INDEX
VOLUME 33, 1982

AUTHORS

A

Ahmedullah, M., and W. H. Wolfe. Control of sucker growth on *Vitis vinifera* L. cultivar Sauvignon blanc with naphthaleneacetic acid. 33:198-200.

Amerine, M. A. Abstracts 33:57, 130, 182, 237, 238. Reviews. 33:183, 238, 239, 240.

Amistoso, J. L. See C. W. Nagel. 33:75-9.

B

Ballinger, W. E., and W. B. Nesbitt. Postharvest decay of muscadine grapes (Carlos) in relation to storage temperature, time, and stem condition. 33:173-5.

Barbetti, S. F. Abstract. 33:128-9.

Bendel, R. B. See C. W. Nagel. 33:75-9.

Bottacin, A. See P. Spettoli. 33:1-5.

Brien, C. J. See B. A. Bruer. 33:159.
See P. May. 33:214-21.

Brown, M. R., and C. S. Ough. Effects of two different pectic enzyme preparations, at several activity levels, on three pectin fractions of a white must. 33:41-3.

Bruer, B. A., D. R. G. Bruer, and C. J. Brien. Shelf life of some common winery laboratory reagents. 33:159-63.

Bruer, D. R. G. See B. A. Bruer. 33:159-63.

C

Caputi, A. Review. 33:58.

Carroll, D. E., and J. R. Marcy. Chemical and physical changes during maturation of muscadine grapes (Vitis rotundifolia). 33:168-72.
See J. E. Marcy. 33:176-7.

Casoli, A., and O. Colagrande. Use of high-performance liquid chromatography for the determination of amino acids in sparkling wines. 33:135-9.

Cawthon, D. L. See J. R. Morris. 33:145-8.

Charpentier, C. See M. Feuillat. 33:6-13.

Clingeleffer, P. R. See P. May. 33:314-21.

Colagrande, O. See A. Casoli. 33:135-9.

Considine, J. A. See M. T. Treeby. 33:53-6.

D

Dagna, L., G. Gasparini, M. L. Icardi, and E. Sesia. Study of some components of the unsaponifiable fraction in the skin of grapes. 33:201-6.

Davis, C. R., G. H. Fleet, and T. H. Lee. Inactivation of wine cork microflora by a commercial sulfur dioxide treatment. 33:124-7.

DeStoto, R. T. See S. A. Kupina. 33:67-74.

E

Eschnauer, N. Trace elements in must and wine: Primary and secondary contents. 33:226-30.

Ethiraj, S., and E. R. Suresh. Research note. The proline content of some experimental wines made in India. 33:231-2.

Evans, W. D. See A. G. Reynolds. 33:14-9.

F

Fagan, G. L., R. E. Kepner, and A. D. Webb. Additional volatile components of palomino film sherry. 33:47-50.

Famuyiwa, O., and C. S. Ough. Grape pomace: Possibilities as animal feed. 33:44-6.

Ferrari, N. L. See G. N. McIntyre. 33:80-5.
See C. P. Meredith. 33:154-8.

Ferris, H., S. M. Schneider, and M. C. Stuth. Probability of penetration and infection by root-knot nematode, *Meloidogyne arenaria,* in grape cultivars. 33:31-5.

Zamorani, A. See P. Spettoli. 33:1-5.

SUBJECT INDEX

A

Acetic acid. See acid.
Acid. acetic. gas chromatic measurement of. 33:67-74.
amino. HPLC determination in sparkling wine. 33:135-9.
malic. monoethylester of. abst. 33:129.
naphthaleneacetic. for control of sucker growth. 33:194-7.
organic. rapid method for the determination of, in musts. 33:176-7.
in wines of Jerez. rev. 33:238.
sorbic. as a wine preservative. rev. 33:130.
tartaric, monoethylester of. abst. 33:129.
Alcoholic fermentation. by immobilized yeast at high sugar concentrations. abst. 33:238.
heat release in. 33:149-53.
Analysis. decolorizing wines for. 33:60.
methods of, for musts and wines. rev. 33:58.
of variance procedures. 33:131-4.
Argenine. effect of light regime and nitrate fertilization on concentration in grapevines. 33:86-93.
Assimilates, mobilization of. influence of source strength. 33:207-13.
Autolysis. of yeasts in champagne. 33:6-13.

B

Barbera. effects of ethephon on buds and shoots. 33:164-7.
Bordeaux. rev. 33:239.
Botrytis cinerea. radioimmunosorbent assay for. abst. 33:181.
substrate surface and appressoria formation. abst. 33:181.
Bottling, cold-sterile. sources of reinfections. 33:140-4.
Buds. ethephon influence on. 33:164-7.
scale removal. effect on budbreak. abst. 33:128-9.

C

Cabernets. consumer's guide to. abst. 33:238.
Carbohydrate. metabolism in *V. champini* planchon cv. Ramsey. 33:53-6.
Carbon dioxide. automated thermal conductivity determination. abst. 33:237.
Carignane. effects of ethephon on buds and developing shoots. 33:164-7.
Cellular variation. in grape seedlings. abst. 33:237.
Champagne. autolysis of yeasts. 33:6-13.
Chromosome number. in grape seedlings. abst. 33:237.
Chromatography. gas. for measurement of acetic acid in wines. 33:67-74.
high performance liquid. to determine amino acids in sparkling wines. 33:135-9.
Climatic region. influence on diurnal fluctuation of leaf water potential, stomatal conductance, and leaf temperature. 33:233-6.
Cold-sterile bottling. sources of reinfections. 33:140-4.
Concord. effects of growing conditions on grapes. 33:145-8.
vineyard microclimate. effects of pruning, training, and shoot positioning on. 33:99-108.
relation to yield expression. 33:109-16.
Consumer's guide. to Cabernets. abst. 33:238.
Corks, wine. SO_2 treatment for microflora. 33:124-7.
Corkscrews. rev. 33:240.

D

Decay, postharvest in muscadine. 33:173-5.
Decolorizing wine. 33:60.
Dimethyl dicarbonate. effect on *Saccharomyces cerevisiae* Montrachet No. 522. 33:222-5.
Dimethyl sulfide. distribution in some New Zealand wines. abst. 33:57.

E

Elements. trace. in must and wine. 33:226-30.
Enology. present interests in. rev. 33:57.
Enzyme preparations. pectic. effect on pectin fractions of white must. 33:41-3.
Ester. See also volatile esters.
concentration. influence of yeast species and strains. 33:94-8.
Ethephon. effect on buds and developing shoots. 33:164-7.
Ethanol. effect of viability of *Saccharomyces cerevisiae* Montrachet No. 522. 33:222-5.
Eutypa armeniacae. protection of grapevine pruning wounds. 33:51-2.

F

Feed, animal. use of grape pomace. 33:44-6.
Fermentation, alcoholic. by immobilized yeast at high sugar concentrations. abst. 33:238.
continuous. rev. 33:183.
heat release. 33:149-53.
malolactic. effect of insoluble solids on rate. 33:194-7.
temperature and pH effects on volatile substances formed by yeast. abst. 33:237.
Fermentors, rotary. rev. 33:238.
Fertilization. nitrate. influence on nitrate reductase and nitrate and argenine concentratons. 33:86-93.
Flavens. compositional changes during grape maturation. abst. 33:128.
French wines. See wines.
Fruit load. effect on Concord grapes. 33:145-8.

G

Gas chromatography. See also chromatography.
measurement of acetic acid in wine. 33:47-74.
Glycerol. production of *Saccharomyces.* 33:36-40.
Grapes. California. rev. 33:238.
maturation. compositional changes in flavens. abst. 33:128.
seedlings. cellular variation in chromosome number. abst. 33:238.
skins. unsaponifiable fraction. 33:201-6.
table. removing SO_2 from atmospheres of. 33:61-6.

Grapevines. See also vines and grapes.
Barbera. ethephon effect on buds and shoots. 33:164-7.
California. rev. 33:238-
carbohydrate metabolism and cutting performance in *V. champini.* 33:53-6.
Carignane. ethephon effects on buds and shoots. 164-7.
Concord. irrigation, fruit load and K fertilization effects. 33:145-8.
vineyard microclimate effects. 33:99-116.
ethephon effects on buds and developing shoots. 33:164-7.
Eutypa armeniacae infection of pruning wounds. 33:51-2.
management techniques during years of low winter rainfall. 33:117-23.
metabolism. effect on mutagenicity of pesticides. 33:178-80.
mobilization of assimilates. 33:207-13.
muscadine. changes during maturation. 33:168-72.
postharvest decay. 33:173-5.
Muscat of Alexandria. abst. 33:57.
New York. pruning wound infection. 33:51-2.
nitrate reductase activity and nitrate and aregnine in tissues. 33:86-93.
phenology. chronological classification. 33:80-5.
propagation of *V. champini* planchon cv. Ramsey. 33:53-6.
pruning wound infection by *Eutypa armeniacae.* 33:51-2.
root-knot nematode penetration and infection. 33:31-5.
Sauvignon blanc, control of sucker growth with napthaleneacitic acid. 33:189-200.
Shiraz. effect of vine spacing and trellising. 33:20-30.
sucker growth. control with naphthaleneacetic acid. 33:198-200.
Sultana. pruning to long spurs. 33:214-21.
Tokay, effects of ethephon on shoots and buds. 33:164-7.
vine spacing and trellising effects on Shiraz. 33:20-30.
windbreak and climatic region influence on. 33:233-6.
Xiphinema index tolerance. 33:154-8.
Zante. response to cane and harvest pruning. 33:185-90.

H

Heat release. in alcoholic fermentation. 33:149-53.

I

Immobilized yeasts. fermentation at high sugar concentrations. abst. 33:238.
Inoculation efficiency. component of resistance to Pierce's disease. abst. 33:237.
Insoluble solids. effects on SO_2 content and rate of malolactic fermentation. 33:194-7.
Irrigation. effect on Concord grapes. 33:145-8.
Italian wine. See wine.

J

Jerez. organic acids in wines from. rev. 33:238.

K

Kiwifruit wine. 33:191-3.

L

Laboratory, winery. Shelf life of reagents. 33:159-63.
Leaf. temperature. influence of windbreaks and climatic regions on. 33:233-6.
water potential. influence of windbreaks and climatic region on. 33:233-6.
Leuconostoc Oenos ML 34. immobilization of. 33:1-5.
Light regime. influence on nitrate reductase activity and concentrations of nitrate and argenine. 33:86-93.
Lipids. in production of dried grapes. rev. 33:183.

M

Malic acid. See acid.
Malolactic fermentation. effect of insoluble solids on rate. 33:194-7.
Meloidogyne arenaria. probability of infection in grapevines. 33:31-5.
Metabolism. carbohydrate. in *V. champini.* 33:53-6.
grapevine. effects on mutagenicity of pesticides. 33:178-80.
Methyl anthranilate. inheritance in *Vitis* spp. 33:14-9.
Microbiology. techniques for wine. 33:238.
Microclimate. Concord vineyard. effects of pruning, training, and shoot positioning. 33:99-108.
relation to yield expression. 33:109-16.
Microflora. wine cork. SO_2treatment. 33:124-7.
Mobilization of assimilates. 33:207-13.
Monoethylester of tartaric and malic acids in wines. abst. 33:129.
Muscadine grapes. changes during maturation. 33:168-72.
postharvest decay. 33:173-5.
Muscat of Alexandria. effects of bud scale removal, $CaCN_2$, GA_3, and ethephon on bud break. abst. 33:57.
Must. organic acids in. 33:176-7.
methods of analysis. rev. 33:58.
trace elements in. 33:226-30.
Mutagenicity. of pesticides. 33:178-80.

N

Naphthaleneacetic acid. See acid.
Nematode, root-knot. probability of infection in grape cultivars. 33:31-5.
New Zealand wines. dimethyl sulfide in. abst. 33:57.
Nitrate fertilization. influence on nitrate reductase activity and nitrate and argenine concentrations. 33:86-93.
reductase activity. effect of light regime and nitrate fertilization. 33:86-93.

O

Organic acids. in wines of Jerez. rev. 33:238.
rapid method for determination in musts. 33:167-7.

P

Palomino film sherry. violatile components. 33:47-50.
Partitioning. assimilates. 33:207-13.
Pectic enzyme preparations. effect on pectin fractions of white must. 33:41-3.
Pectin fractions. effects of pectic enzyme preparations. 33:41-3.
Pesticides. effects of grapevine metabolism on mutagenicity. 33:178-80.
p-fluorophenolalanine. abst. 33:237.
pH. effect on quality of dry white wines. 33:75.
  temperature and, effects on volatile substances formed by yeast. abst. 33:237.
Phenology. grapevine, chronological classification. 33:80-5.
Photosynthetic response. to salt treatment in *V. vinifera.* abst. 33:128.
Pierce's disease. immunosorbent assay for bacteria in plant tissues. abst. 33:128.
  isolation medium for bacterium. abst. 33:237.
  vector preference and inoculation efficiency. abst. 33:237.
Pigment. grape. purification of. abst. 33:129.
Polysaccharide fractions. soluble neutral, of wine and juice. abst. 33:238.
Pomace. grape. as animal feed. 33:44-6.
Positioning, shoot. effect on Concord vineyard microclimate. 33:99-108.
Potassium fertilization. effect on Concord grapes. 33:145-8.
Proline. content in experimental Indian wines. 33:231-2.
Protein. soluble. rapid analysis in must and wines. abst. 33:57.
Pruning. cane and harvest. response of Zante grapevines. 33:185-90.
  effect on Concord vineyard microclimate. 33:99-108.
  Sultana vines to long spurs. 33:214-21.
  wounds. protection against *Eutypa armeniacae.* 33:51-2.

R

Radioimmunosorbent assay. for *Boytytis cineria.* abst. 33:181.
Reagents, winery laboratory. shelf life. 33:159-63.
Ripper procedure. to determine SO_2 in wine. abst. 33:237.
Root-knot nematode. probability of infection in grape cultivars. 33:31-5.
Rotating fermentors. rev. 33:238.

S

Saccharomyces. glycerol productin. 33:36-40.
  cerevisiae. mutagenetic effects of SO_2. abst. 33:182.
    Montrachet No. 522. ethanol, temperature, and dimethyl dicarbonate effects. 33:25-5.
Sherry. organic acids in Jerez wines. rev. 33:238.
  Palomino film. volatile components. 33:47-05.
  relationship between type and composition. abst. 33:182.
  sun-baked. abst. 33:182.
Shiraz grapevines. effect of trellising and vine spacing. 33:20-30.
Shoots. effects of ethephon on. 33:164-7.
  effect of positioning on Concord vineyard microclimate. 33:99-108.
Skins. See grape skins.
Sodium chloride. tolerance of grapevine cultivars and hybrids. abst. 33:128.
Solids. insoluble. effect on SO_2 content and maloactic fermentation. 33:194-7.
Sorbic acid. as wine preservative. rev. 33:130.
Source strength. influence on mobilization of assimlates. 33:207-13.
South African wine. See wine.
Sparkling wines. autolysis of yeast in champagne, 33:6-13.
  determination of amino acids by HPLC. 33:135-9.
  sparkle development while bottle-aging. abst. 33:129.
Sterile bottling, cold. sources of reinfections. 33:140-4.
Stomatal conductance. influence of windbreaks and climatic region. 33:233-6.
Sucker growth. control in Sauvignon blanc with naphthaleneacetic acid. 33:198-200.
Sugars. rapid method for determination in musts. 33:176-7.
Sulfide, dimethyl. in New Zealand wines. abst. 33:57.
Sulfur dioxide. effect of insoluble solids on white wine content. 33:194-7.
  estimating resistance of yeasts. rev. 33:183.
  factors affecting death of yeast by. abst. 33:182.
  mutagenetic effects on *Saccharomyces cerevisiae.* abst. 33:182.
  removal from atmospheres of table grapes. 33:61-6.
  Ripper procedure for determining in wine. abst. 33:237.
  treatment for wine cork microflora. 33:124-7.
Sultana vines. pruning to long spurs. 33:214-21.

T

Tannin-protein complexes. hydrophobic interactions. abst. 33:130.
Tartaric acid. See acid.
Temperature, fermentation. effect on viability of *Saccharomyces cerevisiae* Montrachet No. 522. 33:222-5.
  effect on volatile substances formed by yeast. abst. 33:237.
Titratable acidity. effect on dry white wines. 33:75-9.
Tokay, Flame. effects of ethephon on buds and developing shoots. 33:164-7.
Trace elements. in must and wine. 33:226-30.
Training. effect on Concord vineyard microclimate. 33:99-108.
Trellising. effect on Shiraz grapevines. 33:20-30.

U

Uncinula necator. Benolyl-resistant strains. abst. 33:181.
Unsaponifiable fraction. components of, in grape skins. 33:201-6.

V

Vacuum-pressure. gauge for corked bottles. 33:184.
Vector preference. component of resistance to Pierce's disease. abst. 33:237.
Vine. See also grapevine.
management techniques for years of low winter rainfall. 33:117-23.
spacing effects on Shiraz grapevines. 33:20-30.
Viticulture. geography. rev. 33:185.
present interests. rev. 33:58.
Vitis champini. carbohydrate metabolism and cutting performance. 33:53-6.
Volatile. components of Palomino film sherry. 33:47-50.
esters. concentration is *Vitis* spp. 33:14-9.
substances. formed by yeasts. abst. 33:237.

W

Windbreaks. influence on diurnal fluctuation of leaf water potential, stomatal conductance, and leaf temperature. 33:233-6.
Wine. Champagne. autolysis of yeast. 33:6-12.
decolorizing. 33:60.
effect on gastric emptying in humans. abst. 33:182.
history and art. rev. 33:240.
Indian. proline content. 33:231-2.
Italian. rev. 33:239.
Jerez. organic acids in. rev. 33:238.
Kiwifruit. 33:191-3.
methods of analysis. rev. 33:58.
microbiology techniques. 33:238.
New Zealand. methyl sulfide in. abst. 33:57.
Perpignan. rev. 33:239.
pH and titratable acidity effect on quality. 33:75-9.
preservative. sorbic acid. rev. 33:130.
red. parameters of quality. abst. 33:129.
Rhone. rev. 33:239.
South African. rev. 33:239.
sparkling. autolysis of yeast in champagne. 33:6-12.
determination of amino acids. 33:135-9.
sparkle development while bottle-aging. abst. 33:129.
storing. rev. 33:240.
technology. rev. 33:130.
trace elements. 33:226-30.
vs. ethanol in human nutrition. abst. 33:57.
white. SO_2 content and malolactic fermentation. 33:194-7.
pH effect on quality. 33:75-9.
Winemaking. commercial processing and controls. rev. 33:58.

X

Yeast. autolysis in champagne. 33:6-13.
death of, by SO_2. abst, 33:182.
glycerol production of Saccharomyces. 33:36-40.
immobilized. abst. 33:238.
influence on ester concentrations. 33:94-8.
SO_2 resistance. rev. 33:183.
temperature and pH effect on volatile substances formed. abst. 33:237.
viability of *S. cerevisiae* Montrachet No. 522. 33:222-5.
volatile component differences.

Z

Zante grapevines. response to cane and harvest pruning. 33:185-90.
Zinc. balance in human nutrition. abst. 33:51.
