

## CONTENTS

### *Research Articles*

Cellar Temperature Affects <i>Brettanomyces bruxellensis</i> Population and Volatile Phenols Production in Aging Bordeaux Wines <i>A. Cibrario, C. Miot Sertier, L. Riquier, G. de Revel, I. Masneuf-Pomarède, P. Ballestra, and M. Dols-Lafargue</i> . . . . .	1 - 9
Automatic Flower Number Evaluation in Grapevine Inflorescences Using RGB Images <i>J. Tello, K. Herzog, F. Rist, P. This, and A. Doligez</i> . . . . .	10 - 16
Press Fractioning of Grape Juice: A First Step to Manage Potential Atypical Aging Development during Winemaking <i>T. Roman, T. Nardin, G. Trenti, C. Barnaba, G. Nicolini, and R. Larcher</i> . . . . .	17 - 25
Nonlinear Behavior of Protein and Tannin in Wine Produced by Cofermentation of an Interspecific Hybrid ( <i>Vitis</i> spp.) and <i>vinifera</i> Cultivar <i>E.L. Norton, G.L. Sacks, and J.N. Talbert</i> . . . . .	26 - 32
Potassium Requirements for Pinot noir Grapevines <i>R.P. Schreiner and J. Osborne</i> . . . . .	33 - 43
Predicting the Impact of Fermentor Geometry and Cap Management on Phenolic Profile Using a Reactor Engineering Model <i>K.V. Miller, A. Oberholster, and D.E. Block</i> . . . . .	44 - 51
Soil Temperature Prior to Veraison Alters Grapevine Carbon Partitioning, Xylem Sap Hormones, and Fruit Set <i>S.K. Field, J.P. Smith, E.N. Morrison, R.J.N. Emery, and B.P. Holzapfel</i> . . . . .	52 - 61
Addition Rate of Exogenous Tannin for Optimal Tannin Retention in Hybrid Red Wines <i>A.J. Fredrickson, D.C. Manns, and A.K. Mansfield</i> . . . . .	62 - 69

CONTENTS *continued*

Early Leaf Removal as a Strategy to Improve Ripening and Lower Cluster Rot in  
Cool Climate (*Vitis vinifera* L.) Pinot Grigio  
*J. VanderWeide, T. Frioni, Z. Ma, M. Stoll, S. Poni, and P. Sabbatini* . . . . . **70 - 79**

*Research Note*

Malate Content in Wild *Vitis* spp. Demonstrates a Range of Behaviors during  
Berry Maturation  
*E.A. Burzynski-Chang, E.J. Brown, N. Reshef, and G.L. Sacks* . . . . . **80 - 87**
