
 changes of free and total in concentration during fermentation. 29:181-6.
 on Fixion 50x8 layer. effect on. abst. 29:67.
- Anthocyanin pigments. colorimetry of. abst. 29:220.
 in *V. vinifera*, separation and identification of. 29:42-9.

B

- Base buds, structure and yield. 29:36-41.
- Beer, fatty acid chain length origin in. abst. 29:67.
- Berry. set, grape. see Fruit-set.
 weight, fruit-set through vinification. 29:30-5.
- Blending. use of computer technology. 29:50-3.
- Botrytis cinerea*. pollen effect on germination of. abst. 29:66.
- Brandy. cognac, wood aged, 1,1'-diethoxypropan-2-one in. 29:286-8.
 congeners and authenticity. abst. 29:24.
 1,1'-diethoxypropan-2-one in wood aged spirits. 29:286-8.
 of Thompson Seedless and other white wine, comparative composition. 29:54-9.

C

- C₆ compounds, from leaf, in macerated must, cause and fate. 29:11-19.
- Calcium double-salt precipitation in must deacidification. 29:153-60.
- Cane, grape. see Grape.
- Catechol oxidase. in grape berry set through vinifica-

tion. 29:30-5.

- Champagne. aroma substances of. rev. 29:225.
- Chromatography, gas. acetal identification in Spanish fino sherry. 29:207-12.
 gas analysis of headspace volatiles in alcoholic beverages. abst. 29:220.
 brandy, comparative composition of. 29:56-9.
 compound identification in Concord wine. 29:83-6.
 and Concord wine composition study. 29:83-6.
 crop level and headspace volatiles analysis. 29:247-53.
 cyanide determination. 29:7-10.
 leaf volatiles in must. 29:11-19.
- gas-liquid. β -asarone determination. abst. 29:143.
 urethane determination. abst. 29:68.
- liquid, high pressure. and aflatoxin identification. abst. 29:143,295.
 anthocyanin separation in *vinifera*. 29:42-4.
- Clarification. juice treatment, quality effect. abst. 29:140.
 method effect on white wine quality. 29:92-6.
- Computer analysis, and blending. 29:50-3.
- Concord, grapevine. see Grape.
 wine. see, also, Wine.
 maturity and processing effect on. 29:83-6.
- CO₂ fixation, net dark, temperature effect on grape berries. 29:145-9.
- Crop level, as predictor of wine quality, Zinfandel. 29:267-71.
- Crushers. pin-mill and roller types compared. 29:125-36.
- Cyanide. determination of in wine. 29:7-10.

D

- Diacetyl, odor threshold in artificial wine media. 29:1-6.
- 1,1'-diethoxypropan-2-one, in wood aged spirits. 29:286-8.
- Dimethyl carbonate. yeast growth control. 29:60-2.
- Drought. effect on *V. labruscana*. 29:239-46.

E

- Electrodes, coated-wire. in analysis of malate, lactate and tartrate ions. 29:289-91.
- Ethanol. yeast growth control. 29:60-2.
- Ethyl acetate. odor threshold in artificial wine media. 29:1-6.
- Ethylene, endogenous, production of. effect on grape plant and berry. 29:282-5.

F

- Fermentation. activity to evaluate dry wine yeast.

- 29:165-8.
 amino acid in, free and total changes in rate.
 29:181-6.
 continuous, slant tubes. rev. 29:69.
 rate. addition of insoluble solid effect. 29:112-19.
- Fructose. see Sugar, reducing.
- Fruit-set. gibberellin effect on. 29:72-8.
- Fumigation, soil. effect on vine growth and yield.
 29:97-101.
- G**
- Gibberellin. cluster development and yield in Concord.
 abst. 29:69.
 effect on. berry size, shatter and texture.
 Thompson Seedless. 29:258-62.
 berry size, yield and compactness. abst. 29:67.
 fruit-set and development in Thompson Seed-
 less and Zinfandel. 29:79-82.
 soluble solids and berry weight. 29:263-6.
 seedless berry development. abst. 29:292.
- Glucose. see Sugar, reducing.
- Graft. see Rootstock.
- Grape. American species of *Vitis*. 29:74-8.
 Baco noir vines. various treatment responses.
 29:192-8.
 base buds and yield. 29:36-41.
 bird damage survey. abst. 29:64.
 black rot, chemical eradication. abst. 29:68.
 brandy. comparative composition. 29:54-9.
 buds. effect of node number per cane. 29:229-32.
 primary and cold hardiness. abst. 29:68.
 canes. dormant, isoperoxidases changes in.
 29:137-8.
 effect on growth of node number. 29:229-32.
 catechol oxidase activity in. 29:30-5.
 cold, damage. node number. 29:229-32.
 hardiness and productivity. 29:187-91.
 commercial pest control residues on. abst. 29:223.
 Concord. maturity effect on wine. 29:83-6.
 node number effect on growth and develop-
 ment. 29:229-32.
 quality control. abst. 29:283.
 crusher types compared. 29:125-36.
 ethephon, effect on Delight. abst. 29:294.
 Ethrel, effect on Gulabi and Bungalore purple.
 abst. 29:139.
 ethylene production in and effect on. 29:282-5.
 fungicide, bactericide spray effect on. abst. 29:222.
 gibberellic acid effect. berry weight. 29:263-6.
 Thompson Seedless. 29:258-66.
 on fruit-set and development. 29:79-82.
 glycolysis control and ripening. abst. 29:65.
 grafting, rootstock type and longevity, growth and
 productivity. 29:18-24.
 growth substances, natural in Anab-e-Shahi. abst.
 29:142.
 Japanese. proteins in. abst. 29:223.
 juice. yeast strain, sorbic acid tolerance. 29:272-6.
 extraction equipment for wineries. abst.
 29:140.
 leaf, macerated. C₆ compounds in. 29:11-17.
 malic acid metabolism, temperature influence, net
 dark CO₂. 29:45-9.
 maturity, Concord, effect on wine composition.
 29:83-6.
 must, cause and fate of. 29:11-17.
 nodes per cane. effect on growth and development,
 Concords. 29:229-32.
 pectin. methyl esterase of. abst. 29:223.
 Pennsylvania. four cultivars performance and
 wine quality. 29:120-4.
 polyglacturonase properties. abst. 29:221.
 potassium. content of. abst. 29:292.
 and malate-tartrate content. abst. 29:66.
 pre- and post-harvest control treatments on
 Anab-e-Shahi. abst. 29:139.
 proteolytic enzymes in. abst. 29:296.
 pruning, time and spraying effect on Sultanas.
 29:233-8.
 control nodes per cane. 29:229-32.
 rootstock and longevity, growth and production.
 29:18-24.
 seed phenolics. bitterness and astringency.
 29:150-2.
 skins. elasticity of. abst. 29:64.
 sodium chloride effect on growth and fruiting.
 29:172-6.
 soil fumigation effect on growth and yield. 29:97-
 101.
 sucrose occurrence and inversion of. abst. 29:65.
 taxonomy of. 29:74-8.
Vitis labrusca. amino acid changes during matura-
 tion. 29:102-11.
 White Riesling. hydroxycinnamic, tartaric acid es-
 ters in. 29:277-81.
 zinc compounds, response to application of.
 29:213-16.
- Grape juice extraction equipment. for wineries. abst.
 29:140.
- Grapevine. anlagen origin and development. abst.
 29:292.
 cane pruning and yield. abst. 29:69.
 chloride accumulation in. abst. 29:292.
 cold resistance. Concord and yield. 29:187-92.
 damage, node number. 29:229-32.
 Concord. effect of various treatments on quality
 and yield. abst. 29:222.
 drought and irrigation effect on photosyn-
 thesis, etc. 29:239-46.
 crop level. effect on headspace volatiles. Zinfandel.
 29:247-53.
 nutrient reserve. abst. 29:293.
 Zinfandel, effect on quality prediction.
 29:254-7.
 crown, radiation regime photometric characteris-
 tics. abst. 29:221.
 dead arm-affected vines in New York and Canada.
 abst. 29:142.
 dieback, cause of. abst. 29:293.
 disease in New York. abst. 29:64.
 diseases of. virus and viruslike, rapid detection of.
 abst. 29:222.

- ethylene production in, effect on. 29:282-5.
 leaf. fruit removal effect on. abst. 29:222.
 infections, factors affecting. abst. 29:222.
 oidium in buds. abst. 29:141.
 overcropping. base buds and yield. 29:36-41.
 performance and wine quality of four cultivars in
 Pennsylvania. 29:120-4.
 photosynthesis. respiration changes in leaves and
 berries. abst. 29:65.
 salt stress. abst. 29:67.
 Pierce's disease. cold therapy. abst. 29:142.
 lactobacillus role. abst. 29:294.
 pruning. arched cane system. abst. 29:293.
 Baco noir response to. 29:192-8.
 cold resistance and yield. 29:189-91.
 increased yield in Concords. abst. 29:293.
 trellising, harvest. effects of in Sultanas. abst.
 29:142.
 sensory test prediction, Zinfandel. crop level effect.
 29:254-7.
 sodium chloride effect on growth and fruiting of
 Cabernet Sauvignon. 29:172-6.
 soil fumigation effect on growth and yield. 29:97-
 101.
 sucker control in Baco noir grapes. 29:192-8.
 Sultana. node per cane effect on growth and devel-
 opment. 29:229-32.
 pruning time and spray effect on. 29:233-8.
verticillium dahliae, in California. abst. 29:294.
α-viniferin in. abst. 29:65.
 weed control in Baco noir vines. 29:192-8.
 zinc compound application response. 29:192-8.
 Zolone residues in. abst. 29:141.
- I**
- Ions. malate, lactate and tartrate analysis with
 coated-wire electrodes. 29:289-91.
 Irrigation effect on *Vitis labrusca*. 29:239-46.
 Isoperoxidase pattern change in dormant canes of
 Thompson Seedless. 29:137-8.
- K**
- KGA₃. see Gibberellin.
 Kovat's indices, in sherry acetals identification.
 29:207-12.
- L**
- Leaf. see, also, Grapevine.
 C₆ compounds in must, cause and fate of. 29:11-19.
 Plasmopara viticola in. abst. 29:68.
 tartrate conversion in. abst. 29:64.
 Leafhopper. new species of. abst. 29:139.
- M**
- Maturation. amino acid changes during in *V. labrusca*.
 29:102-11.
 berry weight, sugar and catechol oxidase in dur-
 ing. 29:30-5.
 Methyl anthranilate. variation in Concord vine.
 29:83-6.
 Molds. preservatives for control of effect. abst. 29:224.
- Must. amino acid, free and total in *V. labrusca* in fer-
 mentation. 29:181-6.
 clarification method influence on white wine.
 29:92-6.
 clarified. insoluble solid addition effect. 29:112-19.
 crusher type effect on. 29:125-8.
 deacidification of by calcium double salt precipita-
 tion of. 29:153-60.
 head space volatiles analysis. crop level effect.
 29:247-53.
 macerated leaf, C₆ compounds on. 29:11-19.
- N**
- Nematodes. see, also, Grapevine.
 characteristics of egg of. abst. 29:222.
- P**
- Pennsylvania. four cultivars vine performance and
 wine quality. 29:120-4.
 pH. yeast growth control in wine. 29:60-2.
 Phenolic compounds. berry set through vinification.
 29:30-5.
 grape seed. 29:150-2.
 Photosynthesis. effect of drought and irrigation on.
 29:239-46.
 Phylloxera. see Rootstocks.
 Pigments. see Anthocyanins.
 Potassium gibberellin. see Gibberellin.
 Pruning. see Grapevine.
- R**
- Roots. cytokinins, changes in. abst. 29:67.
 grape. nematode infected and cis-1,2-
 dichloropropene. abst. 29:63.
 Rootstock. influence on chloride, sodium and potas-
 sium in vine. abst. 29:292.
 longevity, growth and productivity. 29:18-24.
 phylloxera galls on grape leaves. abst. 29:63.
 sensitivity to phosphate induced zinc deficiency.
 abst. 29:63.
 type. effect on growth and yield of vine in fumi-
 gated soil. 29:97-101.
